## **BEASTIALITY STORIES**

Pushing his way through the door of the post office feeling quite nervous walking out with a package that had a rather strange label on it but also having what seemed like a protruding chest that he had tried covering it up with his jacket. With it being a bit more humid a lot of people that passed him thought it was kind of strange for someone to be wearing a jacket on a day like this however most shrugged it off allowing him to continue on his way.

Jess knew that there was good reason why he was being nervous and the protruding chest although he wouldn't openly admit it to anyone that he didn't trust but the package was a new supplement of hormones. That's right; he was going about doing his own hormonal treatment to become more feminine, although he didn't have the money or insurance to get the stronger stuff so he was forced to look on line.

Standing about 5' 4" and about a slim built only weighing about 140 lbs. at the time, Jess had always had what most would call a girly figure with an uncertain sexual orientation. Meaning to him is that although he was one to want to be a girl, he wasn't entire into the idea of having a relationship with a male...however soon that would change and not by his own choice either.

With his finances being limited, Jess or Jessica as he had chosen for his female self while he was online where he lived his altered self, had gone about looking throughout the internet for cheap hormones supplements. Given time, he was able to find that he could only buy the hormones as it was recommended that the person go to the doctor however since he still lived with his parents it required that he have their signature for anything like it.

That's how his chest was developing like it is right now giving him barely an AA cup with that being the only feature that developed, leaving the rest to stay the same. At school, he was able to hide the developments at times but it became harder since he had P.E. class however he was lucky it was at the end of the day allowing him time to go in when everyone else but that also meant he was late for class at times.

The final year in high school didn't require that he take P.E. as it was replaced with a Health class in which allowed him access too many things although it was just something for him to know. Given time, he realized that he needed to continue to find more products to make his life happier for him.

Turning back to the internet once more now having work that produce some extra money for him to use, it was still difficult as the prices were too high to the point that he nearly gave up until he came upon a website that were looking for people to test out a new trans hormonal product that included several things that a normal doctor would give to a person wanting to go through the transition.

It would give Jess(ica) all of the hormones and blockers that would give him the proper look, with the company offering to give medical services to each test subject to make sure that they weren't experience any kind problems along with giving them a thousand dollars for their review of the product per week of however long he would be part of the project.

Although it sounded too good to be true, Jess signed up when he gave it some thought however he came to realize that the group was offering a lot of what a normal doctor would do with services but they would be paying him instead of the other way around. Given a week, he got a notice in the mail that the package that he had been waiting for some time causing him to nearly run down to the post office with nothing but his pajamas on lucky enough his mom stopped him before he could leave the house.

"Where are you off to in such a hurry, honey?" his mother asked as he raced back to his room

closing the door as he didn't want her to see his developed chest even though the breasts weren't apparent she may have guess by the first sight.

"I have to go and get a package that I have been waiting for, mom. There seemed to be a delay and I have been waiting for it for months." Jess lied hoping that his mom would believe him. He hated to lie to his mother however since he didn't want to reveal this until he knew that she would accept it as something that he wanted for his life.

"Very well, hon. Hey listen before you leave, Charlie wants me to meet him for dinner and a movie later. He wants me to stay over with him at his place since the movie won't get out 'til late. Will you be all right alone here?" she asked seemingly taking the lie which Jess nodded to her question about leaving him alone.

Since he had been little, they had been on their own however she had been seeing someone recently leaving him sometimes home alone when he was old enough which gave him more time to dressing up in clothing either that he had bought or taken from his mom's room. This also gave him enough time to dress in wig, makeup, clothing, etc. plus it gave him a chance to look at any development that had become apparent give over time.

"Yes, mom. I hope you have a good time." He said giving his mom a hug as his nipples pressed against hers as he kissed her on the cheek before hurrying out of the house wearing his pants and shoes heading for the post office. His mom was left standing there trying to figure out if she had felt what she had when she was hugged.

Shrugging once more, she grabbed her purse and keys before leaving the house locked heading for her date.

