BEASTIALITY STORIES

Jan and I were always meeting new folks. Most of the time they were friends of people she knew from before we'd got married, and in our area most of these people were your average hard working simple country folks, neither rich or poor but just getting by. I guess the bluntest way to state it is we were all rednecks.

And all of us were always looking for a way to make more money, so lots of these first meetings had some marketing or multi level opportunity connected to them, and after that fizzled out you generally had a friend. This is how we met Carl and Cathy. They were friends of Becky who had been a high school buddy of Jan's, and after we decided not to get involved with the most resent door to door thing (light bulbs or something) we found we had a lot in common, plus Carl and Cathy were quite taken by our male shepherd/lab cross, as they of course had seen both our dogs, during these meetings and guys being guys Carl had bragged about his canine kids as well.

But both Carl and Cathy were taken for another reason, as even though Footloose was a mix, he had the coat, head and ears of a shepherd his body size was more lab, at first glance he did look like a back sliver-tipped German shepherd, till you looked at the length of the muzzle and broadness of his skull, but it was his character and intelligence that caused them to mention they had a shepherd/wolf bitch that they wanted to breed and if we didn't mind, they thought Footloose would be a good mate. At the time in our area and all the way up the west coast lots of folks were crossing the German shepherds and wolf, trying to get the perfect mix of both, so after lots of discussion we thought the end result of about 1/2 shepherd with 1/4 wolf and the rest lab should make a good stable canine; we set up the mating.

While Carl and Cathy had both fussed over dark furred Footloose they had absolutely been smitten by Fancyfree our light blonde and normally saddled and marked shepherd female who they claimed was a look a like for Baby their wolf cross, the only difference's they said was in the height, as Baby was 6 or more ins taller, and Baby's head was broader like a wolf's, and of course the color of the eyes, which I found out later to be true, as even I mistook them at a distance for each other a few times while Baby lived with us.

One of their first questions after seeing the dogs for the first time actually had been when were we going to breed our two, and could they be on the list of buyers, but we'd had to have Fancyfree spayed when we got her out of the pound, so that option was out, which had led to deciding to use Footloose with their bitch.

As it turned out Baby arrived at our place a week later and due to the time of year and the fact her heat cycle was geared to that of a wolf's she was already coming into the first phase of her yearly heat cycle. So after the initial meeting, greeting and butt sniffing, all 3 dogs settled down and acted like they had been together for years, of course Footloose was ecstatic and full of himself as Baby's scent had him stuck to her side like glue and kept him in a very aroused and ready state, of course as often as I could when myself and the dogs were alone I took full advantage of his eagerness, her's too for that matter.

Baby was definitely not an alpha bitch, as she never challenged Fancyfree for the top female position. And as she was still coming into heat and not fully ready she was very passive and insecure about Footloose's undivided attention to her, swollen seeping dog cunt, and like any bitch that wasn't in standing heat, she would sit on her butt to keep him from mounting her, or after his sniffing and licking her her oozing slit got to be too much for her to handle, she would when pressed far enough finally growl and snap at him to tell him off.

This settled down into a constant routine for the next many days, as she keep coming further into her readiness. Footloose was a constant shadow at her side, never letting her out of his sight, and he would spend all day resting, or playing with her, and every time Baby would finally have to go out into our fenced yard to relive herself Footloose would be there; both to guard her from any stray mutt that he thought could have gotten into the yard, and to check for himself if her scent said she was ready. I almost felt sorry for Baby at these times as when she squatted to pee her enlarged canine pussy would be only a couple inches from the ground and she would still be pissing on Footloose's nose as he had it so close, and as he licked up her juices of course he would start forming at the mouth and get the chattering teeth that told him she was ready enough. And Footloose would run around her; drooling like a fool as his teeth beat a stastaco, and his red rocket would be showing its dripping tip form its furry den. you could watch his sheath grow with lust as his sheath slid back and forth over his swelling boner.

