## BEASTIALITY STORIES

## Chapter One

Teri was very excited and the closer she got to the farm the hornier she got. Just the thought of all those female dogs so willing to lick her into a orgasm after orgasm was making her panties wet with her hot juices. 3 whole days and 2 nights of house sitting and feeding her friends breeder dogs was something she deamed about since her last visit a year ago. That was when (by accident) a female greatdane found her bent over in a short skirt and no panties on. The feel of that tounge was like nothing she had ever felt before. She had let her lick for a few minutes but being afraid of being seen she stopped it. So in the year since she has dreamed and fantacized until she couldnt stand it. The fact that she has not had a boyfriend for a few years and she to very buisy to date only has built up her eager frustrations to relieve her desire.

Finally pulling into the front gait and driving up the long winding driveway to the house, she was once again taken aback at how secluded and beautiful this place is. A old farm house and barn (turned into a kennel). A pond for swimming, lots of pasture land and trees full and thick wich is what hid this farm from the world. She could hear the dogs barking in the kennel and smiled to herself. Jumping out of the car and into her best friend Amy's arms and then turning and placing a big kiss on Amy's husband Eric's cheek while pinching his round muscular butt which always made him blush, and sending Amy into hysterics. The three of them walked to the house while the 2 girls got cought up on life. Eric then interupted and said that they really needed to get going to make the train in time so the went over what Teri needed to do with the dogs, The really pressed the point of keeping the females away from the males. The male dogs were theirs but the females belonged to others only here to be bread to a specific male.

Then before she knew it they were gone and she was staring down the driveway smiling as the dust drifted away. Walking slowly to the kennels she started stripping her cloths of and once free of them she broke out into a run. Opening up the barn door she entered the kennel. The smell of dog drove her crazy as she walked down one side. She noticed each kennel housed 1 to 5 females in it and spotting 4 beautiful St bernards she unlatched the gait and went inside locking the gait behind her. On of the females waisted no time and was sniffing this new person that was sending off a smell that made her sniff and prod between Teri's legs. Pleased Teri leaned against the gate and spread her legs apart just enough for her to ease her nose close to her feverish folds.

The females breath was so erotic and Teri was enjoying theese new sensations. Then came the first touch of a tounge. It sent shivers through her body. Looking around she saw a matt over in a corner and went over and laid down. By this time all the females was interested in her. Spredding her legs apart a female emediatly started serching her folds with her tounge. Another female was licking her neck and Teri reached down and brought the big face up to hers.

Opening her mouth the dog stuck her tounge in eagerly giving Teri a kiss like she never has had. She started bucking against the tounge that was diving deeply into her when another tounge found her nipples sending her into a orgasm like no other. Screaming out and spreading her legs as far apart as possible and raising her hips off the ground to give her better acsess. The tongue slipping in and out reaching farther in than she could ever dream. then just as if she got tired of the licking the female stopped. Teri mouned a no when another took her place.

A fresh wet tongue slowly licked her anus which sent a shock through her. then ever so gently the tongue slipped into her neither reigon. Shocked she was about to stop her but the feeling was to good to stop, so she let it go on. The tongue slid deeper and deeper as her anus muscles relaxed against the tongue. She felt herself cum with a force like never before, the female quickly changed

from the anal to lick up the fluid that was squirting out of Teri. Shocked she had heard that women can squirt she had never done it herself before. But now here she laid with her fluids all over the female's face and the tongue now searching for more deep within her. Another female was whimpering wanting some of the action to, when Teri got a tail in her face. The female was licking Teri's fluids off of the others face and trying to get her tongue down to her folds. Interested in the bottom of this female Teri lifted the tail, the female looked around at her (almost as if smiling) giving her ok. Teri gently touched the vagina lips and the female moaned and pushed back. Teri felt a moistness and looked at her finger. The female was in full heat and wanted mated and Teri was sent into another orgasm at the thought.

Slowly she inserted a finger feeling the tightness and wetness. Then in went another then another. Slowly she pumped her fingers in and out then started to match the rhythm of the tongue that was entering her own vagina. Before she realized what she was doing she reached up and brought the wet vagina down to her mouth. The taste was sweet with a musky flavor. Holding her down with one hand she reached down with the other and started to stroke the nub above her tongue filled pussy. The big female was almost sitting stryng to get more of Teri's tongue to enter and breed her.