Jess, after easing up a bit during the walk home, arrived home just as the sun was starting to set finding the house dark although he expected his mom was gone by now, he never knew. He found that he seemed to be holding his breath by the time that he got into the house closing and locking the door before he let out a sigh of relief.

Dropping to the couch feeling his hands shaking as he went about ripping through the packaging to find a small wooden/metal box inside. Turning the box over in his hands studying it a bit confused but still anxious as he thumbed the latch allowing the lid to open up to reveal a folded letter first while there was 6 small compartments locked with what appeared to be a diabetic blood scanner to the left of the compartments.

Putting the box down and taking the folded letter out flipping it open to reveal an introduction and instructions:

Dear Jessica \*\*\*\*\*

Welcome to the test program to test out the new and improve hormonal drugs for people that are going through their transitions or building up to it. Before you will find that there are several compartments that have been locked that way you won't end up ODing on the drugs. You will find the instructions for each pills/drop included in with the compartment and drug.

There is no hurry so when you are ready, just press your thumb to the scanner to begin. Please follow each instruction exactly to the letter.

In the last compartment you will find the address for our local clinic as we request that you come by once a week to do medical exams, problems, etc. as you will receive your next dosage

including a shot of estrogen that we have developed that should help you become the woman that you want to become.

If you will have any questions, comments, or concerns please be free to call \*\*\*\*\* or come down to the clinic.

P.S. Once you have started this you must complete the testing as a result if you don't you will die without the proper care.

Sincerely

Lunaicic Von Lunars

CEO

Jess felt his heart beating rapidly rereading the message again just to make sure that he got the instructions right before pressing his finger down on to the scanner as there came no response however a slight sting at the end of his finger as if the machine had bitten him. This action caused him to jerk his hand back only after the scanner finished the scan allowing the first compartment to open revealing two pills one red one green with a slip of paper off to the side.

Taking the paper, he carefully read it:

Take the red pill now making sure it is placed under your tongue then take the green pill in three hours. After taking the red pill, please wait 12 minutes before pressing your finger in the scanner again to continue on. Don't worry about having to wait to take the green pill later as there will be no terrible side effects.

~Well here goes nothing.~ he thought Setting up an alarm clock for the first 12 minutes that way he wouldn't miss taking the next pill with another timer to be set for three hours from then, Jess picking up the red pill dropping it to a safe and secure place under his tongue before pressing down lightly on his tongue finding that the pill had already degraded leaving a slight foul taste in his mouth. Quickly pressing the start button allowing the clock to start ticking away the seconds.

Sitting there closing his eyes savoring the thought that he took a bigger step toward being someone that he wanted to be. Figuring that it was best to get something to eat while waiting for the meds to take effect, he was about to stand when all of a sudden he bent over with his body by sheer heat and pain as it felt like his skin was on fire. The pain that developed made his vision blurred making him barely able to see as he tried to stand to move to the phone. However he wasn't even able to stand up leaving him to crawl on all fours toward the phone.

~What in the world was in that?~ he asked as the pain finally subsided enough to allow for him to stand on his feet as his hand reached out to grasp something to steady his balance. However something stopped him causing him to look down at his arms finding that the hair seemed a lot finer than and not as thick as they had been.

Moving to a hall-way mirror to get a better look at what had become of him, Jess found the sight amazing and almost frightening. The picture before him showed that his ten o'clock shadow that had been developing had disappeared altogether leaving a baby face like look, as if he had electrical hair removal without any kind of scarring that would come with it.

Pulling off his shirt to reveal the budding chests, he found that like his face all of his hair had been either removed or become thinner leaving an almost feminine look to his chest allowing for his

breasts to become more apparent. He took the time to examine himself, the first alarm drew his attention quickly toward the small box once more.

Quickly pressing his finger into the scanner once more, not surprisingly again the scanner seemed to take a sample of his DNA before it allowed for the second compartment to open up revealing a small dropper that was filled with a liquid plus a note waiting next to it.

Take the entire dropper of liquid under the tongue now and wait for 15 minutes before continuing on with the next part of the testing.

