BEASTIALITY STORIES

(c) 2021 by BeastyGirl

I love having sex with my dog but he wasn't enough for me, so I found a bigger cock.

I'm Kelly, age 16 and I've been fucking my dog since a while ago.

My dog is a border collie, his names Toby, and I let him fuck me all the time, mostly he like be on top and hump my pussy or he gets me on my hands and knees and fucks me up the ass, but my favorite position is Toby laying on the floor on his back with me sat on top riding him, I push his cock and knot in to my pussy and I ride him for ages, I like it when he comes in me but I just keep riding him until he comes two or three times, he just stares at me licking his face and nose.

I always enjoy fucking my dog but it wasn't satisfying me as much as it used to do and I needed more, I needed something new.

We live on a farm with rescued exotic animals and it was winter time one evening, I'd just finished fucking Toby's cock off and he went in to the corner of my room and fell asleep but I was still horny, I remembered my dad had just brought home a young Zebra from customs, it didn't have the right papers so we were asked to look after it for a while until it was sorted, I put on my long warm bubble coat, I was still naked underneath, and I put on my wellies and while my parents were watching TV I told them I was going out to feed the Zebra.

I ran through the snow to the barn and went inside, I stroked the Zebra and fed it some grass then I sat on a stool in the corner watching it eat, when I plucked up the courage I walked over to it and stroked it some more and then I kneeled down and looked under it, I salivated at the sight of its cock, I began to stroke its cock and it didn't seem to mind, after a while it got bigger, it was like a man's cock but really long and it wasn't hard, it was flexible and had a big wide knobby bit on the end.

I took off my bubble coat and crawled underneath it, I shook its cock, it was really flexible and bendy, then I licked the knobby bit and then put it in my mouth, I had to open my mouth really wide, so wide it hurt but it wouldn't fit in my mouth otherwise, I got the knobby bit in my mouth and licked the end while tugging on his long shaft with one hand and fingering myself with my other hand getting wet.

I was so horny and I took the enormous cock out of my mouth and started to rub it on my tits and over my body, I arched my back pushing my hips in to the air and rubbed it along my wet pussy, I wanted more, I crawled out from under the Zebra and gave him a pat on the neck, he was still crunching at the grass, I brought over the stool and placed it underneath him then I got on my knees and bend myself over the stool, I held his cock and tried to push it in to my pussy but it wouldn't go in, I rested his cock on my back and I pried apart my pussy lips as wide as I could, I've had Toby's knot inside me so it should stretch wide enough, then I took his cock and tried again, it took some effort and wiggling but the knobby bit finally went in.

I tried to fuck his cock by swaying back and forth but his cock was too flexible it wasn't really sliding in and out, so I had to put my hands behind me and hold it while I swayed back and forth, it wasn't perfect but it will do, I fucked his enormous cock for about five minutes then I got really tired and my arms were aching so I stopped, I pulled his cock out and I turned around and got on my knees and started to suck and tug on it again instead.

His cock felt like soft leather as I tugged the hell out of it with the knobby bit rammed in my mouth, I was taken by surprise when he ejaculated, so much spunk shot in to my mouth at once, so much that I had to take his cock out of my mouth, when I opened my mouth, no word of a lie, a river of Zebra

spunk gushed out and ran down my chin and down my body, covering my tits and legs, it didn't stop though it just kept coming out in big long heavy spurts, it would have filled a bucket, I've never seen so much spunk in my life.

Like a good girl I let him come in my mouth a couple more times and I gulped his spunk down, Zebra spunk tastes really nice, it's really thick as well, it's like yogurt, when his cock stopped spirting I gathers the spunk off my body with my hands and poured it from my hands in to my mouth and swallowed as much as I could.