Teri reached back up to her mouth and wetted her fingers with the bitches juices and was smearing her body with the smell of their love making. After wetting her fingers over and over again her body was covered in the sweet muskiness the female found her g-spot and Teri squirted and came with a total body spasm. Spent and totally satisfied she wiggled out from under the dogs and gave them each a bowl of food. She fed the other females and decided she would take a nap before tending the males. Curled up on a couch that was there for when clients came she slept still totally naked and with a smile on her face.

~~~~~

## **Chapter Two**

Teri woke still wearing a smile and feeling warm and giddy all over thinking of her next session with the females. But first she had to take care of the males. So going up to the house where they were kept she entered the fenced area in the back of the house and bent over to pick up the bowls lined up against the back porch. Taking them up the stairs she opened the door to the food bin, she filled each and took a few at a time down and lined them back up. She then filled the water bowls and headed to the back door to let them out to eat and do their duty. They went flying past her (the door being between them and her) down to their bowls and the food was gone with a few gulps. They started running and playing a couple marking their territory.

Teri headed down with the pooper scooper to clean up the inevitable messes when a large Sheppard caught smell of her. Then another large Dane caught a whiff and before she knew what was happening she had 7 males poking and prodding her, pushing her back against the stairs she tripped and landed on her butt arms behind her to ease the fall. The Sheppard wasted no time and stuck his nose in her crotch, while another was sniffing her face. There seemed to be a pecking order because the 5 others sat there close but not within reach. That's when Teri realized what was happening. She saw the pink cocks peeking out of the 5 sitting dogs and she started to lick themselves into a frenzy, humping each other trying to gain any access they can. Scared Teri tried to ease up the stairs but the Huge Dane had her pinned. Her only thought was to get inside so without thinking she rolled over to try to crawl up to the door. The Sheppard irritated at first when his probing tongue was torn away from her folds he then found her butt right in front of him. He instantly jumped up and had her thighs in a firm grasp as he humped trying to find the wetness his cock so desired.

Teri screamed in horror and found the Danes cock right in front of her. He stepped over her head

and was humping her forehead as he got hold of her shoulders with his front legs. Screaming and not knowing what to do she kept her head down so he couldn't find her mouth. That was when the Sheppard finally found his mark. With a force and what felt like all his strength he rammed into her folds. Once he felt the tight wet vagina around his cock he pushed and pushed. Against Teri's will she started to push back against him, his cock growing to a thick large rod. Not knowing how much more of him she could take she started to feel something large pushing to gain entrance. Oh no she screamed when she realized it was the knot that tied the males to the females. She didn't know if dogs can get tied to humans and she wasn't sure she wanted to know.

With a strong thrust he pushed his knot deep into her. Screaming now in a orgasm and forgetting about the Dane humping her head she threw her head up just as he pushed forward and his massive cock slid right into her open mouth and down her throat. Gagging at the sheer size both in length and width as he feverishly pumped his pre-cum down her throat. The feel of the knot and cock in her pussy was growing so much she thought she was going to bust, but the orgasm that hit her from it rubbing against her g-spot was sending electric shocks through her so she thought that if she was to bust apart at least she was going to do it having the most erotic sex ever. The fear leaving her she started to relax and that's about when the shepherd turned and was standing butt to butt with her. Still in a deep orgasm she could feel him squirting load after load of his hot cum into her. She also relaxed her mouth a bit and found that the Danes cock actually had a interesting taste. She pushed him back enough to where she could run her tongue around the tip then up and down his shaft. Wow she thought he had to be a good 12 inches tip to knot, and his knot was the size of a grapefruit. So add another 3- 4 inches and that was more than she could imagine ever having in her.

Meanwhile his pre-cum was dripping down her face from all the head humping he had given her and one of the other males had made his way in to happily start licking it up. The feel of his tongue sent a new shiver through her and she started rocking back onto the shepherd trying to get him to start humping again. She sucked in the Danes cock and put her hand around his knot and he let out a moan and shoved trying to push it into her mouth and shooting his hot juices down her throat. The shepherd 's knot popped out with a little pain and the dog licking her face was quickly down there to clean her up. It felt like there was 2 tongues licking her but she was to far gone to think. All she knew was she wanted this Dane in her so she pulled her head back still holding his cock she slowly guided his humping wet shaft down her side. He finally got the idea of where she was moving him and he gladly obliged. Grabbing her hips with his front legs he was in her in one thrust. She screamed from the size and forced herself to relax. Rocking back onto him wanting him all the way in. Then she felt the knot. He was already so far in her that she could see her stomach move with each thrust. He was wiggling and pushing trying to get his knot in and she could feel her vagina almost ripping as it stretched little by little until he finally was in her. With a mad pace he was humping her deeper and deeper.

The she felt something else, the tip of his cock had penetrated her uterus and was stretching it trying to get in the pain was searing but at the same time she felt almost giddy at the thought of him putting his seed in her. Then with a hard thrust he came. The hot cum filling her uterus beyond capacity. The Dane stayed on top of her instead of turning like most male do. He was licking her neck and she was still rocking back on him enjoying the feel of his large knot rubbing her insides.

Another dog had come around to her face and gave her a careful lick while eyeing the Dane (as if getting his ok before going on). And before she knew what she was doing she reached out and grabbed his hanging cock. Gently she examined it never really seeing a dog cock up this close before. It was shiny with veins running here and there. Had a funny tip to it that was also dripping with pre-cum. She pushed the skin that covered it back until his knot was exposed and that is when she found out that there was even more of the cock beyond that. Wow she thought no wonder it feels like the Danes cock is about to hit her ribs. She reached under her and found the balls of the Dane

and gently caressed them. He was moaning she reached up a little and found the back part of his cock and rubbed a finger up it until she was stopped by her pussy wow a good 2 inches she pulled her body until she could feel his knot against her vagina and ran her finger down again. Gee she thought 4 inches. The Dane was slowly gaining interest again from her fingering and was pushing back into her again when the dog in front of her whined from being forgot about. Smiling she reached back for his cock and guided him closer to her face. He lifted a leg like he was going to take a pee. She got a hold of behind his knot and he went crazy humping the air. She caught the fast moving cock with her mouth which took some doing and he was unloading his juices with such a force she gagged. The cum was so hot and there was so much that it was running down her face, down her throat and onto her breasts. He seemed to be satisfied and went to clean himself when another one took his place.

She was in another orgasm from the Danes humping she gladly grabbed the next cock that seemed to come out of nowhere, and was sucking it with the same rhythm of the Danes thrusts. She reached up and grabbed this dogs knot as he was locking his front legs around her shoulders. She was being thrust at from both directions and felt like she was going to snap like a twig. The cock in her mouth was not a very large one so she took her hand off of the knot and used both hands to steady herself from the onslaught. The knot slid into her mouth and she tightened her lips behind it being careful not to hit it with her teeth. Then he came this time she was ready and took it all. Letting the hot fluids hit the back of her throat and then swallowing. The Dane must have finally gained total access to her uterus because she could hear him moan as her cervix tightened around the tip of his cock. His body was shaking from a orgasm and she was still so deep into one that she wouldn't care what happened next. The Dane came again with huge spurts each one sending Teri deeper and deeper into another reality. Her stomach was so tightly filled with sperm that she looked like she was pregnant. Then with one final thrust he was spent. Gasping for air her turned butt to butt and tried to lay down.

Another dog was eagerly waiting his turn but Teri was too tired to move and found another cock in her mouth. Trying to push him away she felt a tongue licking her anus. The feel sent a shiver through her which excited the dog of the cock that was in her mouth. The tongue was pushing its way deeper into her. She thought at least she was still tied to the Dane so she could get some rest before the others get their shot at her. But before that though was processed she felt a pair of legs locking onto her thighs. Oh no she yelled just as a cock found her exposed anus. The pain was like nothing she had ever felt before. And he was pushing trying to get his knot into her. With the Danes knot still large there wasn't very much room for another but she felt it slide into her with a stab of burning pain. He then was pumping at a dogs fast pace which was getting the Danes cock growing once more. Oh no she thought then a cock found her mouth again. She reached up to catch the knot before it could gain its entrance. When he dog yelped. Another male was not able to wait his turn and he jumped on the dog that had his cock in my mouth and was ramming his rod deep into him. The thought of that turned me on so much that I forgot how tired I was, and forgetting the pain, I started ramming myself back onto the 2 cocks behind me, then forward onto the one in my mouth. My moaning was sending shivers through the cock in my mouth and forgetting to keep hold of the knot she reached up behind him to feel the cock that was fully tied into him. She rubbed both sets of balls together when the dog on top filled her anus full of his fluids. She didn't want this to end so she kept on rocking back onto them both and draining them both of everything they had. The cock in her mouth unloaded his cum and she knew that at that moment he was being filled himself by another male. The male behind him turned himself around and they both lay down to wait for his knot to go down. There was one more dog pacing back and forth and already sporting one huge red cock that was almost dragging the ground. This dog was a Akita big and beautiful. He was considered a pup still but you'd never know it by his size. His cock was not as thick as the Danes but did look quite a bit longer. She tried to get him to come closer but he stayed his distance, knowing that he was the

newest to the pack. The dog in her anus finally popped out with a bit of pain and a lot of cum and he turned to clean her up before going to work on himself. After what seemed to be forever (and a little nap) the Dane finally slid out of her. He turned to clean her up as she slept and the feel of his tongue darting deep into her woke her up with a start. Her pussy was stretched and soar but his tongue eased it a bit. He then went over and laid down to clean himself. The shepherd went over and laid next to him and was licking the Dane clean. The sight was almost to much for Teri to bear. Then she spotted the poor Akita over in a corner eying her. She got up (with wobbly legs) and went over to him. His tail thumping on the soft grass she sat down in front of him.

Scratching him behind his ears and talking gently to him she noticed a pink tip slowly inch it way out . Looking back at the 2 males so engrossed in each other she spread her legs apart so the Akita could smell her cum drenched pussy. He slowly sniffed her then took a taste. Well that was all it took he was up on all fours and rooting his nose down to get better access.

She then laid back and spread wide for him, his tongue digging ever deeper into her. His tongue curled and twisted in her as he tried to get at all the rich tasting fluids deep in her. His tongue found her g-spot and she shivered and moaned. He seemed to sense that she like this because he teased and rubbed her g-spot until she was pushing her lower half up and bucking up onto his tongue. She had to have him in her but she wanted to be on her back. She looked around and saw a lawn chair close by. She eased herself up onto it While the Akita tried not to lose what his tongue had found. She sat up and reached under him to find his long slender cock waiting. She reached a little farther and found his knot. Taking hold of it he started to hump the air. She whispered in his ear good boy come take me big boy. And she guided his cock to her hot waiting pussy. At first he didn't know what to do because of the position she was in but once his cock was imbedded in her swollen pussy nature took over and he was quickly pushing deeper and deeper. She wrapped her legs around his sleek body and met each thrust with her own the she felt it his knot pushing its way into her. He was pushing and she was bucking but it almost seemed to big. Then with a sharp tearing pain he made it in. She could feel that his knot was much larger than the Danes and it was growing even larger now that it was planted tightly in her. The tip of his cock found the opening of her uterus and slid in. Since his cock was much thinner than the Danes his cock was able to slide in and out (not just the tip) This was a feeling that sent wave after wave through her. She reached up and got hold of his face and lowered it down to hers. She kissed his nose and he licked hers in response. Then his tongue slid into her mouth giving her a kiss that told her that she was his bitch now. Twisting tongues together she bucked up on him pushing him ever deeper into her uterus. Throwing her head back she yelled oh please give me your babies. I want your seed deep in me.

He seemed to smile down at her then bent down and nibbled her ear. She yelled out in ecstasy as he licked his tongue around her ear. Oh please she yelled I need it so bad please. He kept up his crazed pumping and teasing her with his tongue. Then finally his shaft grew in size even more stretching her cervix to its max then he filled her uterus full of his puppy making sperm. Wave after wave went into her much more that 2-3 dog putt together can do. There seemed to be a endless supply. And with her uterus already full from the Dane she looked like she was due to have a baby any day now. Finally the Akita collapsed on top of her but she held on to his collar so he would stay in this position and not turn. She relished the intimacy this gave them. She felt a love like never before. As if knowing what she was feeling he reached down and gave her a long deep kiss. They lay like that for a very long time then he finally slid out of her and with a moan he stood up and went to clean her off before going to clean himself. She went up to the house to take a shower and go to bed and the Akita insisted on following her. Knowing that they spent a lot of time indoors she knew it would be ok so she let him in but made sure the door was shut and locked after him the others will have to stay out for the night.