Taking the dropper in hand before moving toward the mirror once more not bothering with putting his T-Shirt back on, Jess looked at the clock and at himself one last time before opening his mouth and started to deposit the entire amount of foul tasting liquid, after the first drop of water touched under his tongue that he found out how bad, under his tongue.

After the entire amount was deposited into his mouth, Jess found that he nearly was ready to puke not because his system wasn't use to liquid but because of how terrible that the liquid was. It tasted like someone had taken the vile from someone barfing into the dropper nevertheless he didn't have much time to complain much as a searing pain shot up through his body causing to double over withering in pain and convulsions as the next set of changes started.

Holding himself in a small ball trying to avoid from bumping into anything that might break easily with his body spasming for what seemed like an hour or so before settling down enough to allow him to stand up to look into the mirror to see what the next change was.

Surprisingly enough when he looked into the mirror he didn't see much change as everything seemed to be the same forcing him to drop his hands down his midsection pressing down lightly in the areas that had been hurting trying to find out what the chemicals had done to him. Nothing seemed to have changed forcing him to drop his pants and thong, which was the only thing that he would wear while at home that was female, to reveal his cock and the change.

Although it wasn't evident at first because Jess had always been small even at a teenager age which made him the blunt of many jokes at school, it had become almost smaller to the point that there was no use in using it in the future. All of a sudden a strange scent that he would've missed in the first place as he hadn't showered since coming homing. The smell was enticing and caused him to moan out to finger his anus finding that he could no longer get much pleasure of it. Driving a finger into his asshole, he found that it was difficult to get any kind of pleasure just from that but it seemed to die down enough for him to regain some sense.

Looking up at the clock to find that it was time to take the next step, he quickly rose to his feet finding himself being completely naked at that point as he headed for the box once more pressing his finger once more into the scanner. He found that he was almost drunk with a need to continue with the changes. It kept him from noticing the sting as he almost demanded that the next compartment open which it did after a brief second of scanning.

Inside he found a rather large pill that a bit larger than the first pill that he had taken that almost looked like a vitamin at first. Taking the note that sat beside it:

Take the pill with your evening meal and continue on with the test after you have taken the pill

The page seemed almost weird at first because each of the other tests required that he wait before continuing however he had found that his mind was so set on continuing that he took the pill & box with him before heading into the kitchen where he grabbed a glass of milk and some leftover

lasagna from the night before. Although he was still naked, he didn't have to worry about anyone looking in as there was no window that was level enough for anyone to see him there with no clothing on.

Taking a bite of the meal first, he swallowed the pill taking a drink from the milk to help with the pill to go down, Jess expected pain to continue however nothing seemed to happen other than a slight tingling in his chest causing him to moan once more.

Closing his eyes before reaching up to pinch and tweak his nipples which had suddenly become erect with the stimulus from early and drugs, Jess found that while he touched the breasts that it started to grow under his hand nearly doubling in size to the point that it would be harder to conceal.

Pinching the nipple sent an electric feeling shooting throughout his body causing him to rub his anus again causing his body to shiver throughout his body shivering with a deep seated need which caused him to wonder if he could satisfy. He would've continued with the administrations of each breast until he exploded when he realized that he needed to take the next medication.

Dropping his hand to the scanner once more not stopping with his administration of rubbing, he moaned loudly as his body continued to call out for need. The hiss of the fourth compartment opening forced him to stop long enough to find 3 pills inside as he reached over and took the instructions while allowing his hand to travel to one of his newly formed breasts.

Take one pill now and take one pill every hour 'til there is no more before you continue with the test

Dropping the pill into his mouth quickly, Jess noticed that his German Shepard Duke was pawing at back door wanting to be let in which drew his attention away from his arousal moving over to the door opening it enough for Duke to come in before Jess closed and locked the door again. "Hey duke. You hungry boy?"

