BEASTIALITY STORIES

I just received an email from Jason with his story about how he discovered his desire to watch women fuck dogs. Jason is very masculine but also a complete gentleman, he is an entrepreneur who has made a small fortune on the internet and through different investments. He has no qualifications or degrees and fought his way to where he is today. He is extremely intelligent and has a high level grasp of many things like IT, construction, automotive, investments, finance to name a few. He is very well toned, not an ounce of fat, his penis is average in size and he has a body to die for. This is his story:

~~~~~

When I was 17 years old, I was horny just about all the time. I jerked off almost every day and sometimes up to 5 times in one day. From my discussions with my friends I found out that this was quite normal as most of them felt and done the same. I had girlfriends on and off, nothing very serious, so I hadn't had sex yet but was eager to do it. One by one my friends lost their virginity and I felt a bit jealous that they had but not about who they lost it to, I had higher standards in women, which is what separated me from them. I have never been the type of guy to give into peer pressure, I didn't smoke, do drugs or anything I didn't want to so when my friends began to pressure me about sex, I wasn't going to just screw anyone to please them.

One Saturday evening while at a friend's house, we were having a small party and all had about two beers when I felt the need to take a leak. Since there were no girls around we didn't bother going inside to relieve ourselves, we just went around the corner. I took out my dick and relieved myself waiting a moment to let the last drop fall before giving it a shake. That's when my friend's Border Collie approached me and sniffed my urine. I don't know why but I didn't put my dick away, I just watched her. She looked up at me and then began to sniff my dick. She gave it a few licks and it was quite enjoyable so I let her continue for about 2 minutes or so until one of my friends called me asking where the hell I had gotten to. I put my now hard dick back in my pants and re-joined the party. I didn't give it any thought after that and life continued as usual.

A few weeks later, our neighbours from across the street asked me to look after their house while they were gone for the weekend. This included looking after and feeding their two Golden Labradors who were a breeding pair. I had done so before and agreed to do so again as this earned me a little extra spending money. On the Sunday before they returned, I decided to go to their house earlier than usual to get away from my family as I wanted some privacy to jerk off, and since the neighbour's house was empty and available, it seemed to be the perfect opportunity. Once inside I decided to tend to my needs first before doing my chores. I took one of my neighbour's porno mags and got myself really hard looking for the picture I would use as inspiration while I jerked off. Eventually it was time to get the job done so I removed my pants, sat down on the sofa and began stroking my dick as I looked at the pictures in the porno mag. I had gotten into a steady rhythm when the two dogs came into the room. I instantly recalled the feeling of my friend's Border Collie licking my dick a few weeks before and thought it would be nice to feel that again. I called the two dogs to me hoping the bitch would lick me and they trotted over immediately. Both went straight for my dick and started licking right away. This time was better than before, I really enjoyed the feeling but felt myself wanting more. I got down on my hands and knees so I could inspect the bitch a little closer. At first the two were so excited that they kept circling me and so I thought nothing would come of it. Then the male dog stopped and started licking my ass, this intrigued the bitch so she did the same. When she stopped to do, she was along my left side with her tail end closest to my head. Her pussy was practically in my face and I was surprised at how big it looked. I hadn't thought about fucking her, I thought a dog's pussy would just be too small for a human but now that seemed

possible. I raised my hand to her rear and touched her pussy. Her tail continued to wag as she turned her head to see what I was doing. Since her response was positive I allowed my finger to slip inside her. I could feel that it needed a bit of lubrication so I took my finger out and put it into my mouth to cover it with saliva. I slid my finger back into her pussy and started exploring her inner cunt. She was standing very still but seemed to be enjoying the attention. I confirmed that her cunt was big enough to accommodate a human penis and this excited me even more. I repositioned myself with my head closer to her rear and gave her pussy a lick, she didn't move and when I stopped to gauge her response she looked back at me and started wagging her tail again. The male dog was now hovering about her pussy as well trying to see what I was doing, he also licked her pussy but I pushed him away as I wanted it to myself for now. I lowered my head again and licked her pussy some more and finally stuck my tongue inside as far as I could. I was so horny at that point I decided I was going to fuck this bitch. I got up on my knees and positioned myself behind her and slowly started pushing my dick into her cunt. It needed more lubrication so I put some saliva on two of my fingers and rubbed in onto her pussy and also inside. Again I placed my dick at her cunt's entrance and slowly slid inside her. She was very tight so I worked my dick in and out slowly without penetrating too deep. Eventually her cunt became very wet, enough for me to push my dick deeper. Finally I had my dick in her all the way and started to hump her which felt more amazing than I had ever imagined sex would. Gradually I increased the pace until I achieved a comfortable fucking rhythm and from that point on it was pure ecstasy. Being the first time I had penetrative sex I only lasted about 7 or 8 minutes before I came inside her. As I came I pushed my dick in as far as I could and stayed there until I felt my dick begin to soften. When I pulled out, the male dog started licking the bitch's pussy and continued to do so even when she moved and turned. She licked my dick which made me convulse as my dick was so sensitive from coming. After that day I went back a few times to re-live that experience, I even fucked that dog while the neighbours were home when I got incredibly horny. Eventually I convinced myself that that was fun but no way for a normal person to behave and so I stopped.

Years went by without any K9 sex until I moved to a small town. I had a few human sexual encounters along the way but often thought about K9 sex. I was about 23 years old, running two small businesses when I received an email from a friend of mine. He wrote in his email that I had to see this video and it was hilarious. The video was of a woman being fucked by a Saint Bernard and it only lasted about 30 seconds. My K9 desires resurfaced and it was on my mind for the next two days. Eventually I found myself with some down time from work and decided to find more videos of women and dogs on the internet. I found quite a few and got myself all worked up watching them. I had a female Ridgeback (Jesse) at home and when I got there I took my pants off in the kitchen and allowed her to sniff, investigate and lick my dick. I knew right away that I wanted to fuck her. I kneeled down and gently grabbed her by her upper hind legs and positioned her pussy in front of my dick. I realised that this could come as a shock to her as things were moving very fast so I decided to stop myself and think it over for a minute or two. I took her to the basement where I got naked and I lay on the rug with her and let her get used to me touching her pussy. She took to it very well and I could see it was very enjoyable for her. Eventually I had my fingers inside her cunt and licked her a few times to lubricate. I positioned myself behind her and slid my dick inside. I pulled myself forward by holding onto her upper hind legs and fucked her for a 5 minutes doggy style. This became a bit uncomfortable after a while as her legs were long and I had to kneel on one leg while I stood on the other so I could raise my cock high enough to fuck her. I was also not able to penetrate completely. So I slid my dick out to try figure something else out. I move around Jesse while I thought it over and she surprised me by turning to position her pussy in front of me again. She was definitely enjoying it. I got her to lie down and rolled her onto her back, I licked her pussy again to make sure she was lubricated enough (or so I told myself) and then I penetrated her cunt in missionary style. This was much better as now I was able to penetrate fully, we continued to fuck like that for another few minutes when I decided to change position again. This time I got her to lay

on her side and I lay down spooning her and fucked her from behind. Jesse turned her head to me and licked my face as I fucked her. Shortly after I came with vengeance and lay there completely spent with my cock still inside her warm cunt as I recovered. I had sex with Jesse a few more times after that and continued searching the net for more.

As time passes I realised that my interest in K9 sex leaned more towards watching a woman get fucked by a dog than me fucking a dog and eventually I stopped fucking Jesse all together. It took another 5 years before I found a woman who enjoys K9 sex when I met Gina, my beautiful girlfriend.