~~~~~

## Chapter Three

Teri stood feeling the hot water running down her body and wondering how she could have let this happen to her. Getting licked was one thing but to let those males have her the way they did was humiliating. Expecially enjoying it the way she did. She acted like a whore taking on 7 guys (dogs) the way she did. But the worst thing is that if she wasn't so sore she probaly would have another go round with a couple of them. But she was exhausted and still had to go excersize the females before bedtime. So dragging herself out of the shower and drying off, she opted to leave her cloths off to save time and went out to let out the girls.

Opening the barn door she hit the button that opened the electric doggie doors to each kennel out into a long fenced dog run for each. She strolled back to see what the girls that she played around with were up to and found them romping and running. She laughed at their antics and let herself into their kennel. One of the females came up to her and nuzzled her crotch and laughing Teri laid on the cusion and let the girl ease some of the soreness Teri was having in her crotch. Another girl came to see what was happening and caught the scent of the males still deep within Teri's womb and started to rub her pussy all over Teri trying to get some releif from her natural female need for mating. Then it hit Teri why the males acted the way they did. She had these bitches scent of being in full heat all over her when she fed the males. How could she had been so stupid she thought. Well this time she will go in a different way.

Her attention went back to the females and she guided the plump moist pussy (that was rubbing her close to her face now) to her mouth hoping to ease some of her suffering. First licking the outer edges and then taking one finger and inserting it the female pushed back as if she was trying to get as much in as possible. Teri felt the soft fleshy interior and felt a tremble go through her body as her excitement mounted. She then slid in another finger and slowly pushing in and out she watched as the female pushed back and for in rythem of her fingers. Feeling the tongue digging deep up inside her and the tip of it trying to get in to her cervix to get at the males sperm sent her into oblivion.

Breathing hard and moaning she spread open the pussy and inserted her tongue. Relishing the silky softness she left one finger in and pushed it as far in as she could. Then she darted her tongue in and out in fast motion imitating a male's fast humping. The female was moaning in a way Keri never heard before as she pushed her body back as much as possible to get more of Teri's tongue into her, almost sitting totally on Teri's face. Teri then withdrew her finger and wrapped her mouth fully around the swollen pussy and with her tongue still going in and out she suckled using her lips to massage the sweet tasting mound. She almost laughed when the both came with shudders. Teri then got the 2 females to trade places and set off to releive the 2 girl.

Before Teri moved the 2nd pussy to her mouth she cougth sight of 2 ropes with a loop hanging on the wall right behind her head. Not to sure what they were for but knowing what she was going to do. Sliding a foot into each to where she was totally wide open and more acessable. Then she went to work with 2 fingers. She could feel the tongue deep in her then it slid into her uterus sending her into a orgasm again. Feeling it slide in and out was so glorious that she didn't hear the noise coming from the driveway. She slid a finger out and was sliding her tongue in and out of the wet pussy when the dogs all started barking. Jumping up she heard a car door shut. She ran out of the kennel latching the door behind her and peeked out the barn door. Out side was a old beat up pickup truck and a heavysset man in coveralls holding the leash of a Doberman. Neither looked to nice. Teri yelled out to see what he wanted. He smiled and headed her way. She had totally forgotten she was naked but still not knowing him was not wanting him to see her. Yelling out again she told him to stop where he was and tell her what he wanted. Smiling he said he had the male that he promised and needed him trained sooner than first thought. His friend will be home in a week and he wanted him ready before he got there. Teri then said she was here only to feed the dogs and he would have to

call back during business hours. The smile on his face took on a eerie look and he was slowly working his way to the barn door.

Come on deerie he slurred I'm sure you could start his training for me Frankie here likes da gal's just as much as da men. Teri told him to leave or she would have to call the cops. Then with a laugh he said that by da time da shareef arrived Frankie will be good and knotted and she probaly wouldn't want to be seen like dat now would she. Yelling she ran for the office in the back but the dobbie was on her in a flash, and smelling the females on her he was trying to hump her even before the man made it inside. He stood there smiling and said well well at least your dressed right for him eh. Teri tried to get away but the Frankie was all legs and fangs. Then to before she knew it the man had ahold of her hair and forced her on her knees. He said I paid good for this training and by golly I'z gonna get it. Now tell me how did you get him so horny. Teri blushed then whispered the females are in heat. Eh which ones I may go get them to rub on me so we both can feel Frankie in us. Oh heck whit dat you perty nough the 3 of us will have nough fun.

He pushed Teri as he grabbed a collar that was hanging on the wall by one of the kennels. Teri fell on all fours and he fastened the collar around her neck and attached one of the short chains that was hanging off of Frankie's long leash. Frankie was still frantically trying to hump Teri but the man kept him away from Teri's rear end. He then undid the buckles to the bib of his overalls and they fell down to his ankles. To Teri's horror he was standing there wearing no underwear, and his belly hanging down almost covering his fat shriveled up cock. He laughed and asked if she liked what she saw not waiting for a answer he pushed her over onto her back and kneeled over her head and placed his hands on each side of her hips in the classic sixty-nine position. He then pulled the leash to get Frankie up behind him and told Teri to guide the cock into him. Frankie was humping the air and was more than happy to lock his front legs onto the mans hips.

Teri refused to help and the man lowered his butt down placing his full weight onto her face and smothering her. Then lifted back up and told her to do what he said or else. Choking and gasping for air she reached one hand up between his fat legs and caught hold of Frankie's jabbing cock. She told the man that she couldn't see where the hole is and he said find it with yer odder hand. She reached up and felt his large balls hanging inches from her head. She thought she was going to throw up but felt upwards until she found a large gaping hole. He quickly pushed his butt back and her hand almost slid into him. He laughed and said get da cock in me or yer fist cause I is real horny. So Teri guided the cock to his waiting hole. Frankie glad to finally ease his frantic search started to push him self deeply in. The man then Told Teri to help him get the knot in, But Frankie was managing that on his own The knot slid in and the man was rocking back and forth and moaning loudly. With each rocking motion his balls bounced inches from her. The man then lowered himself those couple inches until he felt his balls slapping her face. Suck them he said. Teri couldn't bring herself to touch him and he threatened her again. Sick to her stomach she reached up feeling the hairy balls. Slowly taking her tongue she licked one of them then the other. He yelled out in pleasure and told her to quit teasin' and suck on them. She slid one into her mouth and rubbed her tongue around it. Looking up at Frankie's balls slapping the top of her head she caught sight of the back side of the cock going in and out of the mans rear. She felt a twinge of excitement watching Frankie mate him that she reached up with her other hand to feel him sliding in and out. This obviously excited the man and his balls hardened then she felt his cock hardening against her chin.

The man told her to take his cock into her mouth. She did as told but his ball now blocked her view and she moaned in vain but the man thought she was enjoying his cock and started to hump her mouth. He told her to wrap her legs under his arms to open herself to him. She did and then felt a finger enter her anus. Then 2 then 3 and 4. The pain was horrible and she yelled out. He still thought she was enjoying him and spitting to help in lubing her up he then had all 5 fingers in her. She yelled out once more then went limp. Smiling he thought that even passed out she can be of some fun.

