## **BEASTIALITY STORIES**

Eva drove down the winding country road enjoying the warm spring morning. It had been a long cold winter. The bone chilling weather had held her captive in her apartment and the office for months. With the windows down and the sun roof open on the small pickup a gentle breeze blew through her thick dark hair as the rays of sun tanned her smooth skin. Her halter top strained to hold her beautiful D cup breast. Her sexy short shorts had ridden up exposing the edge of her thick well groomed pubic area.

The sun rays felt wonderful on Eva's skin. She wanted to find a secluded spot down one of the farm roads where she could strip down and tan her gorgeous body. She turned off the small two lane paved road and headed deeper into the country. The vegetation and trees had leafed out which hid many of the small gates that led into the fields and pastures along the rustic dirt road. Eva turned into what looked like a very old ranch entrance.

The rock arched entry was covered with vines and trees and an old iron gate was open just enough for the small pickup to pass through. She could tell the road had not been used for a long time. The small two rut road twisted and turned through the thick over growth of bushes and trees. Eva had driven for sometime when she came to a small sunny meadow with a barn and pens on the far edge of the bright opening. It was the perfect place to get naked and work on her tan.

Eva parked and stepped out of the pickup bare footed as a warm breeze blew over her body toward the barn on the edge of the sunny clearing.

Eva pulled the halter top up over her head allowing her large round breast to bounce free and then wiggled out of her tight shorts. Now completely naked Eva grabbed a large towel and tanning oil from the cab of the pickup and walked to the back to let the tail gate down. She spread the thick towel out and started to get into the back of the pickup to lie down but decided to pee first. She walked a short distance from the truck and squatted.

Eva gazed at the barn while she relieved herself on the ground. As she dripped dry, her finger gently rubbed her clit as her mind began to wonder. It had been a few weeks since she and her last boy friend had broken up. She thought about his oversized cock and how good it felt the first time she was fucked by a big dick.

She had been with several guys but they had all been average as far as cock size goes. She thought about the first time Lee had stripped down in front of her as they were getting ready to fuck for the first time. She recalled how his ten inch cock flopped down his thigh when he stepped out of his jockey shorts. She thought about the pool ball size mushroom head that seemed to pull the thick shaft toward the floor before he was erect. This made her pussy hot and moist as she stood up and walked back to the pickup.

Now on the towel, Eva rubbed the slick tanning oil all over her well developed body. She lay back and closed her eyes enjoying the warm sun as her slick fingers parted her pussy lips. She felt her body tingle as she once again thought of Lee's big dick and how it felt the first time he penetrated her. She remembered lying on her back looking over her full breast down her flat tanned stomach as Lee moved between her spread legs.

He paused and licked her clit for a moment and then moved up her belly past her small waist to her breast. He sucked on each nipple until it was erect. He rose up above her on his powerful arms and supported his muscular upper body which gave Eva a great view of the huge cock head and shaft that was sliding back and forth over her dark bush up to her belly button. Lee moved down slightly

and allowed his cock to find Eva's hot opening.

He pushed forward and her pussy stretched to allow the big head to enter. She began to have an intense orgasm even before Lee had buried the ten inch shaft. She knew at that moment that size does matter and the bigger the cock the better the sex. A gentle breeze brought her back to the bed of the pickup where she had soaked the inside of her thighs, dripping juices down over her asshole to a big wet spot on the towel.

Jake raised his head with nostrils flared filling his lungs with the scent carried on the breeze from the meadow. He knew this scent. It reminded him of his owner's new wife and her friends who would visit the ranch. He would watch the women as they walked around the stables. He saw how some of the women would giggle and point while others stood silent as they looked upon his magnificent maleness. He noticed how the women including the rancher's new bride would begin to release a scent which excited him sexually. He saw the look in some of their eyes as they stared in amazement of super sized cock.

He stepped into the clearing and noticed a vehicle parked in the warm sun light on the other side of the meadow. As he moved his powerful body toward the pickup he looked for movement. As he got closer the scent became stronger and his large testicles began to tingle. He stopped and lowered his nose to a wet spot on the ground where Eva had peed earlier.

He drew in a deep breath taking in as much of the scent as he could. He raised his head high and curled his lip in approval. He moved around the pickup keeping a safe distance to see where that cock hardening smell was coming from. Eva heard something and sat up to see what it was. Standing thirty feet away from the truck was a strong muscular stallion.

