BEASTIALITY STORIES

(c) 2022 by Michelle M.

My dad is a world renowned Zoologist, working for a research facility discovering new species on the planet that have never been studied before, in many cases no one knew they were here.

I joined the family a few years after he and mom were married, even though I was born a male, it didn't take long for all of us to realize I should have been a girl. Mom caught a viral infection when I was about 8 or so, try as she might there was no defeating this one, leaving dad and I alone from then on.

By the time I entered my teenage years, dad agreed to have some physical changes take place with my body, choosing to leave my penis as is, small boobs were added, estrogen levels in my body were changed, skin became soft, features softened, hair allowed to grow out, a new home, new school took me from Nick to Nikki. School that year was the first time I felt like I had finally become what I wanted and needed to be.

High school brought on a new change, my penis had developed to a nice large size, bigger than most males, more like a black man's size. To go along with this, dad was easily convinced to let me get an enhancement to my boobs, making the Double D tits and the 10 inch cock turning into a shemale very seldom seen or enjoyed any place outside the porn studios.

Entering college, majoring in Zoology like my father, during summers he took me along on research trips when possible. During these I found it less complicated if I kept the surprise between my legs a secret, showing off as much of the upper body as legally possible, keeping everyone taking second looks at me when possible.

Graduation brought a job offer, joining dad's team, our first real assignment was a rumor telling of a new species of cat, or cat like animal that seemed to have human features. The first thing for me to search, looking for unauthorized labs in the area, to see if any experiments were being conducted. There were several labs in the immediate area, but none seemed like they were capable of doing something like this.

During all of this prep work, more and more stories came in, now telling us the human cats were seducing the local village people. Again something we new was not possible, but the stories kept coming in, all in approximately the same area.

The general committee decided to dispense a team, I had been included, this would be my first real trip, to see what if anything had some merit.

I was still keeping my secret, between my legs hidden, so arriving as a female, given a tent all my own.

The original plan had us staying for approximately three weeks, I was so surprised when on the first night, I heard a scratching at my tent opening.

Carefully peeking out, surprised to see a small looking cat, but more like a pet one rather than one that was wild. Opening the flap all the way, inviting him in. As he passed, it was obvious he was all male, more so than I had ever seen before. A huge cock hanging down between his legs, when he passed a new scent seemed to fill the tent, circulating around my head, making me dizzy, eventually knees buckled, dropping me to the floor. passing out, not aware of any danger from the cute kitty.

Waking at an unknown time later, more cats had joined the first one. When I got ready for bed my normal sleep wear was a large men's shirt, covering me, but allowing me to feel almost like being

nude. Laying on my back, the first one that came in, was licking my rock hard shaft, somehow sucking on it, what it was doing had me in an erotic haze, not really sure what was happening. Two more cats were working on my nipples, they like the cock were harder then they had ever been, a strange tingling sensation rushing through them. Then one was on my chest, kissing me, this ones tongue exploring he interior of my mouth, the saliva tasting strange, making me whine and whimper, realizing something was happening to me, but unable to stop it, feeling a strange drug surging through my body, changing me.

Not sure how long they were molesting me, finally my poor cock exploded, sending jets of cum all over my legs, the floor of the tent possibly on some of the cats. As silently as they joined me, they left, leaving me on the floor, staring at nothing in particular, feeling better then I have ever felt in my life.

There wasn't any sleep for me that night, the cats had done something to me, but I had no idea what.

Hearing the crew fixing breakfast, washing off the dried cum on me, getting dressed, joining the crew, dad looked at me, "You look tired sweetheart, you OK?"

Before I could answer, one of the male researchers came out of his tent, "Did anyone else see the small cats come in last?"

To my surprise one woman embarrassed said she had mistakenly let one in, then several joined the first one, a couple of males finally I also told them I had heard the scratching on my tent, like the others several came in, but no one said anything about what they had done to them, if they did to everyone what they had to me.

Dad took me aside, "What did they do to you?" He was one I knew I had to be honest with, telling him what had happened to me, and what I felt with the changes in my body.

He was more then concerned with the fact we were here to looking into a strange cat behavior and the first night many of our staff had been assaulted, possibly drugged by a strange group of smaller felines.

He had some blood drawn from me, but by midday, I could feel the sexual feelings arousing my bodies senses were heightened, even though I couldn't see them, there were definitely more cats just on the perimeter. Looking around the group, everyone that said they had seen the small cats, were all like me, eyes hazed, sniffing the air - they had been drugged just like me.