I actually think he was losing weight, as he seemed to forget all about eating anything; other than her. If I was alone with Baby and Footloose at these times I would involve myself with them by petting and stroking her as soon as she was done peeing, by rubbing her ears, head, chest and belly, getting as close to her her sex as she would allow, and Footloose got as many quickie hand or blow jobs as he, or the time and location allowed. other times when we were still alone I would be in the bathroom on the toilet as they would come thur, and getting them to stop I would pet on Baby and then shift her so her sexy furry butt was between my legs and sliding myself forward i would dry hump her, then I woud try pressing my own blunt dickhead into her still puffy stiff slit, the head of my dick would part her lips then slid off to the side smearing both my pre-cum and her dripping dog juices on her furry rear, while I was doing this Footloose would normally aid me a little by applying his warm wet tongue to where we were trying to join, both adding his slobber to the slimy mix and to drink up her secrections, this would get him a gentle hand job so he would swell and spray his own dog seed all over our legs or the floor. Trying to maintain my own balance on the edge of the toilet seat while holding Baby around the hips with one hand, and leaning forward and down to give Footloose a hand job with the other while trying to penetrate Baby's pussy with my dick as it was pressed into her slit generally ended quickly as we would end up toppling over in a tangled heap of fur,flesh clothes only to have to untangle ourselves so we could try agian.

Actually I think Footloose was a bit worried at times about who Baby would accept as her mate, even thou when it was all over we both shared her, as while she was still telling him off or resisting his advances to stand while he mounted, she would when she came up to me, drop to her belly in a crouch then roll over exposing herself to me and allow me to pet, stroke or fondle her, even to the point of rubbing her hershey's kiss shaped sex and gentley finger her slit.

As the days progressed both Footloose and I were at our wits end just waiting for Baby to finally be in standing heat and want us as much as we wanted her. But life carried on and Jan and I this night had invited Ted and Sally, her Mom and step Dad over for dinner, and to spend time with their Grandson. As we waited for the roast to finish in the oven the 4 of us gathered out in the side yard that was also the dogs run in the cool of the evening, so Ted and I could smoke, as Jan and I had agreed since our son was born no-one could smoke inside the house, so the 4 of us are out back Ted and I had smokes and coffee cups in hand, Sally and Jan had their tea, and while we chatted the time away we watched with varing degrees of instrest, or lust in my case, the antic's of Baby and Footloose,

Baby by this time was so close to standing heat she just wans't sure about it, and Footloose was determined to bury his rod in her, so while they scampered about the run often bumping agianst us; we, mostly Ted and I made earthy comments about Footloose's progress with Baby, what flowed from Ted and my mouths were offers of showing Footloose just how he should do his task or feeble jokes about how we could do better.

Poor Footloose was beside himself in his attempts to mount and penetrate Baby and tie with, her so his seed could make the pups nature intended, and Baby thought she knew what she wanted but she still acted like she was more in the mood for play and not sex, Once when their antics had them stop right in front of us for the mount and hump I jokingly reached down under Footloose's thrusting hindquarters and gently and with unnoticed familiarity grasp his sheath and tried aiming his rocket tip at the weeping portal of Baby's sex, but their frantic movements caused them both to miss. finally with reluctance on my part Jan called us all to dinner and we left the dogs to their own games while we went in and had dinner and spent part of the night visiting, finally Ted and Sally went home and Jan and I were by ourselves, after cleaning up and watching the dogs a bit longer we finally headed for bed, sex for me that night was a no go, as Jan had to be up to many times thru the night to breast feed Cory our son and had to go to the city the next day, plus I had work that started while it was still hours from daylight, so even though I had been just as tempted as Footloose all night by Baby's charms I was least likely to be the one getting any tonight. so it was with reluctance I laid down and tired to drift off to sleep.