Duke whimpered and offered a growl unsure of the strange person in the house, even though the human smelled familiar he wasn't sure forcing him to lie down in the corner. Resting his head on his paws as he continued to watch the strange human who continued going about eating, he started to smell a wonderful scent start to waver toward his nose causing it to twitch and cock start to emerge from its sheath.

Jess started to massage his new breast when the need for something to enter him caused him to groan finding that he couldn't sit anymore as he found no access to his hole forcing him to get down on the floor to continue giving him what pleasure he could. Duke jerked his head up noticing the strange behavior from the strange person as the scent came more heavily in the air causing his cock to come fully out of its sheath as he sniffed at the air.

Standing up, he moved toward the human before him as Jess didn't even notice the approach of the dog until Duke licked at the opening sending a thrill throughout Jess causing him to open his eyes. Now remember he wasn't one to consider him gay however the sight of his own dog licking at his opening caused him to nearly pull away from the dog with fright especially after seeing how aroused his own dog was getting.

Trying to get up on the chair that he had vacated before, the medication suddenly took effect sending a thrill and need for pleasure coursing throughout his body causing him to groan with need forcing him back to the floor allowing Duke to continue. Pushing back into the dog's licks with need, Jess found his hands continually moving to his breasts pinching and squeezing them which seemed to cause more of the scent to intensify and produce more giving a gift and more of an erection.

Pushing his nose up under Jess's rear forcing him to nearly turn over to all fours to allow Duke better access to his opening which didn't seem to bother Jess as the drugs seem to cause him to want to do whatever to please the dog at that point. Getting up to all fours, Jess found himself pressing his ass back teasing the dog almost causing Duke to have enough stopping his licking and rear up on his hind legs covering Jess's rear with his furry body.

Again this would've caused Jess to try and move away from Duke's advance knowing what would come next however his mind seemed to be clouded over with lust and need not truly caring about what was happening. Duke adjusted a bit thrusting his cock each time trying to find the human's opening taking a bit of time to find but when he did he thrust it fully into the fresh opening.

Jess gasped in shock from the pain from being entered by something bigger than his fingers and from the pleasure that he was getting from sudden entry forcing his mouth open letting out a low almost loud moan/groan as Duke held on to his waist while seemingly enjoying the mating that was accruing. Whimpering a bit, he started to thrust into Jess considering him as a bitch in heat especially from the smell coming from the human below him.

"Oh yes, yes...fuck your bitch good, boy!" Jess called out softly to the dog that was mounting him grabbing ahold of the dogs rear legs to hold him there longer wanting to have the awesome feeling last longer. Duke found that the bitch was receptive by the sounds that he or she was making feeling the friction around his cock diminish with extra slippiness feeling his knot going in and out of the opening becoming harder to pull out with each thrust.

This continues to go on until finally the knot was slammed in home forcing Jess to scream long and hard from the sudden forced entry into his opening. That also seemed to draw Jess out of his bliss finding himself in a new confused state almost from what had been going on. Looking around gasping from the sudden pulls from the dog in him, he tried to move however he found that it was impossible to do without causing himself more pain and that Duke had a death grip around his waist.

"What is wrong with me?" Jess asked as Duke laid down on Jess's back enjoying the after bliss of the mating giving Jess's neck a tender lick as a 'thank you' for the service. "Oh sure you would enjoy this unless you were in my position."

\*\*\*\*

Jess wasn't sure on how long he was tied with Duke but when the cock finally plopped out of his abused hole he let out a sigh of relief although the alarm for the green pill went off causing him to groan. After all of the stuff that he had just gone through even through the nice changes with breasts and a lot more feminine look to him, however the sudden lust for his own dog drew the line for him. It was completely strange as it wasn't something that he would consider doing willingly and it was unlikely that he was going to do something like that again.

Standing up feeling Duke's cumm dribble down his thigh leaking from his abused asshole, Jess headed back to the box once more taking out the green pill plopping it in his mouth under his tongue once more like the red one. Even though he thought about stopping with the testing, he found that the danger of stopping was too great.