As soon as everyone turned in, slipping on my night shirt, sneaking out of my tent, on all fours crawling just past the cleared area, more cats were waiting for me, the first one, slipping a tongue deep in my mouth, another one, licking my anal area, exciting me back there. The tits and cock was assaulted, making my legs spread wide apart, dropping to my elbows, the way they were seducing me, had me shaking from need.

Tonight more drugs were added, multiple orgasms took over my body. While I was in this position I could hear multiple moans and whimpers coming from all around the camp.

The sun was staring to come up, when my companions left me. Standing, cum all up and down my legs, in what felt like a permanent haze, didn't bother to change, my cock showing proud and hard, took a seat, boobs hanging out in full view. Dad joined me, it was obvious he'd been drugged as well, a much deeper drugging then I had experienced my first night.

Everyone in camp joined us, most nude or some form of nudity, all eyes were lost in space, looking

but not really seeing anything, no one noticed I had a penis.

Nothing much was done as far as work, some talking taking place, around noon or so, what had to be close to a hundred felines came in among us. This time I could see males and females in the group. Dad dropped down on his knees, a female backing up to him, his cock easily sliding into this ones pussy. That was when a pretty female backed up to me as well. when I pushed up inside her, my whole world started to swirl out of control. I've never felt anything like her pussy felt wrapped around me. Some others worked on my nipples, my mouth, along with my girly hole.

Our female staff, were giving blowjobs, forced to drink the cum they provided. None of us had any idea we were being prepared for something.

When we had been completely drugged, the small cats left, leaving the entire camp staff in a sexual haze. Apparently the drugs they had delivered needed time to take full effect.

I had made it back to my tent, laying on the floor, body humping air, writhing back and forth, pulling on the super sensitive nipples, my cock throbbing.

The next morning all of us had gathered, most were totally nude, my dad looked better then I can ever remember, looking around everyone looked the same, better condition, skin more alive then they had been in a long time, if ever.

Dad sat down by my side, his shaft was rock hard, just like mine. Somehow the drugs we had been given took care of any inhibitions we may have had about sexual encounters. Dad and I were stroking each others shafts, some of the staff were making out, others actively fucking, nothing seemed to be off limits, the smell of sex was enveloping the camp.

Reaching over, stroking his shaft, seeing the excitement in his eyes, for some reason, he leaned in close, kissing me, not a typical father/daughter kiss he always gave me, but this one was loaded with passion, promises of what was coming. One hand massaging, pinching my boobs and nipples, all the time his tongue exciting me, by exploring my lips and mouth.

Becoming more and more aroused, I reach out, taking his marvelous stick in my hand, the feeling so soft, and yet firmer and harder then I've ever felt.

Looking at his eyes, both of ours filled with lust, he easily picked me up, moving so I'm straddling his legs ... lowering me down"Guide me up in you ... oh fuck yesin you"

Reaching between my legs, guiding the head of his monster between my cheeks, just up inside me ... no pain, no pressure ... apparently the cats had loosed my opening ... as soon as I feel him all the way in me, kissing him again ... pulling back, "Oh daddy, you're fucking me, you're fucking your son, fucking your daughter ... ohhh feels so good"

His eyes looked glazed, but somewhere in there I knew he was aware of what we were doing. Holding onto my hips, when he raised up, I'd push down, sending him as deep inside me as possible.

Glancing around, the staff were all enjoying a full fledged orgy, sex every way possible was taking place, while my dad kept pumping in and out of me, sucking on my nipples, suddenly the familiar feeling rushed over me, causing my cock to stiffen, exploding streams of cum all over both of our legs. Dad was still pumping a few more minutes, without giving me any warning, I felt the warm liquid start to fill me. Load after load emptied out of him, leaning into me, panting from exhaustion, whispering to me, "What is happening to us? All of this from a few small cats"

Shaking my head, still enjoying him being in me, "I have no idea why we were drugged like this, nothing said they were small cats that had seduced them"

The rest of the group were like us, resting from the first explosions, when suddenly the most stunningly beautiful creature I've ever seen, came out of the jungle, walking upright, definitely a feline species. Big fur covered breasts, nipples large and rigid, no sag at all in the big boobs. A flat tummy emphasized the massive size of the cock this animal was supporting. Sticking straight out, the whole body covered with light cat type of fur, the shaft being pink and what looked like moist.