Spitting some more he slid his hand in loving the feel of her tight muscles. He was still humping her mouth even though she was not locking her lips on him. Then he felt her tighten up and knew she was coming around. He told her to relax and the pain will slowly ease, so she tried. His cock was surprisingly fat and she could barely stretch her mouth around it. He was moaning extra loud now and said Yes Frankie load me full boy, good boy. Frankie then turned to face butt to butt but his knot slid right out of the loose anus and with out with it came his sperm mixed with the mans feces. Teri choked and gagged as it flowed down the mans balls and onto her face. The smell finally did it and she threw up trying to pull the cock out of her mouth to turn her head he laughed and told her to take it. So her vomit squirted out between her lips and his cock and down her neck to mingle with the foul smelling sperm.

This really got him and he started to pump her mouth with quick thrusts and now moaning and panting. Frankie was trying to clean them up when the man stopped suddenly and pulled out his rod and told her to get on all fours. She did glad to get her head away from his rear. He quickly mounted her and was sliding his fat cock deeply into her anus. Frankie was cleaning her face up and the feeling was sending shockwave after shockwave through her. The man told her to suck on Frankie's cock. Teri pulled him up to get hold of him and smelled the foul smell still dripping off of Frankie. Shaking her head the man told her to take it so she did gagging and throwing up once more. The man laughed and rammed her hard. Teri slowly cleaned and spit out the mess then started to suck reaching one hand up to grab his knot. This got Frankie going again and he was humping Teri's mouth wanting to sink in his knot. The man was telling her to take it all over and over and pumping in and out of her she then felt him unload in her. He moaned and told her how tight she was and she could feel him shrink in size feeling a sense of relief that maybe this will end now, when Frankie's cum started to run down her throat. Swallowing down as much as possible she felt the man pumping in her once again as he told her to drink it up. Obviously it turned him on so she pulled her head back and Frankie's cum squirted her face, drenching her fully. Frankie wanted to clean it up but the man told him to lay down and he did. Bending down he covered her body with his. The weight made her arms give out and she landed on her stomach with a thud. He was still pumping in and out of her and she could feel him getting even larger than before. Then she felt his tongue on her cheek as he started to clean off the sperm. His breath was sour as he slobbered and lapped up all he could. He was muttering something about her smelling so good, and then he yelled out. He pulled himself out of her just as his sperm released sending it up her back in stream after stream. He then took his cock and rubbed it around on her back spreading the sperm with it. He was still moaning with pleasure using his spent cock and now his balls to smearing sperm everywhere. Then she felt some hot liquid being poured out onto her back and realized what it was. He was peeing on her. His moaning was sickening her then he lay on top of her rubbing himself into the mess on her back. He moaned and squirmed and she could feel his cock hardening once more.

He rammed his hardening rod into her anus once more as his weight on her back was knocking the air out of her. He lifted himself slightly and she could feel his hanging belly rubbing in the goo on her back. By this time her rear was so numb that the pain was gone and she was feeling his cock sliding in and out sending shivers through her. He was still moaning asking her if she liked the feel of it. She couldn't stop herself as she pushed back onto him trying to get all of him in to her. He pulled her small hips hard up onto him and pushed with all his might. Teri let out a moan and tried to raise her butt up even higher. He raised himself back up into a kneeling position grabbed her hips once more and rammed her fully engulfing himself into her. He moaned and said any farther and his balls will go in too. She was now moaning along with him loving the feel of the fat cock in her. She only wished that it was longer but right now in the midst of her orgasm she didn't care. She knew he was ready to cum once more and wanted it in her not on her this time and told him so. Laughing and moaning he obliged her and shot his load into her spasming rear. Her whole body was spasming as he unloaded into her. she could feel it shooting then he'd jerk then he'd shoot more then jerk then