The wall clock in the living room chimed for a new hour after his first pill of three stopped him from going to the shower. Reaching into the fourth box, he took out another pill taking with a swallow allowing for him to let out a sigh of relief before heading for the shower wanting to get rid of the sperm leaking down his leg.

Duke, after having licked his cock clean of the after juices allowing Jess to regain his posture,

followed after his bitch his tongue hanging out on the side of his muzzle looking for another chance at Jess. His cock already growing with each thought of future many fucks that he could have with this willing hole, in the past he had always gone after his owners mother anytime that she had taken a shower or gone about not wearing panties when needing some fingering release.

Nevertheless now, here was someone that he vaguely remembered as possibly being his master, was willing to allow him to have his way with him. Jess stopped at the door to the rest room closing and locking the window that was next to the room allowing Duke to eagerly lick at his ass causing him to gasp and moan once more as the chill sent a thrill up through his spine causing his nipples to call out for attention.

"What's wrong with me?!" Jess cried to himself as he leaned up against the wall which allowed his ass hole to open further revealing his open hole to the dog once more. Duke greedily licked at the hole hoping that his bitch would get back down on all fours and have another go at it with him, and the chemicals were starting to affect Jess making him to moan once more like a bitch in heat.

"Oh god! I can't stand this! More!" he cried pushing his ass back which started to balloon out rounding out really nicely moving apart the cheeks allowing Duke to have better access to his hole. Further up his body started to thin out allowing his hips to widen and waist thin not enough to make his cock look weird between feminine hips but gave him the look of a desirable woman.

The rest of the hair for his body fell out on to the floor leaving his skin tan like and smooth completely which seem to glitter with sweat coming from being pleased. Getting his head cleared up enough to push him away from the wall and run into the bathroom closing the door causing Duke to yelp in pain from having his muzzle nearly closed on by the door after chasing after Jess's dripping who. This after the licking wasn't only leaking cumm.

Breathing hard feeling his chest now about the size of a B cup heaving as his arousal seemed to calm down long enough for him to get his senses back in order again feeling the lust and need for a second go around dying down enough that he got his first really look of what he looked like.

His features had completely turned almost to the feminine look his five o'clock shadow leaving his face leaving his face smooth and with a light tan. His eyebrows were starting to thin out a bit with his head hair getting a little longer but normal for him. Looking down, he found that the areola on his chest had grown to twice their normal size about 1 inch in diameter when not erect.

Further down, he found that his cock had slightly grown although diminished that he could pass off as a female almost in clothes. Reaching down he allowed his hand to roam down his ass enough to feel the extra changes to his waist, hips and thighs.

Looking back up he felt himself getting aroused by the very sight of himself figuring that he could get laid either way with a bit of touch up.

"Get ahold of yourself, Jess." He told himself finally reaching over and throwing on the water to warm up before reaching into the laundry hamper next to the sink searching for some clothing that he could wear as he wasn't about to go out again wearing no clothing especially with his dog out there.

Sitting down on the toilet to allow his head to clear and figure out what was going on, Jess figured that since he had started taking the drugs which had started the wanted changes however this intense desire was something new. Thinking back about the notice in the ad about the testing, he clearly didn't remember anything about wanting to have sex with animals or having one enjoy giving him a rim job would cause him to act like this.

Looking at the time he realized that it was well after 5 pm meaning that any place that the company had set up for the state business was probably closed and with it being Friday it was unlikely that the office would be open. This forced him to figure that he would have to be careful with being around Duke until he could visit the office building to find out what's going on.

Grabbing a pair of panties, a sports bra that he figured would actually fit his new chest, a sweater that was loose enough to hide his breasts and the bra and going with some baggy pants with ties that would allow him to tighten them to complete the outfit. By that time, the shower was warm enough to step inside hoping to warm up enough that he could think clearly.

However once the water started dripping on his breasts as soon as he stepped under the water, the areola's became erect sending an extra thrill throughout his body groaning once more with need. Finding that since his dog was outside away from him, Jess reach down behind his back as he started to massage his aching hole which seemed to become more sensitive. Upon touching it, he gasped in desire moaning deeply as he tweaked one of his nipples as he started to hump his hand wanting release once more.