Eva had been around horses on her uncles' ranch and knew from the big muscular body and large testicles that this animal was a pure sex and breeding machine. She didn't realize that Jake had picked up her scent while she laid tanning and masturbating in the back of the pickup.

Jake watched Eva sit up. His eyes took in her gorgeous body. His primal instinct told him to breed and impregnate every female that he came across and that was what he intended to do. Eva could see that the stud was becoming very aroused. His swelling cock was now hanging toward the ground and his bloated testicles began to tighten.

Eva was very turned on at the sight before her. A wave of lust and perversion swept through her body. She knew the difference cock size had made after meeting and fucking Lee. She slid off the tail gate and slowly approached Jake. She held out her hand to rub his nose, forgetting that her fingers had been buried in her pussy just minutes before.

Jake took a deep breath as Eva rubbed his velvet nose. The scent on her fingers made his cock become rigid and start to throb. Eva could see the huge cock as it bounced slightly and watched as the cock head went from large to enormous and back. As the shaft pulled up slightly the head would swell and the veins along the shaft would bulge. Then it would relax slightly and the head would go down a little.

Eva moved her naked body along Jakes side and knelt down where his huge penis and balls were even with her head. She saw pre-cum dripping from the tip of the stallions cock and noticed a musky scent in her nostrils. Eva didn't realize she was taking in the powerful airborne pheromone that the stallion was releasing as he dripped liquid sex hormones from his massive tool. She reached out and grasps the shaft a few inches behind the dripping head. It was nearly as big around as a beer can.

Eva pulled the thick fuck muscle to her lips and slowly stroked the shaft. Each time she milked the length of the shaft a large squirt of the stallion's powerful sex hormone would dribble into her hungry mouth. The stud was ready to fuck and he knew that in a few minutes his sex drug would have its effect on the woman. His mating pheromones and hormones were powerful enough to affect an eight hundred pound mare so the effect on the woman was very fast.

Eva felt her heart rate begin to increase and her clit began to tingle and throb. Still stroking the huge cock and drinking the squirts of pre-cum she reached down with one hand to rub her clit. As her finger touched it she was shocked at how big it felt. She took the cock tip out of her mouth and started to look down and noticed that her large round tits were now huge, standing straight out and her nipples were enormous. Her body was reacting to the hormones she was ingesting.

As she rubbed her clit she let her fingers drop down to the opening of her pussy. The lips were very swollen and hot and her hole was wide open. She could have put her fist in her cunt. She had never felt like this before. Eva felt a deep primal impulse to mate with the stallion. She had to have this animal spill his seed deep into her womb.

Eva stood and walked in front of the stallion and faced him. She looked him in the eyes as she lifted and squeezed her huge tits. She felt like an animal. Her juices were now dripping down the inside of her thighs.

Jakes cock throbbed as he watched the woman before him. He could tell by her scent that she was in full heat and ready to receive his huge cock inside her body.

Eva turned and walked over to the back of the pickup swinging her hips as to coax the stud. She folded the thick towel she had been lying on while tanning and laid it on the tailgate. Bending over at the waist she laid her forearms on the pad to help support her huge tits and upper body. She looked over her shoulder at Jake as she arched her back and stuck her ass out. She began to rotate her hips, teasing and begging to be bred as Jake move toward her to mount.

The stud was right behind Eva and he could see that her pussy was wide open ready for his massive fuck tool.

Jake put his nose against Eva's dripping pussy and took another breath. He raised his head high with his lip curled and let out a loud whiny. His huge cock was hanging toward the ground and in an instant it was as rigid as steel and started slapping his belly. The stallion rose up on his hind legs and came over Eva's back and rested his front feet on the back of the pickup beside Eva's arms.

Eva could hear the huge cock slapping the stallion's belly. She knew from seeing horses breed on her uncles' ranch that any moment he would start to search for her pussy.

Just as Eva had seen many summers on the ranch, the slapping stopped and the stud now started to hunch forward trying to find the gaping pussy that he had seen before he mounted. Eva spread her legs and gripped the towel with both hands. She felt as sexy as she looked. Provocatively she rose up on her toes, arched her back and pushed her ass up which made her pussy gape open even more. She was ready to copulate with the big stallion.

Eva felt the cock head touch her asshole and then slide up over her back as the stallion thrust forward. Jake felt this and prodded the area again. Eva's tanned muscular legs tightened anticipating penetration. Once again the huge head was against Eva's asshole. Jake felt the soft flesh and hunched forward trying to penetrate. Eva's asshole opened for her lover and part of the huge head slid in. The soft flesh felt good to Jake. His cock head swelled as it throbbed.