again each time she would yell out in ecstasy. Then he fell atop her and lay there half on her and half off his cock still imbedded in her. A minute later she heard a snore come out of him and she tried to pry herself out from under him and found the snarling teeth of Frankie right at her face so she lay there cock still in her and Frankie laying by her head.

~~~~

## Chapter Four

She had no idea how long they lay there but he was starting to stir. Then his cock once more was hardening He moaned and half asleep pushed in. She felt a hot stream of fluid fill her rear and knew he peed in her. His moaning was increasing and he asked if she had to pee. Hoping to get away she said yes. He withdrew his half hard cock and let her stand up. On wobbly legs she stood and was about to walk away when he pulled on the leash still attached to the collar on her neck. No my dear straddle me. Startled she asked what? He said for her to putt on foot on each side of his hips, she did so and then he said to squat slightly and she did so. Now he said to take her fingers and spread herself open and pee. She did and she watched her stream as it hit the dried goo on his lower stomach and crotch. He took his hands and rubbed while telling her to stop for a second. She did but she really needed to go and told him so. He smiled and went on rubbing himself making his cock grow in size. He then said to stradle his head in the same way she did so and he said to let it flow. No urging needed she let it loose, most of it hitting his mouth with some flowing down his jaw. He was using it like mouth wash swishing it around and squirting it back up at her squatting pussy. This was actually turning her on so she slowed her stream down to make it last longer. The only problem was with all the cum she had up her rear she really did have to relieve that to. She clenched her rear letting her stream flow full force now she told him that she really needed to go use the rest room but he wouldn't let her go. He kept rubbing her urin onto his now fully erect cock. He told her to turn around to watch him and get down into the sixty-nine position once more but with him on the bottom. She whinned that she couldn't hold it to much longer and he smiled to himself and told her to do what she was told to do.

She was pretty much laying on him because of his size so he told her to rub his fat rod. She was rubbing it when Frankie stuck his head in to see what she was doing and gave the cock a long lick. This pleased the man and he moaned. So Teri took the base of the cock and pumped up and down while the dog licked the head of it. The man was moaning loudly once again when Teri felt the first bit of her fecis sliding out of her. She then felt a finger slide into her full anus then 2 were in her. She couldn't stop the flow now with the fingers probing her and out it came filling the palm of his hand and sliding down his arm. This really excited him and he was shooting a load into the dogs waiting mouth. With a laugh he said now this is a great way to wake from a good nap. He stood up and headed to the back of the barn still holding the leash of Teri and Frankie. He went into a large room that was used to bath the dogs and turned on the shower. He grabbed a grooming brush and handed it to Teri and told her to start gromming them. She lathered it up and proceeded to clean the 3 of them. After they were clean he headed for the barn door still not letting go of the leash. He trodded up to the house hearing the males barking he seemed glad they were outside he opened the door and the three of them went in.

The Akita was there teeth bared and ready to attack when the man told Teri to tell him to sit. She did and he sat teeth still bared and ready to attack if needed. The man went to the fridge and found a chicken leg and started to eat it. While looking at both dogs. He seemed to be thinking. He turned and asked which kennel the females in heat were in and Teri told him which one. He then tied the leash to a chair and told Frankie to watch her. Just glad to get rid of him she sat down in the chair and started to cry. Not to sure what was going to happen to her next. The Akita laid his head on her lap and Frankie growled. The Akita Bared his teeth and Frankie laid down. Teri knew the pecking

order had just been established so she undid the collar and went to look for something to protect herself with. Out of the window she saw him coming back up to the house but instead of heading for the door he headed around to the back, his fully erect cock swinging in the air. She and the 2 dogs went into the back porch to see what he was up to when she seen him in the middle of 6 dogs humping anything they can get hold of. She seen the sheperd as he mounted and plunged his cock in the man with no problem. This was turning her on watching as all the males found something to hump while waiting their turn. She sat on a stool with her back to the wall and teased her pussy with her figers. The Akita gladly replaced her fingers with his tongue as she watched the goings on outside. She must have cam 3-4 times watching while the tongue slide deeply into her. Then to her surprise and with no coaxing the Akita mounted her sliding his cock into her hot waiting pussy. She moaned with pleasure as she felt his long cock slide in and out of her. Then his knot was in and she could feel his cock enter her cervix once again. He licked her mouth open and they exchanged a long kiss as he pushed in deeper. She wrapped her legs around him to get more of him while looking over his broad sholder to see out side. The man was now butt to butt with the Sheppard when he reached behind himself and gently pulled the knot out. Teri heard the popping sound as they separated then the Dane was there to replace him. The man yelled out in pleasure from the size of the Dane. Another male was trying to hump his head and the man took him into his mouth knot and all. Teri yelled out in pleasure then saw Frankie standing there wanting in on the action humping the air and pacing back behind The Akita sticking his nose under us to smell our love making. This was to much for him and he jumped up on the Akita and started to hump. Teri grabbed the Akita's head to keep his attention on her while Frankie finally hit the hole it was aiming for. The Akita yelped but settled down and kept humping deeply into her cervix while he was being rammed. The he yelped again as Frankie slid in his knot but once in the 2 dogs seemed to go in time. When the Akita pushed into Teri, Frankie pulled back so The Akita was being sandwiched between them.

Frankie lost his load first and slid off to be butt to butt while Teri and The Akita finished . Teri didn't want this to end but knew it would and then she would be tied to the 2 of them for a while. Then she felt the first flow of his sperm entering her uterus. She was yelling out for more as she heard the man out side yelling for more also. She looked out and seen the most amazing thing he had one cock in his rear and 2 in his mouth while jerking off another. She reached under them and found Frankie's balls and started massaging them then she would masage the Akita's. Each time she massaged the Akita's balls she felt another wave of sperm fill her insides. The Akita was humping her all over again and she was massaging his knot with her vagina muscles to egg him on. Then he shoved him self all the way in she could feel his cock hit the back side of her uterus. Yelling out in a pleased pain she massaged the balls as he pushed in again and again, each time sending a jolt through her. She heard a pop as Frankie broke loose he turned around and was licking his sperm off of the Akita's rear which made the Akita grow to a even larger size (If possible). Teri was now writhing in a painful bliss when she felt a tongue licking her clit. That was more than she could take and she felt her self squirt While Frankie licked it up as fast as it came out. The feeling was intoxicating feeling the tongue on her clit while she was filled so fully with a cock. Then the Akita let his hot sperm lose and she could feel her stomach stretch from the amount he was giving her. She turned her head and seen a cock hanging inches from her face and reached over and brought it to her face.

She heard the man outside yell out for her to take it all and turned her head to the other side to see him and saw him still filled yet with another dog staring straight at her. Turning her head back to take in the cock and knowing she was being watched was really urging her on. She licked up and down sucling the tip then there was a tongue next to hers. Frankie had twisted his head around to help her out. She moaned and licked sometimes hitting his tongue with her own. Which sent a shock strait down to her clit. Smelling the Akita on him also was getting to her and she then took in the tip of his cock swallowing the precum as she began to run her mouth up and down his shaft. He stopped

his licking and started to hump the minute he felt her lips around him. With each hump more of his cock slid out of its protective sheath and into her mouth. Only able to use one hand she eased out the knot and grabbed it and gently squeezing it began to suck down more of his now fully erect cock. She heard the man yelling for her to suck him dry and not to lose a drop. Glad to oblige she bobbed her head back and forth trying to keep up with his humping. Knowing the man couldn't see if she lost a drop didn't matter she was giving him a show and wanted to please him. Then she felt the hot liquid hitting the back of her throat. She relaxed and took it all after which she rubbed his cock all over her face. The Akita started to lick her face and the cock that was still dripping sperm from it.

She knew he was going to pop out of her any minute now and wanted to clean him herself so she let go of Frankie's cock and he went to lay down to clean himself. Then they broke free of each other. The Akita went directly to clean her pussy but she stopped him and laid down on the floor. The man out side yelled for her to open the screen cause he couldn't see now, which she gladly did, propping it open with her foot. She then spread her legs to let him clean her but grabbing his back leg she pulled him around to where he stood over her head. He was digging into her crotch like it tasted better than a t-bone steak. She then grabbed the cushion off of the stool to prop her head up with and started to clean him in return, starting with the receding knots she coaxed it back out of its sheath and licked it clean. Then while holding it gently she licked his shaft clean. Then she took it into her mouth and suckled on it finally letting go of the knot to let it slide back into its protective sleeve. She suckled until there was no life left to his cock and all that was left was a small pink tip protruding out of its hiding place. He seemed to be done cleaning her and wanted to go lay down so she let him. Rolling over to watch the show outside.

She must have fallen asleep and when she woke up she was laying there next to the Akita and there were a few others that managed to slip up close to her. She looked around and noticed the man and his dog was gone. On the stool there was a note and she reached over to grab it and there was 5 one hundred dollar bills laying on top of it. Reading the note he thanked her for the training session and the extra money was for including him in on it (like she had any choice). Then she read the PS that said he would stop by in the morning for another session but this time he will entertain himself with the males since he prefers males to gals anyways. Then there was a PSS which read oh and please do not use the rest room till I get there, I do love to watch. So utterly tired and a bit hungry she went inside to find the males laying on the kitchen floor fast asleep. So she carefully grabbed some food from the fridge and headed for the guest room. The Akita was already up on the bed and half asleep so she ate and snuggled in next to him falling into a deep sleep.

She woke up to find the Akita looking at her with his nose touching hers. She kissed it and he kissed back. He jumped up and headed to the door. She got stiffly up and opened it. He ran down the stairs and she heard him go out the back as she followed to feed them. She noticed that she was covered in scratches and a few bruises but ignored them. After feeding the males she watched as they ran and played and how each had his own spot to mark. She went over to the Akita's spot and stuck her finger into the strong smelling liquid. Putting it up to her nose she shook her head now knowing why a dog could smell it from afar. She sat on the grass next to his bush and watched. He was play humping one of the dogs when he stopped lifted his ears into attention and slowly walked over to her. He was staring down the driveway when he lifted his leg and sprayed claiming his territory only he hit her not his bush. Getting her square in the face and dripping down onto her breasts then down to her crotch.

Teri tried to wipe it off only to smear it more she broke out into a full laugh which brought his attention back to her. He sniffed her then turned his back to her and with all fours started flinging grass on her. He then was running to the others then back to spray her all over again. The boys were really raising a ruckus and almost didn't hear the old pickup drive in. They were all by the gate with tails wagging as she ran for the door wanting to be dressed and he yelled for her to stay put.

He let himself into the gate and patted each dog as he headed over to her. He saw the shiny liquid all over her and lifted a eye brow. Getting started without me are ya now, and do ya think I needs da female scent today eh he said in one breath. He was standing there bare foot and shirtless with only a pair of overalls on. Not waiting for a answer he undid the buckles and they fell to his feet and not he stood there stark naked. Now dearie ya didn't pee yet has ya. She shook her head and he laid down. Same as yesterday please he said and she straddled his thighs and let out a little. Now he said slowly work your way up to my face please. She did and he rubbed it in as she went, when she reached the mouth there wasn't much left so he sloshed it around and spit it back down on him self spending most of his attention on his growing cock.

Ok now would you help Frankie he still needs coaxing. She got Frankie up on his back and guided the cock in. She then sat down and waited to make sure he got knotted. But before she realized what happened the Akita was on her trying to get her to lay back. But she had nothing to putt under her butt to raise her up so she rolled over and slapped her butt. He jumped up and found her anus with his first hump. She squealed wanting him in her pussy but it was to late. He quickly was deep in and tied. His extra long cock reaching ever so far up into her. She was moaning loudly and the man was laughing at how fast her mate was at tying with her. He then had his mouth filled with a cock and had to shut up. She realized that her head was just inches away from his rear. She watched as Frankie's ball slapped back and forth against the mans and she couldn't stop herself she reached between the two of their legs and found his still half erect cock. She heard him moan as she worked it to a full erection. He then did something that shocked her , He lifted his leg like a dog exposing himself to her. You asked for it lady now take it. She thrust her mouth greedily on the urine-soaked cock and sucked greedily. Mmmmm he said you do like it don't ya. Then he yelled out as Frankie let lose his load. Frankie slid out with ease and another took his place. By the size she knew it was the Sheppard.

Reaching out she started to massage his balls when he came spurting stream after steam down her throat. Telling her to suck him dry he moaned when another load was planted in him. Then just as fast the Dane was on him and pushing himself into to lose anus. Some of the mixed sperm was seeping out and dripping down on his balls and as she sucked his cock his balls would slap up against her and slop the sperm onto her. The smell didn't make her as sick this time so she kept sucking and trying to get more out of him. He laughed saying he is dry but she wouldn't let up. The cock in her rear was growing extra large and she knew he would unload in her soon. Then the mans cock was growing once more from her persistence and he was soon moaning once again and just as the Akita let go deep inside of her she pulled her mouth off of him and he moaned once more and shot her square in the face with his sperm. She turned her head and found another cock hanging there humping the air wanting a wet hole to fill. She pulled him over and greedily sucked Loving this taste much more than the mans.

A while later they all lay there panting and covered in semen. The dogs trying to clean them up but there was so much of it they just couldn't get it all. She had in turn taken six cocks in her vagina and 3 in her rear (one was the mans). Lost count of how many she sucked dry. The man had quit long before she did and just lay they watching while he fumbled himself to no avail. He had even taken a couple of males in their rears before quitting. Her stomach sticking out profusely and sperm still dripping out of her she stood up and stepped over him to head for the house when her cervix loosened its grip and out came the sperm that was tightly entombed in her uterus, landing squarely on his face and neck. Mmm he moaned feels real good, nice and warm and he was rubbing his fingers into it then into his mouth. Mmm tastes just as good. Load after load came from inside of her drenching him even more he was rubbing it down onto his growing cock, she laughed saying he was going to have to find a male willing to take him again. She walked up to the house (a bit bowlegged) looking over her shoulder at him trying to coax a male to him.

He wasn't all that ugly she decided actually his face was quite handsome but he could stand to lose some weight. Then in the house she went. She was under the shower when she heard the door open and in he came erect cock and all. Sorry but not one of them would help me out and beins you caused this problem would you mind he said smiling as he stepped under the hot water. There was a built in seat at one end of the shower so she sat down and pulled him into her mouth. He moaned with pleasure as the water ran down them both. He grabbed a handle on the wall and pushed himself deep into her mouth gagging her in doing so. He was moaning so loud he didn't hear her gagging, and was humping her fully. He grabbed the back of her head and pushed her farther onto him. She tried to relax and open her throat to take him but he was being to rough and not giving her time. Finally she managed and he slid even farther down her throat. Her natural instinct was to swallow and her muscles did what was natural. The feel of her trying to swallow his cock drove him made and he pushed even harder forgetting it was her mouth and not her rear he was in. He now had both hands tangled in her hair and pulling her head on and off of him as he thrust deeper in to her as he grew in size readying himself to let go of his load. His head was leaning on the wall above her head as he shoved harder and harder trying to relieve himself. She was getting scared note able to breath to good she reached up and started to massage his balls to hurry him along. This only made him thrust all the harder. Then it happened while deep down her throat he let it go. She gagged not being able to swallow with him so deep in there. She thought she was drowning and she threw up both sperm and vomit flew out between her lips and his cock but he still would not ease up he pushed once more and again each time more sperm shooting down her throat making her gag and throw up.

He was moaning and telling her that this was the best time he has ever had over and over again. It seemed like he would never drain dry it just kept coming. His body was shivering from the length of his orgasm and then he collapsed . His head landing between her legs. Mmm smells sweet here. May be I can help you out now eh he said. She managed a no that's okay and stood up to wash her hair. wasn't easy with the big man sitting under her on the shower floor. He grabbed the soap and not getting up was washing himself off. She got herself clean and was ready to get out when she felt a finger stroke her clit. Not now please she gasped still shaken from the abuse her mouth just got. She headed to the room to get dressed and he followed he pushed her down onto the bed and said they needed a rest.

