BEASTIALITY STORIES

People that dont know me. let me tell you about my dogs. I have a 4yr. old St. Bernard,3 yr. old lab, and a 3yr. old akita mix.They are absolute fucking machines. I have been into dog sex for 10yrs and my girl, only about a year. She doesnt know that I been getting fucked by dogs that long. She thinks it started when I tied her to a weight bench one night and she thought I was going to give her a good fucking from behind but I brought in my St. Bernard and let him take her. since that time, we have sex with all 3 dogs at least once a week.

My St. Bernard tied with her the first time and she has loved it ever since.My girl is a total slut when it comes to sex and if she doesnt get filled up when she wants it, she will do what it takes to get it. We turned her sis into a dog fucker also. Anyway, the 3 of us were hanging out one afternoon cooking out and doing some drinking when it started to pour down rain, so we took the food and the dogs and went inside to our sunroom to wait for it to quit raining. Well it was past dark and still raining and these to girls were getting pretty buzzed from drinking. They were still in their bikini's from laying out by the pool earlier and i noticed my girls sister staring at the dogs. Now she has taken the akita only one other time when she was over. That is when she lost her dog sex virginity and hasn;t had dog cock since. I motioned to my girl to watch her sis not sure what she was doin. I thought maybe she was getting to buzzed from all the drinking cause she would make quick little swipes with her hand between her legs. I got up and whispered to my girl to meet me in the kitchen. As I was fixing a drink, I was looking into the sunroom and noticed her sis rubbing her pussy a little harder now. I yelled in to ask her sis if she wanted a drink. Yes she did. I made the drink stronger than normal to see if we could get her with the dogs again since they were catching the aroma of her sex from her rubbing.

The dogs were fixed on her but didn't move on her. They are trained only to me and my girl and won't start anything unless one of us tell them it's ok. When I went through the kitchen door her sis moved her hand from her crotch thinking no one seen her. When I handed her the drink I noticed why the dogs were curious.

She had a wet spot between her legs that was soaked through her thong bikini. Iwent back to the kitchen to tell my girl about what I seen and told her to go in there and get her horned up by talking about the last time she done it with our dog and see if we could get her going again. We both walked back to the sunroom and my girl sat on the couch near her sis. I told them I had some cleaning up to do and left the room only to go to the bedroom where I could watch and see what would transpire. I couldn't hear what they were saying, but after about ten minutes I seen my girl motion to our lab. He got up and walked up to them. I couldn't see what was goin on because of the back of the couch blocking me, but after around 15 minutes I could see her head leaning back on the couch and started to hear moaning. I knew what was happening when my girl had our St. Bernard come over to them. The moaning started getting louder now and I had to see what was going on.

I walked out of the bedroom quietly when I heard her sis saying she was cumming. I walked towards the back of the couch and seen that both dogs were giving her pussy a licking she wouldn't soon forget. I stayed back where her sis couldn't tell I was in the room and watched the dogs make her come 3 more times. Both dogs were lapping away and shoving their tongues deep in her pussy. I knew then that her sis was going to get fucked like a bitch in heat. I snuck out of the room and got my camcorder and tripod and went back towards the sunroom, set it up so her sis couldn't see it. By this time you could see the cocks of the 2 dogs protruding from their sheaths. Her sis was going nuts. I decided to go into the sunroom and when I walked around the couch, you could see that her sis had cum so hard that she had squirted cum on the dogs heads.

They were even licking it off one another while the other had his tongue buried deep in her pussy. When her sis seen me she started to close up her legs but the dogs had other plans for their bitch. I looked at her and said not to be shy, my girl lets them lick her till she cums to the point that she cant

stop cumming. That is when my girl reached over and started spreading her legs back open and assured her it would be ok. I told her sis that if she wants it to feel even better, to lay down on the floor on her back and spread her legs. She got up from the couch and couldn't hardly stand from the assault the dogs tongues had on and in her pussy. As she lay down on some blankets on the floor my St. Bernard was getting really horny. He went back to work on her pussy while my girl got our akita that had been watching the other 2 dogs tear her sis's pussy up, and positioned him over her face and told her to look at the size of his cock.

My girl reached down under the belly of the akita and grabbed his cock and he started bucking in her hand and started leaking precum. That is when my girl bent down and took some of his cock in her mouth. She let the precum leak from her mouth down onto her sis's face then moved her head and told her sis to taste him. She was hesitant at first but then my girl put his cock in her mouth again and let the precum build up in her mouth then gave her sis a kiss and let the cum run into her sis's mouth and down the sides of her face, then asked her sis if it tasted ok. Her sis lifted her head and looked at her and said neither of us better tell anyone about this. My girl got a pillow and put under her sis's head and her sis lifted her head and took the cock in her mouth. She must have liked the taste because she was going to town on that cock like she would never have a cock in her mouth again. The dog started bucking his hips fucking her mouth with so much speed that I was surprised that she was able to keep it in her mouth.

You could see the precum leaking out of her mouth and down her face. All the while the St. Bernard was having the time of his life licking out all the cum that was spewing from her pussy. Her sis was having a hard time now with the cock in her mouth. The dogs knot was growing and he was banging it against her lips and you could hear her starting to gag. That is when I told my girl to pull the dog from her mouth before he cums cause I had more plans for her sis. I got ahold of the St. Bernard and pulled him out of her pussy. Her sis started screaming not to make them stop. There was a puddle of her cum all over the blanket and my St. Bernard's face was soaked. That is when I took her sis by the arms and lifted her up, she could hardly walk.