It took him a few minutes to become frustrated with barely able to please himself enough, Jess gave up before starting to clean up his hole enough to stop the cumm from leaking giving him hope that it was all gone. Every time that he touched his breasts it sent a shiver down his spine and a dull almost intensifying heat to race throughout his body causing him to hurry up with the shower allowing his body to rinse itself off not wanting to cause too much ache for his body.

Feeling that he was good enough, Jess shut off the water quickly as he felt like he was about to explode from the electric feeling going throughout his body from the touches of water. Gasping as his body temp slowly went down allowing him to get enough sense into his head to dry off and start putting on clothing.

Pulling up the panties which pulled up pretty much easy as his only sensitive area was his hole at that point as it seemed to fit very nicely snugly going into the middle of his ass cheeks avoiding from rubbing the flesh there. Since the sports bra was able to be pulled in over his head, it fit nicely around his rack and since it wasn't made of silk or some material that would rub up against the nipple or breasts themselves it gave him time to sigh in relief.

Pulling on the rest of the clothes as the clock rang the final hour announcing that it was time for the third pill; he forced himself to open the door revealing that Duke had disappeared into the house allowing him some time to let out a breath of relief. Tightening up his pants once more, he continued into the living room not paying attention if Duke was there or not as he took the extra pill slipping it into his mouth.

As soon as the pill dissolved, he found the effects hit him hard causing him to groan as every part of his body became super sensitive causing him to moan loudly to the point that it seemed to catch the attention of a passing UPS delivery wolf who was stopping there anyways to deliver a final package that was to be the last of the day. Danelete Silverwolf, a herm wolf about 5' 10" about 200lbs of pure muscles and sexual energy. Being a herm didn't help hir rep as it took some time for hir to find the job itself, but also the fact that shi had found that each time shi lay hir eyes on someone sexy or hot, including male or female depending on their sexual orientation.

Because of her being a wolf anthro shi found that shi was always the dominate partner in each encounter causing some problems to arise that hir boss required hir to see a doctor about getting something to help with the dominance problem. Shi was about to take hir pill that would stop hir strong desires when hir keen ears picked up the sound of sexual tension forcing hir cock to start to

push up out of hir sheath and the need for released forced hir to forgo taking the meds.

Grabbing the package, shi made way toward the door suddenly getting the scent of a heavily needed person on the inside that almost smelled like the person was either going through a period or is in heat. Giving the front door a knock trying to control hir own needs, found that no one answered the door making hir go around the back where the kitchen door seemed unlocked. Pushing the door open and peering inside, shi found a amazing sight before hir.

Laying on the floor writhing on the floor was what appeared to be a human female going through the opening signs of a possible organism who had a finger thrusting into her ass while another was pinching and pulling on her breasts. The female was turned away from hir slightly but by the way that the human was moaning and the feminine look, Danelete figured it was a female. Shi was about to placed the package on the countertop and just leave when the human turned toward hir revealing that it wasn't a female completely as a small but good size cock lay between the humans thighs.

By the sight of the so-call transgender withering on the floor caused hir cock to push up through hir pants and lust and the need to fuck and dominate this human fill hir mind. Closing and locking the door, shi moved toward the human as shi began to remove hir clothes hir eyes never leaving the moaning form on the ground.

Jess withered with need as every move that he made caused him to become more aroused as his hole that all ready ached this time needed to be filled any other way. He had half expected to find Duke enter the room with a rush eager to continue the fuck fest as soon as Jess had hit the floor withering with need. Time seemed to die down as he barely noticed the Anthro wolf enter the house until the wet feeling of a tongue licking at his aroused nipples caused him to groan even more.

His eyes being closed with no care at all he pushed his chest up toward the wet feeling wrapping his arms around a furry head as a different furry appendage started rubbing his hole. Figuring that it was Duke's cock, he pushed back against the member, he finally felt a advantage of getting relief. He felt the wetness leave his breasts feeling a warm fury body pressed up against his as the fury member left his hole to move up to take the place at his nipples beginning to massage them again.