~~~~

## **Chapter Five**

Teri waited until she heard his deep breathing turn into a snore then as quietly as possible she slipped off of the bed. She wrote him a note an the pad on the end table next to the bed. Please be gone when I come back, Amy and Keri are due back and there are things I have to get done. Then she putt on a tube top and a short skirt and slid out the door. She first went down to the barn to feed the girls and to let them out into their dog runs. After she did that she was cleaning each kennel when she was finishing up the one with the girls in heat she got a nudge from behind. She turned around and scratched her ears. Another was rubbing her rear on her so laughing Teri said no not now and let herself out. Seeing the old pickup still in the drive she decided to go for a walk.

She followed a path that led out to a thick stance of woods out past the large pasture. The sky was clear and there was a cool breeze, birds chirping. She could almost hear the tall hay grass as the breeze ruffled the tops. Getting to the trees she looked back at the house to see if he had left yet. So with a frown she entered the small forest. It was like she entered a different world following the path and seeing all kinds of little critters everywhere. She even seen a rabbit as it darted into some brush for cover. She found a small glen that had the softest green grass that she ever seen. So deciding the take in some sun she undressed and laid down on her stomach and in no time she was

fast asleep.

She didn't hear when the bushes close by were rattling, or the whimper of a animal, or even the growl that followed. But she did feel a wet cold nose sniffing her rear. Startled awake she rose up onto her knees and that's when she heard a growl. Looking around she met the whitish blue eyes of a pure white dog. Smiling she reached back to pet him and her hand was almost bit. The dog showed his teeth and snarled at her. That's when she realized that this was a albino wolf. Not knowing what to do she instantly covered her head with her arms and curled up into a semi ball to protect herself from attack.

Then with her bottom still up in the air she felt the cold nose once more probing her private areas. She knew he smelled the other males still up inside of her then she remembered the female that had rubbed up on her and knew why he did not attack her first. Then she felt the tongue hitting her anus first but then finding the opening of her pussy a better target. He was a bit agitated that he couldn't get at it to easy (because of her being scrunched into a ball) so he nudged her hard with his nose and to keep from falling she spread apart her legs. He seemed to be pleased and stuck his tongue deep up into her. She was feeling his warm tongue rubbing up against her g-spot and before she could stop herself she squirted this seemed to drive him all the more. He lapped up all he could and was starting to hump the air.

The in one swift movement he was pinning her down and locking his legs around her hips humping and trying to insert himself into her now horny pussy. So temporarily forgetting that he is a wild animal she reached up under herself to help guide him in. When she got hold of his jabbing cock he seemed to slow his humping and she place the tip into her . Then he pushed and he was in growing and pushing in deeper. Then she felt the knot ramming p against her swollen folds. Then slowly he pushed until he managed to get all of himself into her. She felt him grow inside of her then he immediately turned butt to butt and was filling her with his hot juices. With each squirt she yelled out in an orgasm so much so that she didn't see the 2 wolves pacing near by. The Albino was growling and snapping at them while still filling her with his sperm. One of them managed to get close enough to sniff at Teri's face, which startled her back to reality. Seeing the grey eyes of the smaller grey wolf she screamed which made him snap at her. The Albino reached around and nipped him in his rear and he ran off only to come back to pace just far enough to stay out of reach.

The Albino seemed to relax a bit and then settled down to wait until they separated.

What seemed like a hour passed and Teri still felt his cock in her she knew she didnt want him to leave her then he slipped out. He turned and licked his spem off of her full pussy. He then took several steps laid down and cleaned himself. Teri slowly tried to get up when she was nocked back down by another male. He was on her and frantically trying to find her wet hole with his growing cock. She tried to roll over when she felt his sharp teethon her neck. She yelled out in fear then he pushed into her and let go of her neck. He rammed hard and was knotted quickly and finished just as quick. Almost sad that it was so quick she relaxed and waited. He soon slipped out of her and went to clean himself and before she could even twich there was another in his place. He was much younger and and in his excitement he let off a load all over her back while trying to mount her. He finally found his mark and was pumping his hot sperm deep in her.