Seemingly only minutes later I sprang upright out my sleep to the sound of someone SCREAMING in pain!!! it took a seconds unfocused thought to realize it was a dogs screams and not a humans, I was only a split second behind Jan as the next sound I could hear was the startled cries of a human baby; racing together we left our bedroom ran thru the bathroom to our adjoining nursery where Cory our son was doing his own wailing and crying at the top of his lungs but the reason for his cries were evident, for standing at the side of his bed with her muzzle only a foot away was Baby, who was crying into his ears, as Footloose had finally reached his goal, he had mounted, buried, and knotted his doggies dick in Babys softened ready dog pussy as she had finally stood for him long enough to him to give her his present, but Footloose was more well hung than she thought and he'd swelled to his full size and was painfully stretching her tight passage to fit him. plus he'd dismounted and started to turn so they would be butt to butt and as she was a bit taller than he, he was hung up with one leg still on her back, his weight was pulling down and adding to her discomfort, which she had verbalized by yelping and howling at the top of her lungs, so as Jan picked up Cory and sat in the rocker giving him comfort in the form of a breast, I helped Footloose finish his dismount by pulling his stuck leg over so it came off Baby's back and he could finish the turn allowing his swollen knot to stop pulling so much on Baby's overstretched spincher.

Even in my half asleep state the sight of these two locked in their lust with me being only a foot away started to stir my own perker to wakefulness so as I swelled, I turned my back on Jan and knelt down beside Footloose and Baby. encircling both their hindquarters and pressed them together so the pulling on baby's sex was lessened, with the feel of their fur on my naked torso, chest and legs and the sight and scent of them literally in front of me had my own raging hard on brushing against their furry legs, it was only by sheer will power I managed to not fondle their lewd sexy connection or to try licking their joining; and thinking hard I managed to lose most of my aching hard on, so by the time Jan had settled Cory down Footloose and Baby were separating with a loud sucking pop my own hard on had diminished enough not to arouse questions. As the dogs raced thru the door to the living room to flop down and lick on their organs I followed to enjoy the view and cop a few quick feels, noticing as I knelt over him that Footloose's knot had some brushing over the back side of his dog knot indicating just how tight Baby had been or reaffirming just how large he was. Grinning I whispered to him "bet it was a tight fit." then I went over to check on Baby as she tongued her doggie cunt letting her warm licks help ease the lingering pain and sudden emptiness, as I gently traced my fingers around her now used sex well I grinned as I contemplated my chance to see just how tight she was myself tomorrow when we were alone. After making sure Cory was fast asleep again and the dogs seemed to be settled down for the night Jan and I returned to bed.

Well the Dogs let us sleep the rest of the night without any more surprises, and the next day began

with me waking and leaving for my job. as I was up by myself with the dogs I paid lots of attention to both of them and promised Baby I'd take plenty of time with her later, and told Footloose he'd get his own reward for sharing his lady with me. All day at work I could barely keep my mind on the job as I envisioned the 3 of us in a group hump or just Baby and me with Footloose getting his treats later. finally the day was over and I raced home, as soon as I hit the front door I started stripping, kicking off my boots and dropping my clothes as I went, calling for the dogs I walked naked thur the house going to the bathroom and sat on the throne, just beating the dogs as they came in from the outside run, their moist wet nose's bumped into my naked swelling sex as they drank up my scent and thier wet licking tongues finished the swelling of my own dick.

As Baby and Footloose milled around in front of me planting wet kiss'es on my thighs and groin I reached around and running my hands down their backs I pet and stroked them, as I reached Baby's rear her tail came up and curved to the side, reaching under with my hand stroking her I ran the flats of my hand over her rows of nipples straining to reach her treasure, bending forward I managed to rub her pouting flaby sex and using the hand between her legs I drew her around and over to me so her hind end was between my spread legs. Switching so both hands rubbed her over her back and sides I pressed myself into her temperrarley abandoning Footloose and as my inner thighs and stiff pecker brushed and rubbed agianst her outer thighs and groin I gazed down on her beuiful furred form, her raised flaggiing tail curled up over her back waving like a banner, exposing her sex to me, Baby looked over her shoulder at me, her yellow wolfish eyes gleaming with the fire of her own lust as my pecker bumped around between her inner thighs slidng agianst her soft downy fur and grazed past her ready sex to plow its way down the crease between her leg and groin, as my pupes met her hindquarters the head of my ozzing penis was pressing agianst the hot naked flesh centered in the crease between her last two teats, with my body pressed firmly agianst hers I could feel the throbbing as her clit was pleased by the scenctions it was feeling.