Seductively she or he moved towards dad, stopping just inches in front of him. My father is just over six foot, this cat was almost as tall. The long tongue entering his mouth, then a deeply passionate kiss, reaching up with the fur covered paw, pulling him into her. The two cocks seemed to be fighting one another, her erotic looks boobs rubbing back and forth on his chest.

The kiss was having an obvious effect on him, moaning, whimpers as well as body shaking told everyone she had complete control over him and his body.

When she broke the kiss, his eyes were staring off in space, no expression on his face, mouth dropping slightly open. She moved behind him, bending his body down to the back of the chair, that massive cock slipping in his ass, as easy as anything could be. His face still didn't change expressions, but you could tell this was not something he had ever experienced before.

Grabbing his hips with her paws, a hard steady rhythm of in and out started. I watched, like the rest of the staff did, captivated in amazement at so many things. The cat was human like, just like the reports had been telling us, it had both breasts and cock, covered in fur, some kind of a drug was in this heard of cats saliva, the small ones had changed us and now this big one had somehow zombified my dad, the head of the research team, and to add more, it was now fucking him, longer and harder than any animal that I knew of could sustain this.

Eventually a blood curdling scream came from this animal, the claws sunk into the poor mans hips, she convulsed deep inside him, making it obvious she was filling him full of whatever seed she carried.

Her body kept pumping what ever it was in him, he was moaning, writhing, tears in his eyes, but some how her shaft had sealed the opening, nothing was leaking out, just what looked like her body still pumping cum in him.

Finally she stopped pumping, but remained in him, her paws coming around rubbing, teasing his breasts, small bites, the teeth breaking the skin on his shoulders, neck, down his arms even in the top of his back.

We were all mesmerized, his head was down, but it looked like the eyes were clearing, he was aware of what was happening, or at least it looked like that, finally when she pulled out of him, nothing came out of his ass. Turning to her, the two kissed, a truly deep and passionate kiss, hands exploring, paws rubbing all over each other. How long this lasted, I have no idea, but when they broke, she took a seat, he crawled up in her lap, that gigantic cock resting between his legs, turning to everyone, "I have no idea how it happened, but my lover here has knocked me up, i'm pregnant" Then he kissed her again, just as multiple duplicates to her entered our area. Various colors, but all had tits and cock, all were beautiful ... "Don't be nervous, you'll love what they do to you"

I stood just as a large jet black one kissed me, as soon as the tongue entered my mouth, my world went blank.

I became aware of what was happening, just as my new lover was pulling out of me, my tits were heavy, body more alive than I ever knew possible. Like dad I crawled in my new lover's lap, she played with my tits, glancing over at dad, he had developed small boobs, it looked like they were being prepared to nurse his soon to be children.

Rubbing my tummy, I knew in my heart I had been knocked up, just like our entire staff had been.

Dad called the home office, telling them they had located the herd of felines and they were in deed seducing humans. When asked if he needed additional staff, he requested the entire company to join us.

When they arrived, it was obvious everyone was in the same condition, pregnant. The men all had small boobs, but more than capable of feeding the new coming newborns, Dad was asked what was going on and why there were so many small cats, surely they aren't the ones seducing everyone? My father smiled, "We've all had a long day, enjoy the kitties and we'll talk in the morning"

That evening, my companion slipped into my tent, bringing me close to her, slipping that wonderful cock up inside me, this time a slow steady rhythm of in and out ... have no idea how long this went on, but it was early morning when she emptied a load inside me, all the time caressing and massaging my boobs.

The next morning at breakfast, the new staff looked hazed to say the least, some had some clothing on, most did not.

Dad welcomed them, had a smirk on his face, all of us were nude, but this time no one seemed to care. He told them of the large cats, the ones that walked on two legs, the fact they were both male and female and that the small ones had somehow changed all of us into becoming receptacles for their continual growth of new kittens."

The director of the whole institute looked at him, then down at one of small cats that had spent time with him, "You mean these little ones, the ones you encouraged us to play with, they have drugged us already?"

I was close to Paul, moving to hug him, "You're going to love the way they fuck you, I promise you won't be disappointed"

Thanks to us, the cat population is growing, all of us took over a small town, we give birth to a new set of kittens three times a year. Love this life.