Now totally a1/2 hour later worn out and not able to move if she wanted to, he finally stopped humping and pumping his hot sperm into her. They both colapsed still tied together. Teri must have fell asleep because she woke up to feel him slipping out of her with a pop. Releaved that they all had their turn she looked over at the albino. His beauty was beyond words and his pink eyes bore into her. It was almost like he was smileing at her. She smiled and he got up and came up to her not taking his eyes from hers. He stood over her looking her in the eye then did something that startled

her. He licked her nose then her neck and on down her back until he reached her butt. He slowly pushed his tongue between her butt cheeks until it hit her anus.

Teri whimpered at the tenderness he was giving her and raised her bottom up to give him a better access. His tongue slid into her anus causing Teri to moan out loud. That seemed to entice him to further probing until he decided he wanted her female juices. He stuck his nose under her and pushed up getting her into a wide open position. He greedily cleaned her not missing a spot. Every time he hit her g-spot she would scream out in an orgasm and push herself back onto his eager tongue. His cold nose hitting her anus would send her further into the orgasm.

Then he stopped and was mounted and in her in one swift movement. He seemed to go slower this time not getting knotted so soon but not waiting till he was too large to knot. Then she could wait no longer and pushed back on him until she felt his knot pop into place and start to swell. But this time he seemed to grow to an enormous size. Teri yelled out loving the feel of his swollen cock in her. Then with a hard thrust he was pushing the tip of his cock into her cervix. Oh the feeling was both painful and erotic.

Teri was having the most erotic orgasm ever and with each thrust she was losing all sense of reality. All she knew was that she did not want this to end. Then she felt his hot sperm filling her uterus and with each thrust he filled her more and more until she could see her tummy bloat out to make her look pregnant. She still was rocking on him trying to get him even deeper if that was possible when he let out a yelp. She turned her head to see the younger male managed to mount the albino and was pushing himself into his anus.

The albino seemed to get even harder and was letting out groans. Each time the young wolf pumped the albino would fill her already full uterus with more of his hot fluids. She knew he couldn't keep up to much longer but the young male was so energetic. They went at it for quite a while when the young male finally slid off and soon after popped out. The albino almost sighed a relief when he yelped again. And by the added weight Teri knew another male was taking his turn. Teri could feel his cock swelling once again and filling her till she thought she would explode. All the cum inside her from these wolves was stretching her to her limits. She could feel hot sperm down her legs and knew that this male did not get knotted so he was done and off in no time. She collapsed with the albino still knotted to her and still laying on her back. He was being cleaned by the young male and seemed to be enjoying it because his cock would jerk with each lick his anus got.

The young one hit Teri's clit every once in a while and sent shivers through her ravaged body. The cleaning finally over they were left alone. Teri enjoyed his warmth on her back and was glad that he wasn't trying to turn butt to butt. They lay together like that for a long time even fell asleep after he slid out of her.

~~~~~

## **Chapter Six**

Teri woke up shivering and alone in the dark. It was pitch black out and she had no idea which direction to go to get back to the house. She did know she needed to get indoors and into a warm bed. She listened and heard a far off bark and figured it had to be a dog at the kennel and headed in that direction. Taking careful steps and feeling her way along she made it to the edge of the woods. She went to step over something in front of her when her foot hit something. She heard a click then severe pain hit her ankle. She reached down and felt the teeth of an animal trap around her foot.

She tried to pry the teeth apart but they wouldn't budge. She felt around trying to find a stick or

something to pry with feeling light headed from the pain. Her hand came across something hard. She picked it up thinking it was a stick she stuck it between the teeth and bore down on it. She felt the teeth come apart and pulled her foot out. She let out a scream from the pain and passed out.

Teri thought she was being dragged somewhere and she felt teeth on her wrists and something soft like a tongue licking her ankle. But she was in a fog and not able to see or come out of it. Then she could feel the warmth of something big laying down next to her, and then something else laying down on the opposite side. Then things went black again.

Teri woke up when she felt a tongue licking her ankle and sat up. She screamed from the sharp pain when she moved her foot. Looking down she saw the albino wolf carefully licking her wounds. She realized that there was some infection starting and then she remembered her dream of being dragged and knew the wolves brought her here. She looked around trying to figure out where she was and had no idea. There was at least 15 adult dogs laying here and there some watching her and a couple nursing pups.

I only saw a couple of the males and figured the rest were somewhere around out of sight. She was real thirsty and thought she was a little feverish then she saw a little creek near by. Teri tried to stand and fell back to the ground she had to crawl over to the creek. The albino by her side she made it and cupped her hands and took a few drinks before collapsing again into darkness.

This time when she woke up she felt several wolves laying around her with their heads laying across her keeping her warm. She was amazed that they would care for her like she was one of them. She then felt a tongue lick her cheek and knew it was the albino. With no fear she reached up and caressed his ears which he seemed to enjoy. He then licked her nose and pushed his head into her caressing fingers. She noticed that her foot wasn't throbbing like it was before and reached down and felt the scabs of almost healed sores. She then realized that she must have been out for days if not longer. Her first thought was the dogs at the kennel was probably starving. Then she remembered that Amy and Eric were due back the day she went for a walk. Then she thought that they would either thought that she ran off or something happened to her and they were worried for her and had been out looking for her.

Well it is dark out now and she had to figure out how to get back to the farm when day breaks. So when the albino went to lick her again she met his tongue with hers, which brought out a groan from him. He responded with a sharp bark and the dogs around her got up and walked away. He licked her mouth this time then went straight down to her crotch darting his velvety tongue in and out of her. He had her moaning and wanting more in no time then he stopped and was waiting for something. Teri was confused then it dawned on her he wanted her to roll over. She did and he was on her in a flash. His already growing cock looking for an opening. After a couple of thrusts he finally found her wet waiting vagina. All she could think was how good this felt. Then her was crawling farther up her back trying to lock himself to her. She could feel the tip of his cock working its way into her cervix and then with a hard thrust his knot slid in and his cock pushed its way into her uterus filling her with his wonderfully hot sperm.

She could sense the other males getting horny from their love making and then the albino let out a yelp as one of the males jumped up on him and planted his cock into his anus. Again this sent the albino into an extended time of pumping himself into Teri, as he himself was getting a load pumped into him. Then she was really shocked when she heard another yelp and the weight of another dog added on. Then in front of her was a male trying to get her attention. She reached out and found his cock slightly hanging out of its sheath.

Pulling him a little closer she slowly put her mouth around him and he went into a thrusting frenzy

trying to get himself deeper into her wet mouth. He jumped up on her (facing the albino) and was humping her mouth for all its worth. She couldn't reach up to keep the knot out without falling down from the weight of all these dogs. Then the albino thrust deeper into her and then as she went to scream out in an orgasm the cock in her mouth pushed in and his knot swelled to where she could not pull her teeth back over him without hurting him then he was pumping her mouth full of himself. What she couldn't swallow seeped out the sides of her mouth and down her neck onto her plump breasts. She felt the pumping behind her slowing down and knew that the last 2 had finally spent themselves and now they all had to wait for the knots to go down to pull themselves out. She heard a pop as the one on the albino pulled loose but he still had a cock stuck in him. She managed to then reach up and pry the cock out of her mouth.

Teri guessed that he felt he wasn't done yet because he went around and hopped up on the albino and was ramming himself into his anus which got the albino growing inside of her once more. There was another male in front of her licking sperm off her face and she managed to get him to lay down in front of her as she worked his cock into a rigid state. He was trying to stand but she pulled him under her to where his cock was right under her mouth. She took him fully in her mouth but was careful to keep a hand tight around his knot. The poor wolf not knowing what to do lay there humping his cock up to the warm mouth that was giving him a pleasure he had never felt before.

This time when he was spurting his hot sperm she pulled her mouth off of him to let it hit her face and then her neck then on down to her breasts enjoying the feel of the hot fluid hitting her. The albino was groaning and then he let out a howl. As he did he pushed once more trying to get deeper in her and she took the cock back into her mouth as her body went into spasms like never before. She sucked and sucked pulling all his sperm out of him and as if she couldn't stop she sucked more. The wolf under her was also spasming and was no longer humping up. Every time the albino pushed deeper into her she would go down onto the cock in her mouth, holding his knot firmly in one hand. Trying to get more out of him and every time she did he would shiver and jerk and moan.

The albino finally collapsed on top of her which shoved her mouth one last time down onto the fully erect cock. She let go of the knot and he scooted out from under her and went to clean himself. She felt a little later the male on the albino finally came loose and slid out of him to where now it was just the 2 of them stuck together. She felt the sperm that was oozing out of his anus seeping down onto her legs. He was too tired to turn butt to butt and seemed content just laying on top of her. She then felt several tongues cleaning both her and the albino.

Teri knew a tongue must have found his anus because he started moaning, then the same tongue licking starting on her clit and moved up to his section of cock between his knot and balls that was starting to get hard once more, then on up his ball to his anus. This was getting the albino's knot a swelling once more. Teri reached up under her to massage the hanging balls which got him to slowly hump her once more. Then she felt a second pair of balls hit her hand as another male took his turn at the albino's anus. His cock hitting it marked first shot. The albino was obviously worn out but his instinct took over and he was once more pumping deep into Teri's stretching uterus.

Then a thought overtook her and all she could think of was that she wanted to have his pups. She was his now, she was his bitch in heat. She let out a moan that sounded more like a howl, and then the other females were howling back at her. She was one of them now she knew it and could only go back to let her friends know she was ok and to get her things.

