## BEASTIALITY STORIES

(c) 2002 by unknown

It was a hot summer morning as I lay nude in my back yard soaking up some early morning sun before it became too hot. My husband and I live in a rural part of the state of Texas on a large ranch. Sometimes we don't see anyone for weeks unless we go into town for supplies.

We have a large area fenced in around our pool, not so much for privacy mostly to keep the animals out of the yard. We always go around naked in the morning or when we do yard work, it's just too hot to wear clothes and no one is around anyway.

Anyway, I had been out for about thirty minutes when I heard a noise and raised up on my elbow to see what it was. Not seeing anything, I lay back down and continued to sun, then I heard it again. I noticed the gate to the back of the fence had been left open and thought I would close it before a stray dog or something got in and went over to shut it.

I got up and walked to the back corner of the cedar fence surrounding the pool and reached for the handle when I heard it again. My curiosity getting the best of me I went out the gate to investigate. I had taken about four steps when I came face to face with a large wolf, looking me straight in the eye.

Frightened I started to back up. The wolf sensed my fear and started to follow me as I stepped back through the gate. Before I could slam it shut he pounced in.

I was terrified now, as I am a small woman about five foot tall and 100 pounds and knew I was no match for this wild animal. I was naked and defenseless. Looking toward the house I was at least 100 feet away, but I had to try and get there.

I made a mistake, I turned and ran. I knew as soon as I turned that I had done the wrong thing. The wolf hit me in the back as he lunged and knocked me to the ground. Dazed I lay there as he circled me growling and sniffing. I started to crawl toward the house on my stomach as he walked around behind me and stuck his nose in between my legs from above.

I froze as he growled and took a swipe at my cunt with his large rough tongue. I screamed for Jerry as he licked again, then remembered he was at the barn feeding the stock and could not hear me. I started crying and said, "Git dog" as he continued to lick the lips of my cunt, while growling. I knew if I moved he might tear me to pieces at any moment.

Suddenly, from nowhere three more wolves appeared, and joined him at my rear. I knew I was in trouble. The wolf that had been licking me came around in front of me and looked, right in the eyes as if to say your mine, and there's nothing you can do.

That's when I noticed his large dick hanging down from its sheath. I have seen dogs before but the wolf's dick was huge, it must have been 10" long and it had not even extended all the way out yet.

The others had moved in on his prey and were licking my ass and cunt now. Looking up and seeing what was going on with his ears straight up he jumped to my rear. I could hear them growling at each other over me as they started to fight.

Now was my chance, I eased up on my knees and started to crawl slowly toward the house. I crawled to a large tree that Jerry had cut a few days earlier, but had not removed the stump yet. I raised up and got almost to my feet when the large wolf jumped over and met me face to face. I stopped dead and covered my head with my hands and arms. I was now laying across the big stump, shivering in fear.

I was white as a sheet, shaking, and scared shitless as I felt the tongue of the largest wolf again at my cunt from behind. He had won the fight and now I was his. His head began to bump my legs as he growled and nudged them apart, moving his head from side to side. He kept nudging until he had me spread wide, then he raised up and laid across my back.

He was so large that he covered my whole body. His head extended about a foot in front of mine as I lay trapped below him. I could feel something warm and moist slapping around my ass as he positioned himself for the mating of his new found bitch. The head of his dick touched the entrance of my ass and I jumped. My mind was going blank with fear, but I knew could not let him in my ass or he would kill me.

The only thing I could do was raise my butt to keep him from entering. As I raised up I felt him stab at my pussy. Tears rolled down my eyes as his long wolf cock found its mark and started to enter my cunt. I screamed as the first 6" went in.

My cunt is small and the wolf was having trouble getting in me. With 6" of wolf dick in my pussy I started to wiggle around to stop his entrance, but this only helped him, as another two inches slipped in.

He started to pump as I got a little wetter from his fluids and managed another few inches. The pain was terrible as he continued to hunch. I didn't think I could stand it and tried to get my hand under my belly to push him out, but with no luck.

The wolf was still pushing and finally got his massive cock all the way in me. It had to have been 12" and as big around as my wrist. He was hunching faster now and his lubricating fluids were flowing which eased the pain somewhat but not much.

I looked up and could see his tongue hanging out of his mouth as he fucked me harder, his large balls slapping my clit. The lips of my cunt were stretched to their limit. He was actually pulling me back and forth with my pussy as he humped me.

I felt his pace quicken and all at once he pushed hard and stopped, I felt his hairy balls press against my cunt. That's when I felt it start to grow. I was terrified as I thought of being knotted with this wolf. The knot grew to the size as a softball, with me groaning in pain as it inflated and stretched me further.

Finally the growing stopped and the big animal raised up, lifted his leg turning around butt to butt with me. Growling at the other members of the pack who now had moved in closer, he started to pull on my cunt.

I raised up and backed over the log with his dick still in me. As large as he was my knees barely touched the ground. My ass was more or less suspended in the air, held by his knot. I had to raise up on my feet to keep him from tearing my pussy apart. He would lunge at the other wolves and take me with him. All I could do was try and follow him around backwards on my hands and knees.

After about ten minutes his cock popped out, and his cum gushed out of my cunt. My knees hit the ground but I was too exhausted to move. With my ass high and my shoulders and head on the ground I was still in the mating position. I felt another wolf raise up on my back and enter my now slippery pussy before I could move. He wrapped his legs around my waist and pulled me to him. For the next hour I was fucked by the other three, but none had a dick as large as the leader of the pack. While I was knotted with the last one I could take no more and passed out.

When I woke they were all gone. and I was lying on the ground outside the rear gate. They must

have dragged me there while I was knotted to one of them. I eased my sore body up, went back in the yard, shut the gate and went to the house and showered.

What was I going to tell Jerry? Would he believe me or not? I decided not to say anything for a while to him about it and waited for him to come home.

About an hour Jerry came in and told me that he had seen a pack of wolves prowling around but not to worry they were probability just looking for a bitch to breed with. I said thanks a lot and said nothing.

*The End*