I encircled her legs reaching under and around her with my right hand and arm while my left traveled to the creamy white fur of her inner breechs located and parting the lips of her sex I gently probed with my fingertips causeing her to buck her hips slightly in antisapation of the coming pleasures, after wetting her sex's lips I backed myself slightly so my rock hard boners head was close to her mound and rubbed my fingers over the head, smearing her secrections and my own slipperly pre cum so they mixed and covered the head of my fat bloated human sex with a slimy slipperly coating.

Holding my swollen shaft with my hand I extended my fore finger past my cocks head and parted the lips of her sex, then pressing the head of myself into her I shoved my hips forward trying to drive myself into her heated depths. but my blunt headed human cock only folded the lips of her pussy inwards as I shoved forward and clung to it keeping it from spearing further inwards, drawing back slightly I allowed the lips of her sex to unfurl themselves and rolled and rocked my penis head around in the warm wet slipperly enterance of her tunnel. and then pressed foward agian. only to be thwarted agian as her lips dispite the lubracation folded inward and stopped the advance of my entrance. fianlly after several repeated attempts and gainning no ground I thought that the difference in our respective hieght might be part of the problem so still holding her around her hips with my right hand and arm I slipped off the seat of the stool and attempted to thrust upwards toward her glistening ready sex. but now on both knees like I was use To with Fancyfree when we made love due to Baby;s being taller I was thrusting and stabbing in the air without getting any closer than I was before.

As I was air humping into Baby I was actually moving her forward on the floor so we ended up next to the outer wall and the cupboards there,seeing I needed a little more elevation to reach my goal I leaned my left side agianst the wall and raising my left knee off the ground so I was balancing on my left foot while leaning agiant the wall and still on my right knee, this raised me the final few

inches. From the space in the cupboard I grabbed a tube of lubricant that Jan had there and squeezed a dollop in my hand letting it warm up, now I held Baby close to me savouring the rubbing of her furry warm body against my hairless flesh. With my left hand I smeared some of the lube on me and again guided my stiff throbbing pole to its destination as I parted her nether lips with my finger I added some of the lube to her lips and smeared it in with her juices mixing them and wetting her lips then sliding some into the opening of her cunt, as I did this I felt and saw her pussy flashing in lust at my touch.

Guiding my now swollen leaking head near I added my own juices to her sex and then spread more of hers over me. Looking down past her raised flagging tail I watched as my sheathless human dick pressed into her heated furred lips and press inwards as the lips of her sex folded in and followed the head of my cock into her entrance I rocked and jiggled my dick and finally between the proper heights and enough lubrications my cock head slid into her heated portal, As soon as my cock head was fully into her to just past the back of the glans I paused and drew back slightly, and jiggled my dick some more allowing finally the lips of her sex to fold back and then engulf and wrap fully around my glans her sphincter gripping and teasing my shaft.

Heaven, Narvina, Ecstasy, Soul Enlivening, Wonderful Rapture, Intense, Overwhelming Pleasure, Incredible Silky Warmth. HEAT, and I was only started, I looked up from the sight of our connection and looked straight into Baby's Glowing yellowish wolf eyes, as she looked back over her shoulder and I saw the same things in them as I felt, removing my left hand from around my shaft I placed it on her hip and with both hands pulled her into me as I pressed forwards slowly I watched my shaft disappear into her molten depths, stopping when her pussy lips began folding inwards with the passing of my dry human shaft and watching them re-appearing as I pulled back letting her sex lips spring back and the lube her pussy was leaking coating my shaft as it advanced. After I had 4 of my 6 inches seated in her I paused and started jerking quickly back and forth an inch or so, in and out letting her dog pussy massaged and squeezed my invading shaft, this also allowed her pussy to coat and slicken our connection even more.