~~~~~

## Chapter Seven

It was about a hour later when all the wolves had her cleaned (both inside and out) that Teri saw the first rays of the morning sun. She looked over at the albino who was half asleep looking at her. She smiled and was trying to tell him she had to go back. He seemed to understand because he growled. She smiled at him again and went on to tell him that she will come back. Again he seemed to understand because he layed his head across her chest and went to sleep.

Teri slept for a bit and woke up to the albino nudging her with his nose. She heard someone far off calling her name. She looked the albino in the eyes and said that she will come back. She got up her ankle still quite sore and hopped toward the sound of her freinds calling her. SHe knew she couldnt hop quick enough to get far enough away from the wolves to protect their hiding spot. Then she felt the fur of a wolf under her left hand. The albino was next to her as if he wanted her to lean on him.

So awhile later she was standing in the little glen where she first met the wolves and she saw her freinds staring from the woods in amazement. Because what they saw was not one wolf but a whole pack with their friend leaning on the most beautiful white dog they had ever seen, and behind them was what looked like at least 20 wolves. Then even more startling was when Teri getting down on one knee and kissing the white dog on the mouth then in a flash they were all gone leaving Teri standing there totally naked and smileing.

Eric was running to her and Amy was just looking at the trees behind Teri where the wolves disappeared. Eric was ranting and raving about how worried they have been then he finally looked down and saw her ankle. THis of course shut him up and he swiftly swept her up into his arms and headed back to Amy. He almost had to slap Amy to get her out of her stunned state. Then she simply asked have you been with then for the last 3 weeks. Teri was shocked at how long she was gone but now that she was wide awake and not being filled with sperm she did feel starved and looked down to see that she probly had lost about 10 pounds, and she could still see her tummy still swollen with the albino's hot juices.

So all the way back to the farm she filled them in on what she could remember (leaving out the doggy loving) . Amy kept looking at her freind real strange like and as she was helping her into a bath she finally asked did you, did they, did.... oh heck you have been having the time of your life here with our dogs and that wasnt good enough you had to go get some wild cock. Then she broke out laughing. Teri was stuned and then she realized that she hadnt cleaned the room before leaveing to go on her walk so there probly was sperm everywhere.

Amy then said that frankies owner was kind enough to tell us how well you did in training his frankie and then of course our dogs are already well trained for lets say loving thier owners. You did a good job cleaning up but you forgot the floor in the shower.

Teri was deep red from being caught when she finally realized that her freind must also be having her dogs making love to her. When Teri looked Amy in the eye she knew and with a smile Amy said its great isnt it. Teri giggled and said ya the best. Amy was scrubbing Teris back and mentioned some scratches she has Ans was running her finger along one of them which sent a shiver through Teri.

Teri laid back and lifted her foot up out of the water looking at her ankle she said in a low voice "they saved my life you know". Amy kissed her on the forehead and said ya they did. If they hadnt cleaned her sores she would have died of infection. She then said Eric just got back after finding the trap and it was very rusted and there was a bloody bone laying next to it. Amy's hand was on Teri's shoulder and she was slowly rubbing the was cloth from one shoulder to the other. Each time she would slide her hand down just a bit until she was washing Teri's breasts. With out thinking Teri moaned and Amy planted her mouth onto Teri's.

Oh we thought we had lost you and I always dreamed of you and I and a couple of our dogs being together. The thought sent Teri into a arousal and she kissed her friend back saying that she had never done anything like this before but then again this is the month for doing new things, and laughing they both heard a whine at the door. Eric was standing there with the Akita and another male, with a smile on his face he then asked if he could watch. So laughing together the 5 of them headed to the bedroom and of course the Akita getting there first and was waiting for Teri to get into position. Eric said that he would hold the knot so that she wouldn't be hurt by his large cock and Teri smiled and said don't bother we fit good together.

Teri was on her back with her legs hanging off the bed and Amy was next to her getting ready to take it doggie style. Teri reached over and massaged one of Amy's breasts while Amy was reaching for Teri's. The Akita was already on Teri and was pushing his enormous cock into her cervix while the other male was getting tied to Amy. Eric said that this is too hot for him and was getting undressed. Teri wiggled her head over under Amy's head and they locked in a kiss rubbing their tongues together and both moaning from the cocks being rammed into them. Then the Akita pushed his knot into her and she yelled out in a delightful pain.

Eric was kneeling on the bed next to his wife's head which is now also next to Teri's. So when they both felt a cock slide in between their mouths he was met with the most erotic feeling with one thrust he would be in one mouth then another thrust he would be ramming down another throat. To watch both girls so eagerly trying to get him to cum he couldn't hold it back and pulled himself out of the mouth he was in and while pumping himself he gave them both a taste then aiming his cock at Teri's breasts he let it go while Amy rubbed it all over and then reaching over farther rubbed her breast on top of Teri's.

Teri was not really knowing what was going on around her because the Akita was filling her cervix with his now fully swollen cock, and since her uterus is still full from the albino's sperm she was into a orgasm and was just feeling her body respond to his hot sperm he shot into her, and with every spurt she felt she also felt the need to suck on something so when she grabbed Eric's cock and was sucking it to life again while Amy cuddled her breast and sucked on his balls. The male on Amy had turned and Eric reached down and was massaging her clit to keep her in a orgasm. Eric yelled out the same time Amy did and Teri's mouth was being rammed hard. He grabbed her head and was pushing himself down her throat. She could feel herself cresting on the verge of cumming and being cummed in and she sucked even harder pushing her head up each time he thrust down. She was also thrusting her hips up to get the Akita deeper into to when she finally exploded and that's when she howled. Eric went crazy when he heard the howl and forgot he was pumping a mouth and really pushed his full length down her throat. Amy was shocked at the way Teri took it without choking, and taking it she did she sucked and sucked him till he was limp and beyond tired, but she kept sucking only out of instinct because it was the cock in her that kept her going. Amy was laying there waiting for the male to slide out of her watching Teri suck her husband dry and thinking that she never had seen anyone who could take all of the Akita the way she is.

Then with another howl Teri let go of Eric's cock and he collapsed next to his wife and Teri shoved up to the Akita as he thrust down and then the Akita fell full weight upon Teri and they lay there panting. Then to Amy's and Eric's amazement they heard far off howling, which Teri responded to. Amy looked at her husband with a worried look and he smiled. She belongs to them now sweetie but at least she will be close enough to visit once in a while. I guess once you go wild there is no coming back. With that Teri smiled knowing that she could come visit or even stay when the weather gets to cold but he was right she has gone wild.

**The End**