Eva started to orgasm as her ass opened. She loved anal sex but right now she wanted his seed in her womb. She moved forward allowing the pulsating head to slip out of her ass. At the same time she was thinking, after he breeds me and fills my womb with his seed I want to lay on my back, pull my legs up and watch this beast ass fuck me.

Jake continued to thrust forward trying to find Eva's pussy. She raised her ass to line up her dripping pussy with his thrusting cock. Jake felt the tip of his tennis ball size cock head start to penetrate Eva's pussy. He reached down and took Eva's thick long hair that hung down her back into his mouth. He didn't want her to pull away from him again. He pulled back on her hair as his powerful hind quarters flexed driving his huge cock all the way to her cervix.

Eva moaned loudly as her eyes rolled back. Remembering the woman's scent and the way she looked with her huge breast and gorgeous tanned body Jake began to power fuck her. Eva's swollen breast bounced and swayed to the rhythm of Jake's powerful thrust. Her huge engorged nipples tingled and throbbed. The two lovers fucked each other wildly with no inhibitions.

This union was a new beginning for both Eva and Jake. As the equine drove his huge phallus in and out of her pussy Eva already knew that no man would be able to satisfy her again and Jake would now lust only for the flesh of women. He now thought about the new wife on the ranch and her friends. His intoxicating lust would drive him to take them all. Willingly or by force he would have them.

Jake's back arched as he felt his orgasm start to build. His huge testicles were tight and pulled up next to his body. Eva had never felt such a primal lust. Her orgasm had almost been continuous since Jake's cock head penetrated her. She could tell that her lover was ready to impregnate her. She could feel the head of his dick starting to flare. She wanted his huge cock deep in her belly when he started to ejaculate.

She started pushing back meeting his thrust. Rotating her hips and grinding her pussy against his mammoth sex organ. The stallion was ready to cum. By instinct he shoved his massive sex organ in as deep as he could trying to push the head into the female's womb as his Penis head flared to the size of a large fist to seal off Eva's vaginal canal. She was now tied to the Stallion.

The slit in Jake's cock head was against Eva's cervix. The tendons and muscle attached to his huge testicles contracted violently time after time. Squeezing and milking his swollen, oversized balls, releasing the hot semen that they had been holding.

Eva felt Jake's cock head flare to an enormous size. It set off an orgasm like she had never felt. This incredible orgasm along with the equine sex hormones in her blood stream caused her cervix to open slightly. The tip of the stallion's cock pushed into the opening. This raging beast could now shoot his animal seed directly into Eva's uterus. The stallion's huge veined shaft began to throb and jerk powerfully. With his arm sized member buried in Eva's pussy, the stud continued to push the head forward.

Huge gushes of thick cum sprayed from the giant cock straight into the woman's womb. Eva could feel her belly swelling as the stallion drained his enormous testicles. Hot cum trickled down the inside of her shapely legs. Jake's ejaculation was so strong that cum sprayed out of the woman's over stuffed pussy and splattered on his grapefruit size balls. The slick cum poured into the woman's body lubricating her vaginal canal. This allowed the huge head to penetrate even deeper into her womb.

Jake felt his cock head slip deeper into Eva's cervical opening pushing into her uterus. It felt just like it did when his engorged cock head started to penetrate her tight asshole. The sensation made his dick throb and jerk intensely.

Eva felt this and grinded hard against the studs cock trying to force the head into her womb. Jake pulled the woman back to him by her hair and drove the head past the tight opening. The head slid in.

The stallions thrusting paused. His engorged mushroom head lay in a pool of hot cum in the woman's uterus. Eva's cervix was stretched tight around the inflated shaft just behind the swollen head. The stud's rapid strong contractions subsided. The two lovers were locked. Thick cum oozed from the bloated head. The beasts' huge cock would flex now and then dribbling the last drops of his animal DNA into the female.

Both partners breathing were labored as they waited for the flared cock head to relax and soften. Jake pulled back slightly and felt the tight grip on his engorged flesh. He pulled again and the giant head slipped free. His massive penis slowly slid out of the woman's pussy.

Eva's cervix closed trapping most of the stallions' seed. She could feel her partner pulling out of her. After what seemed an eternity the giant head finally popped out. The huge phallus flopped toward the ground still dripping thick cum from the tip. A huge gush of semen issued out of the females gaping hole and splattered on the ground as more ran down the inside of her legs.

Eva closed her eyes and lay on the towel completely exhausted...