As my invading cock plowed its way into her molten depths Baby widened her stance, bracing her hind legs and arched her back which brought her furry treasure lower to my thrusting pelvis finally allowing our parts to be fully aligned. With a groan escaping thru my clenched teeth I humped myself forward shoving my hips fully into Baby's furry ass as I pulled her into me with my hands which were locked around her furry legs, Baby herself was humping her hips wildly and rapidly in response to the pleasurable stimulation her canine clit was causing her, suddenly on her downstroke and my upstroke our pelvises slammed together and we were fully seated and pressed into one another. Instantly we both froze in place, Baby her outstretched hind legs causing her whole rear to be pressed down onto me, myself with my pelvis thrust fully forward my arms pulling her back and onto me, the twitching of my shaft and cock head, the silky sooth warm slippery rhythmic pulses as her canine passage massaged me in harmony. Our labored wheezing breathing and pounding hearts could be felt thru our intimate sensual contact.

Both of us in that instant seemed to want this to last, and we both just froze in this position, resting giving our bodies time to adjust Getting a breath and stalling the orgasms, finally I loosened my grip and started a slow withdrawal of my penis from her soaked passage as I moved Baby also relaxed her rigid pose, balancing herself just enough so she wouldn't fall over. As my shaft began appearing I saw her pouting lips seem to fluff up a bit as the pressure eased on them, and seeing my shaft with its surface coated with her heated juices and felt the chill as my now naked flesh realized how cold it was outside of Baby's wonderful cave, I paused as soon as I felt Baby's rather tight sphincter gripping my shaft just behind my glans, I know it can't trap and stop me from withdrawing like she would were I a real dog, but still I pause and wish it were so, but I also realize now just how tight she is and knew why she'd been howling the night before. because as big a dog as she is; a wolf

at that, baby is tighter than some smaller dogs i,ve been with; even Fancyfree was bigger than this and before me she'd never had sex or pups as she;d been spayed as a pup!!

Now I press inwards watching her puffy lips fold slightly as my dick begins returning to it nest, as I advance i feel the difference of textures on my glans and shaft on either side of her spincitcher one a silky smooth tube the other a molten mushy enveloping sponge and the feeling of an over tight cockring as her spinther squeezs my shaft tightly, almost painfully, now fully buried in my lover I pasue and wait, then taking short jabbing strokes I cause her spinther to slip as far down my shaft as it will come and my head and shaft are as deep as they'll get. Now Babys spinther is truely like a cock ring as its tightly wrapped around the base of my cocks last inch forceing the blood to be trapped in my engorged tool and not allowing it to drain back out nor with it let my seed spew out of my ready to burst pecker, oh boy the senscations are incredible, every nerve in my body suddenly knows what my dick is feeling.

Slowly we set up a rythem; me in and out,Baby up and down, our two sexes drawn to each other,made for each other,as my shaft pass's in and out of her passage she squeezes me,teaseing me with her control, as I piston myself within her sleeve her spinther loosens enough to be a pleasent band of tightness teasing the lenght of my shaft as my cocktip kiss.s her ceverix our pupes are tightly meshed together only the difference of fur and flesh showing them to be two and not one. In the rythem of lovers of ages past and time forgotten we couple, in the mystrie;s of the mental we converge two souls forgeting the difference of bodies, in the cosmos of the spritual we see the beauty of each other souls and not the covering, forgetting the taboos and wondering why there in place anyway when this feels so right. In the physical we savor the gifts of pleasrue we recive from each other and that each gives to our lover. Here the more we give, the more we recive, the closeness, the tactile sencastions, the soaring of mind body and soul.Dimly as I drive myself in and out of Baby I know the climax is near, I hear my own labored breathing and hear her panting, I feel and hear my own hearts pounding in my ears and can feel hers thur my bodys contact with her.