I took her over to the weight bench and told my girl to go get our hand cuffs. I cuffed her on her belly over the bench and her sis was too far horny to even resist. I asked her if she was ready to be bred. She looked at me like she really thought she could get pregnant so I told her that each dog was going to breed their bitch. She started to look nervous but it was too late. The akita she sucked off was the first to take her. He came up behind her and smelled her pussy and gave it a few licks then jumped on her and mounted her.

Her sis was begging to get fucked, screaming for the dog to fuck her. He jabbed at her a few times missing his mark and hitting her in the ass when he must have felt the heat of her pussy cause he slammed all 8 inches in her and she let out a gasp and her eyes grew big from the hard thrust. I had my cock in my hand watching this dog fuck his bitch with every inch of his cock. She was trying to talk but nothing came out as words, just mumbo, jumbo and loud moans of sheer bliss. The dog was giving her a rough animal pounding and his precum was flying everywhere and her cum was literally squirting from her pussy. I looked at my girl with a smile and seen she had her fist shoved in her pussy to her wrist while the lab was licking everything that was leaking from her. I looked back to her sister when she yelled, what is that. I looked at her pussy and seen that the akita's knot was swelling and banging against her clit. I told her to relax and now she was going to feel what it was like to be bred. The dog made one hard thrust and buried his know in her.

She had to have 11 inches of cock in her along with a knot the size of a hardball. The dog slowed his pace making short thrusts and getting ready to impregnate his bitch. I look back at my girl and she was now on her hands and knees with her face next to her sis's. The lab went behind her and licked her pussy then climbed up and mounted my girl. My girl has fucked our lab many times and the dog

hit his spot the first thrust. Everytime she gets mounted she says it always better than the last. Now our lab is probably the smallest when it comes to length but he is huge in girth. I have a hard time getting his cock in my ass and cant tie with him because of his girth. he started slamming in her with pure animal lust and was actually moving her closer to her sis.

That is when something happened that I never seen with my girl. She opened her mouth and started french kissing her sis and her sis started kissing her back. They were making out hot and heavy when her sis started screaming from another orgasm and said his cock was filling her with his seed. My girl was taking a pounding so I bent down to watch him slam his knot in her when all the sudden my st.bernard came up behind me and pushed me forward onto my hands and knees. Now he weighs 200lbs to my 175lbs and he is very powerfull.

I tried to get him off of me but when he decides he is gonna breed a bitch, there is no stopping him. Now he has decided that I am going to be his bitch. As I tried one more time to get him off of me he had his mind made up and clamped his jaws onto the back of my neck to tell me that I was going to take it like a bitch and I was going to be bred wether I wanted it or not. I watched my girl get the labs knot slammed into her and watched as she continued with having non stop orgasms which by now the blanket was soaked. Her sis was still getting filled to the max by the akita and he was now securly tied with his bitch. With the back of my neck still in my St. Bernards jaw he found his mark and shoved his cock into my ass with reckless abandon.

His precum had my ass so lubed that all 11 inches were in me and I could feel it in my belly. He was moving me across the floor, he was slamming in me harder than he ever has. I watched my girl getting impregnated by our lab as cum was running down her leg and he was pumping her so full that she said her belly was swelling and his cock was buried in her cervix. My girls sis had been fucked like she has never been and the akitas cock shrunk and made a plop when he pull it out and cum flew everywhere. I was taking a pounding in my ass when I felt the St. Bernards knot swelling and banging against my ass. I wanted to cum so bad that I yelled that. and with cum still running out of my girls sisters pussy she managed to slide under me in a 69 position and took my cock in her mouth and started sucking my cock and licking all the pre cum that was leaking out of my ass.

I had never even so much as kissed another woman since I been with my girl, and here was her sis sucking my cock and wanting me to pump my cum down her throat She was also watching my ass take a monster cock deep. My St. Bernard tightend his grip on my waist and shoved his knot in my ass. I thought he was gonna rip me apart and I tried to move forward but he grabbed me by the neck again and clamped down saying, take it bitch. My girl was knotted up taking buckets of cum from the lab when she realized her sis was under me sucking me off. But instead of getting mad, she lowered her head to her sisters pussy and started licking her pussy while she was getting the labs seed in her.

By now the St. Bernard had slowed his assault on my ass and his know grew in my ass to the size of a grapefruit. He was locked in me and we wernt going anywhere for awhile. I could feel him dumping his cum in me. He had to have pumped over a pint of cum in me. I was now filling my girls sisters mouth with my cum so I leaned down and moved my girls face from her pussy and buried my tongue in her pussy and started eating her pussy till she started to cum again. The lab in my girls pussy climbed higher on her and yanked his cock out of her. Then my girl turned around on all fours and shoved her pussy in my face and told me if I could eat her sisters pussy, then I had to eat hers too.

The St. Bernards cock started shrinking and he turned ass to ass with me and gace it a pull. Out it came withh all the cum and my girls sister rolled me on my back and pushed my knees to my chest and started shoving her tongur in my ass ans sucking all the dog cum from me. My girl climbed on

me and sat on my face and had me take all the dog cum that was in her.

I licked her to a couple more orgasms and her sister fucked my ass with her tongue till my cock got hard again and both of them sucked my cock till I was ready to cum, then my girls sister got up and climbed on my cock and started riding me while my girl sat on my face. I looked up and seen them kissing each other until I shot my load up my girls sisters pussy. When I was done they both cleaned my cocl like nice doggies would do.

C ya!!!!!!!
