BEASTIALITY STORIES

Working for a government agency in the Democratic Republic of the Congo, specifically in the 'Great Ape' division – my department oversees the various animals falling in this category. My own duties are with the various troops of Bonobo's we look after – needless to say with a species so lovable, so sexually exciting at all times, my own personal arousal never lacks excitement.

My specific department has 6 females dividing up the three troops – recently we had a shock when one of my closest friends announced she was pregnant, then insisted she had not had any interaction with any human males, only a few of the large Bonobo males in her area.

The company's policy is vague on interacting sexually with the animals, since these guys live to have sex of any and all kinds, male to female, female to female, male to male and occasionally teaming up to have a group orgy – that can carry on for hours – in some cases days.

But the fact Irene was claiming the father had to be one of the big males, had the government officials concerned so much so, they immediately moved her to a private hospital for observation and care. That was the official line, those of us in the field knew something like this could rock the scientific world, since it was not supposed to be possible.

That was the first shake up taking place – Irene had worked in the northern region with her companion Chelsey – Jessica and I worked in the southern area with two additional ladies covering the central area – the department was in the process of interviewing potential candidates to replace Irene when Chelsey didn't report in on the weekly call in we all are required to complete.

A search of the area was conducted – but no Chelsey – going back to talk more with Irene additional information was discovered. One this group of females had discovered a plant that contained a root, when soaked in any liquid, started to give off a new type of drug, one that plunged both her and Chelsey into a sexually erotic haze, not only being ready to be fucked, but actually begging the males to do so. Secondly once the drug was introduced, the two of them became submissive slaves for the whole troop to enjoy and play with. That was when her conclusion scared the division to death, "I doubt Chelsey is lost, but instead kidnapped, they all seemed to sense both of us were pregnant due to this new root – when you took me away, it makes sense they'd protect her by kidnapping and hiding her from any of you"

It seemed Irene knew a lot more, she hinted the males somehow had become much larger, but she didn't give specifics – also there had been some local females from the village who had been helping – but again she stopped talking, especially when she realized she had also been kidnapped and there was no way in hell she'd ever be able to keep her baby.

Susan, who is our direct supervisor, flew in to meet with Jess and me as well as the two ladies covering the central region. The main reason for the meeting, first to make sure we had not noticed strange behavior from our animals and second to discuss how to find Chelsey – then she gave the real reason, "If she gives birth to a half human half bonobo and the world finds out about it – all programs would be in danger of surviving"

That was when she asked for volunteers to go to this area, see what we could observe – adding to that – a tracker placed under the skin would keep us safe incase we were kidnapped and put us on birth control until we found the missing colleague. Jess and I were the most experienced as well as being concerned about both girls, we volunteered to go north and see what was happening.

Jess and I talked about what we may be facing on our way, neither of us have been pure, daily we enjoy sexual encounters with the females in our troop – I've always kept my shorts on when I'm with one of the males, but the number of blowjobs I've given, the amount of monkey cum I've swallowed

has become part of a weekly diet I look forward to.

Adding to the sexual haze we were both enjoying, Jess and I had become passionate lovers – so sexually aroused when we got home each night, occasionally we'd just go to bed, but most nights we'd fuck each others brains out before we called it a day.

Driving around the area in our side by side, the back loaded with our gear – we noticed something was different about this group than we'd ever seen before. The females all looked hungry while they watched us driving by – the males had a smug look on their faces – you'd think they knew in time we'd be on our knees while they pounded between our legs.

Stopping to get out and walk around, I was greeted by a large, really good looking female – walking up to hug me ... as soon as our arms linked, one of hers dropped down to squeeze my bottom – at the same time pressing her body against my Double D – boobs, then slowly moving her body back and forth –

I wasn't sure what she was doing that was different, but for some reason, the way it was happening had me somewhat confused, definitely becoming excited. She added some kissing, an act not often shared between the primates – they kiss our bodies, but usually not in a passionate way. I was being excited now.

Hearing Jess whimper told me both of us were in trouble – this group had the ability to seduce us, something we'd never faced before. Suddenly I realized my shirt had been undone, two additional females took advantage of each breast – both nipples began to throb – the next thing surprised me even more .. my work shorts are closed with a button – somehow they had learned how to undo it As they were pulled down my legs – at least two additional females attacked me – one specifically working on my back door – an area I have never been played with – just as a single digit was eased up inside that area, a mouth with the most talented tongue I've ever experienced started to explore the sensitive area between my legs. I keep that area shaved bald, so the excitement comes quicker – the area more easily excited How they had ever learned to seduce as a team was unheard of previously.