Stroke, Stroke, Stroke, Molten warmth, Tingling twitching nerves,Suddenly we can no longer wait. I begin driving myself into Baby, and she onto me opening my eyes I look one last time at the sight of our coupleing, under her raised flagging tail where our sexes are joined then looking up over her furred back I see shes turned, gazing at me with her yellow wolfish eyes, they lock and I see right past them into her soul as I know she dose mine and see only love and acceptance,I lean forward over her, streaching my face out to hers and she reaches out with her muzzle to reach me, touching nose's I accept her warm wet tongue as it darts out and licks over my lips, and I open my mouth so she can give me a deep french kis, as she withdraws her tongue from my mouth I close my lips over it slightly sucking on it till she pulls it away, in responce my own tounge darts out and licks over her muzzle and brush's agianst her gleeming fangs, then I give a quick lick to her nose and share a breath with her. Then she looks back to her front and tilts her head and stiffening neck to the sky and flattens her ears to her skull her tongue hangs out panting over her curling lips and gleeming teeth,I close my own eyes squinting them tightly and all my muscles draw tight slamming and holding me as deep in her as I can, my own back is arched and locked n spasms, suddenly my balls tingle and I feel the spasms start, driving myself even further forward as Baby also suddenly shoved herself down, we lock together pube pressed tightly to pube, Babys tunnel spasms and pulse'e in waves and my cocks tip kiss's her cervix and my dick swells and spews its frist volley of seed, bathing her molten wet vagina.

Pulse, squeeze, pulse, squeeze, pulse, squeeze, our orgasms overwhelm each of us, I feel Babys spinther suddenly clasp around my shafts base thinking to trap me till she's done,and the sudden wetness as her clit overloads and causes her to release an abundance of fluids to dammpen the fires of our lust, as it escapes the lips of her sex now wrapped around my cock and coats my ball sac, then running down both our legs as were so tightly joined, as I press Baby tightly agianst me I feel the

throbbing and spasming of her buttohole where its pressed agiast my waist and the tickle of her tail hairs as it waves back and forth across my chest causeing goosebumps of pleasure, For each pulse and blast of sperm I lanch and fill baby with, I feel her passage masauasge me, coaxing out more, seeking for her womb to be filled up full so we can have many offspring
3.....4.....5.....6.....7.....8..... -

Never in all my years has as orgsam hit me that hard or lasted that long. the only other close ones were with other furred lovers but now 30 seconds after the last volley has left me I'm still locked tight to Baby and only relunticly do I and she begin to part, my balls ache with there emptiness and my dick is still firm but only because its in shock and hasnt figured out to deflate, as it wont be ready to use agian today after this wild lover. Finally I manage to withdraw myself from Baby. And as my heads pulls out her; her spinchter seems to try to trap it and hold it right at the lips of her sex, but alas we're both too spent and my head pulls out of her furred lips with a tiny pop and her loose lips allow a thin dripping stream to begin issueing form there while she's still showing pick folds. As I release Baby from my embrace she spins so we,re face to face, she's staring at me with those laughing yellow wolf eyes who's fire had only been banked somewhat, but has also been replaced by a look of love, as I half lean agianst the cupboard wall ready to collapse she darts toward me and gives a quick lick to the string of sperm hanging from my cock and darts her tongue over my sex and balls a few times, and as I slide down in a heap Baby flops herself down and quickly spoons out of her crotch with her nimble tongue the bulk of the spills and drips, then suddenly Baby launches herself on all fours and reaches her face out to mine as I rest on hands and knee's using the wall as balance and drives her tongue into my mouth and down my throat sharing with me a deep passionate kiss and a taste of our combined love and lusts juices, as her tongue withdraws I can taste both her juices and my own jizz, swallowing I try to stick my own tongue into her panting mouth, but Baby suddenly and wildly jumps away from me and turn's running out the bathroom door she begins a wild reskless race thur the house, as she passes thur the nursry I hear her bump the changing table, and as she go's thur the living room I hear her hit the area rug and cause it and her to slide over the wood floor till its stopped by the entertanment center. as she hit the titles of the kitchen I hear the wooden chairs bump and rattle agianst each other then the slamming of the doggie door as she charged out of the house.