Heavy breathing on his neck caused him to moan and open his eyes finally to look into the face of a anthro wolf that would've sent a frightening fear however that wasn't the case as the fear was replaced with desire as he didn't notice that it was a female not that hir cock was fully erect. All he cared about right now was to get fucked or at least some relief.

"Please...fuck me...I need it bad." He pleaded with the wolf not caring if it would mean that he was gay or not, he needed some release. The wolf seemed to smile as it leaned forward pressing its muzzle against his lips like a kiss which he accepted readily keeping his arms wrapped around its neck as shi picked him up in hir arms taking the human with her toward one of the bed rooms in the back of the house.

Coming into the room, Danelete kicked the door close forcefully throwing the human down on to the bed before pretty much tackling him forcing the human on to all fours before lining up hir cock with his hole as shi bent down whispering into the humans ear. "How do you want it , you filthy little human?"

"Please...fuck me until I am pregnant!" he yelled as his mind just grabbed the last word finding his mind clear for a split second before he found himself demanding relief pushing his rear back against the wolf.

"That's my good little bitch." Shi said pushing hir pulsating member against Jess's eager hole

teasing almost to the point that caused Jess to black out. Nibbling on his ear, shi took ahold of both of his breasts before ramming his cock home in one thrust causing Jess to scream out in pain and in pleasureable lust as he found it was exactly what his body wanted more. Squeezing and pulling on the ripening nipples and breasts as shi rammed savagely into the hungrily human's hole who continued to push back against the cock wanting more with every driving second.

Like his time with his dog, Jess found that the lust and drive for more rough sex seemed to die down allowing him get some of his thinking back however by the time that it was almost cleared up, the wolf seemed to get a surprise of his own.

At the time that the two had been engaging in sex not noticing that Duke, who had after being locked out of the bathroom while trying to get to Jess once more, he had gone about hiding in one of the bedrooms hoping to surprise Jess when he came back in from his shower. When he had heard Jess moaning and the smell of a bitch in heat again rose, he was nearly compelled to rush in and start humping away at Jess only to hear the second voice which caused him to wait.

When the two arrived and the wolf that he recognized was offering a aroused female scent of her own to the mix caused Duke to wait for the perfect time. When the wolf bitch was bent over his master fucking away roughly at his sweet hole that Duke had claimed first he made his move moving silently until he was behind the wolf finding the sight to behold.

A set of healthy looking balls were bouncing up and down driving a rather big cock into a opening just before it with the sight of the knot which seemed to be as big as a melon pounded at his master's hole hungrily looking for access determine to plant seed. Above that were a pair of wet slick lips clearly aroused by the rough sex which caught Dukes attention.

Crotching down waiting until the right moment where he was sure that the wolf wouldn't turn around, with his cock fully extended and ready to mate, Duke pounced on to the wolf wrapping his forepaws around the wolves waist driving his cock straight into the wolf's own opening.

Danelete who was so contended to getting his rather large knot into the human below him was shocked from the sudden extra weight on his own back but that was double when shi felt the sudden intrusion into his own overheated sex that had become like that from the rough sex. Before shi could react, shi found that his knot had finally gained entry into the poor human's hole causing him to scream/moan from the rough entry officially tying them to each other for however long. This also forced him to stay where shi was until the knot when down or the dog to give up with its assault.

Jess lay there gasping from the full feeling that the wolf had given him as his cum began to fill him leaving him feel bloated from the amount of cum shi was depositing into his body. Rubbing his belly, he could tell how big the knot was as he gave the cock a few tugs to determine how big shi was feeling it just below his stomach.

Danelete let out a yelp from the tugging forcing him to hold on to the human as shi hissed into his ear holding him tightly against his body that way he would injure either one of them. Duke on the other hand was having a blast as his own orgasm was close at hand all ready aroused wanting released. Whining himself, he shoved one last time into the bitch knotting them together for a three way as the three collapsed in a balled heap falling asleep.