I got up and hugged the Zebra around the neck and patted him, thanking him for his massive cock, I cleaned myself off as much as I could, I had loads of hay stuck all over me, then I put my bubble coat back on and went back to the house, I fucked the Zebra again the next day, only this time I took a bottle with me and filled it with his spunk so I could take it with me, I laid in my bed that night after riding Toby before bed and I was swigging Zebra spunk from the bottle and pouring a bit on me and rubbing it in to my pussy, I'm such a spunk whore and love animal cock.

~~~~~

*A few weeks after my first sexual experience with Big-Z I found a way to fuck him for real and it was so painful. Best sex of my life though.*

I'd been enjoying sucking Big-Z's cock for weeks, Big-Z is the name I gave my Zebra, I sucked his enormous cock every other day and he started to learn my pattern because he'd already have a bit of an erection when I entered the barn at night, he knew what I wanted.

Don't get me wrong I thoroughly enjoyed sucking his enormous cock and drinking his hot thick spunk but I so very much wanted to fuck him, I wanted that big gigantic cock inside me so bad, I tried a number of times but we couldn't get the position right.

I did some research online on how to get Zebra's to mate, I didn't find anything, but I did find a lot about horses and Zebras are basically horses so I looked in to it, turns out you can get a thing called a Breeding Mount that has an artificial vagina inside and the horse mounts and fucks it thinking it's another horse, obviously I couldn't get one of those not just because I couldn't afford it but how would I have explained it to my parents, but it did give me an idea.

So the following night I went out to "feed" the Zebra and I put my idea in motion, I sucked his cock first, I couldn't resist doing that, but I stopped before he came, then, naked, I moved the tallest bench I could find over to the strongest side of the pen fencing and put it right against it, then I laid myself on it on my back, it was a bit uncomfortable so I put some hay on it to make it a bit softer on my back.

I placed a bottle of lube I brought with me on the floor next to the bench and I got up and I grabbed a bunch of grass from the feeder and laid on the bench and put the grass all over my lower body, especially between my legs, and I whistled Big-Z over, he ignored me at first so I got up and took all the grass out of the feeder and piled it on top of me, if he wanted to eat he'd have to come over, and sure enough he did, he ate the grass off of me and when he'd eaten most of it he pushed his nose against my pussy and picked up what remained with his mouth, his thick rubbery lips rubbed against my pussy, it tickled but it was stimulating.

He'd been fed so now it was time for sex, I opened my legs as wide as I could and slapped my pussy while whistling for him to come back over to me, he eventually came over and lowered his head over me, I stroked his face and pushed his head down towards my pussy, I wanted him to smell my sex, amazingly he stuck his tongue out and licked it a couple of times, it felt good when it grazed my

clitoris, I could see he was getting an erection and then he started lightly jumping on his front legs a little off the ground.

Then he jumped really high and put his legs over the pen fence, thank goodness it was strong enough to hold his weight otherwise he would have crushed me to death, his enormous cock was dangling and swaying above my stomach, I reached out and tugged his cock, my plan was working, I picked up the bottle of lube and squeezed it out on to his cock and I rubbed it all over it, got it nice and slippery, I pushed his cock against my pussy and gradually squeezed it inside me, when it was inside me he started thrusting and the lube made it go in so easily, he thrust so hard he pushed me up the bench and I hit my head on the fence.

I used my hands to push myself back down the bench and I held on to the fence with all my strength so he couldn't push me back against it, he kept thrusting every couple of seconds, and every time he did his cock slid deeper inside me, it was so far in it couldn't go any further, so I had to loosen my arms a bit so I could slide up the bench because otherwise his cock would have ripped up my insides, my pussy was hurting and stretching so much, it wasn't natural, well, having sex with an animal isn't natural anyway, but I didn't care, his cock was humongous and the best I'd ever had.

I started to help him out by rotating my hips with his cock buried inside me and he just continued to thrust every few seconds, female Zebras must be so happy after sex, this was so good, I'm surprised my parents didn't hear my orgasmic screams all the way up to the house, he thrust a few more times and then he came, holy fuck, he filled me with so much spunk my body couldn't contain the back pressure, his cock shot out of me like a rocket followed by a Niagara falls of Zebra spunk, I could literally hear it splashing on the floor as it poured out of my hole.

He jumped off the fence, almost hitting my arm with his front legs on the way down and he just strolled off to the other side of the pen, I had to remain on the bench for a while because my pussy hole was stretched wide open and spunk was still dripping out of it, when I lifted myself up I fell to the floor, I honestly couldn't move my legs for about ten minutes.

When I could walk again I gave Big-Z a stroke and a kiss on the nose before putting on my coat and walking slowly back to the house, I went straight upstairs, walking up one step at a time, it was hard, I went in to the bathroom and ran a bath, I sat on the toilet until the bath was full and then I took off my coat and carefully got in to it, my lower body was in agony but the hot water in the bath helped to soothe the pain off, I don't regret it though, no way, I know for a fact I'll let Big-Z fuck me again.

I had experienced the most painful sex anyone can experience, so nothing can faze me now, nothing.

I did tell you that I love animal cock. Now you know just how much I love it and what I'm willing to put my body through in order to get it.

And for those asking, yes this is real, I actually did this. I don't recommend it though, unless you really really want it, don't try this at home.