As Baby raced away in her orgasm run/dance I collapsed to the cool titles of the bathroom floor and lay there on my back. enjoying the aftermath of our lovemaking, suddenly Footlloose who,d been off to the side during our lovemaking only sticking his nose in once in a while to have a lick walked over to me and touching noses gave me a quick kiss across the lips, and tasting both doggie snatch and my own cum on them follow his nose down to where my spent dick lay on my pubes still half swollown, after asking and reciveing permission with his eyes Footloose reached down and began greedely and gentley cleaning and washing my dick and balls and entire pubes of the combined juices and essances Baby and I had left there, as he washed me I coaxed him over so he was standing over me straddling me, his forelegs near my waist and his rear legs on either side of my head and as his warm wet tongue danced over my sex I reached up to his furry dangling sheath and ball sac and licked and rubed him, using my hand I drew his red dog dick out of its sheath and guided it to my waiting lips and drew him in, massauging his sheath with my hand I watched and felt him grow in my mouth, as his dick began spitting out his thin salty pre cum I greediley sollowed, pulling his sheath back over his swelling member I cleared it of his sheath so his knot could grow to its full size and as Footloose stood there gentlyly bucking his hips in responce I slide the length of his member up to the front of his knot down my throat, as drank his juices as his spewed them,

For a brief moment as his member enlarged and swelled Footloose stopped his licking of my own sex and simply stood there panting in pleasure, his long dangleing jiggling tongue planting wet kisses wherever it fell on my sex. after his knot had finished swelling to its full size and simply throbbed

and pulsed spilling his juices in tiny jets, I pulled his cock out of my mouth and let the jets spray over my chest and torso, then he slowly started washing me again his dangleing red rocket was fed again into my waiting mouth which drank down his offerings, after only a few minutes Footloose finished his washing of me, pulled his own dick out of my mouth and stepped off from over me and plopped down besides me pressing his furred back against my side and he licked his own dick causing it to retreat into its furry den.

Suddenly the sound of the dog door in the back room caught our ears and the sounds of Baby coming back in reached our ears, still in a slightly hyper state from her orgasm run/dance but calming down we heard the sounds of her as she came from the kitchen to the bedroom and her jumping on and clearing the bed, then standing before us in the doorway to the bathroom looking down on us, her whole body expressing her joy from her bright dancing eyes, upright ears, panting and grining mouth, to her wagging flagging tail. Baby looked down on us as we lay there and stepping forward reached out her muzzle and began kissing me, drawing her to me I returned her kisses, allowing her to taste in my kiss the essence of Footloose's recent present, breaking the kiss I pulled her forward and besides me so her nose could find its way to my torso and crotch were she licked up a few of the gamey stains

Straining to reach around to her rear I shoved my face into her ass, and with her downy fur pressing into my face I managed to get a few quick licks on her ozzing mushy pouting doggie vulva, stabbing my tongue into her slit, tasteing both of us again, as I dined on her Footloose rose from where he'd been resting to join us, and as she moved away from my kiss's to her sex she stood still allowing me one last body hug as I'd raised myself to my knees Then Baby broke away from my hug as Footloose stuck his nose into her sex and started licking her. As she darted away in sex play with him both of them raced from the bathroom and thru the house, to the yard outside to engage in their own games. I left them to their desires and rose to my feet and began to clean up so our little romp would remain our secret, wondering as I did if we would ever be able to repeat it in the few days we had left.

THE END