Being stripped completely, the group eased me to the soft grass, now being completely nude and totally under their control That was when the one who made contact with me first, showed me a yellowish/greenish root looking item – shiny with obviously a gel like substance – I knew what I suspected it was... she used it to circle the lips of my pussy – the effects were instantaneous.. My back arched, legs flew open – it felt like what I could have imagined a hundred Spanish-Fly might feel like if it had been real – the need to cum to have some relief – hit me like a ton of bricks.

She kept it on the edge of me, just touching the outside, the drug this thing contained, was like nothing I'd ever imagined. Jess was screaming and begging them to let her cum, in my heart I knew they were doing the same to her that I was experiencing.

The way they were using my body, that damn drug being just sampled, had my whole body shaking, writhing from side to side ... knowing I'd do anything to have some relief – it was building and building. Eventually my mind started to shut down, the sight started coming in and out of focus – then the eyes rolled up in my head – everything was lost

At some point she pushed the whole thing inside me – causing me to gasp, legs shooting wide open, a scream like I've never heard from myself – totally unexpected my body exploded over and over – a steady stream of gushing liquid flowing between my legs – all of the little ones that had been working on me, were there to drink, lick and swallow all I had to give.

Laying on my back, I could feel that strange root like object was now dissolving inside me, being absorbed by my body - I felt like I had been plunged into a hypnotic state, eyes wide open, but not really focusing on anything -

A big male picked me up easily carrying me to some unknown place then deep inside a cave like area, placing me on my back on some soft moss ... I could hear water running close by, then. Chesley was the first to come into view - it was good to see her, but it was also obvious she was indeed very pregnant. I could also see Jess, who was just a short distance from me, as well as two native girls, who were also pregnant but not reported as missing or connected to our two ladies.

She cleared up a lot of questions we had, first when they both had enjoyed the strange root that we had just experienced - it wasn't long before they knew both were pregnant. As soon as the drugged root was introduced, both of them were kept in the village, but Irene escaped going for help - that's when they took the three of us inside this area to watch over us until we gave birth.

Jess had finally joined us in the conversation - we were also told one more session with the mystical plant was in line for us, then the big males would come in for a few days. My companion laid her head on my lap, looking at all of us, "I doubt the birth control shots we were given are going to be much use for us, but who knows - the way I am feeling right now, a good month or more fucking might not be bad"

That brought a burst of laughter to all of us - it also brought in a bunch of females we went to work on Jess and me. It only took moments for me to be erotically flying from their touching, licking, pulling on my nipples - digits pushed up inside my back door area, while the lips between my legs were being teased and massaged, causing me to start humping the air, my whole body writhing from the sexual arousal once again they were doing to me.

How long they kept me in this state, was totally lost, all I know is I needed to cum, when I saw the terrible root, slowly being rubbed around the entrance to my sex area, just like before I felt the instant spike in the need for some release - begging them not to push it into me, either they couldn't understand or they just didn't care - the tip kept circling my opening, my body literally bouncing off the surface - Suddenly the entire length was pushed all the way in - my body arched, I screamed and exploded - wave after wave of climaxes washed over me ...

Like before, the group was between my legs enjoying what they had created - this one took longer to be absorbed into my body - there was nothing I could do, rolling on my side, a restless sleep overtook me ... it was obvious what was coming and I was more than worried - what if they couldn't get me pregnant - what if they did - what would happen to me ... was I doomed to be in here becoming pregnant over and over? So many questions, no real answers.

The next morning I woke late, my body felt so different - lightly rubbing between my legs made me moan - several females helped me wash off in the stream - there were lots of fruits to snack on - plenty of water - then the females moved to the three that were already pregnant, that's when I saw the big males come in - they were nothing like the males we had in our troop - these were bigger, their cocks swung freely closer to the size of a small horse instead of the normal primate. The closer they got to me a strange funny feeling was building between my legs - Jess let out a whimper, then in a whisper, "OMG Nikki they are going to fuck us with those monsters - we'll never be the same"

One walked up close to me, for some reason I knew exactly what he wanted, reaching out, taking hold of that monster rod, stroking it, then licking the underside, caused him to howl - I licked the head, more howling - his two hands taking hold of my head .. keeping it there- trying to force more of him in my mouth than I could take - I'd given more than my share of monkey blowjobs, so I knew

exactly where his sensitive spots were - making sure I touched or licked each one - he was literally jumping when suddenly he slapped my face, rolled me onto all fours, stepped in behind me and plunged that monster deep in my pussy.

The pain should have been unbearable but he slipped in as easy as if he'd been fucking me for years - the root must have loosened me up - Grabbing my hips, the steady pounding started - I could hear my lover give out a low sexual moan ... I figured she had just experienced the massive cocks these guys have,

I've watched our group mate - it can take 5 to 10 minutes, since they are so sexual - but after what seemed like a good half hour, he was still exciting the insides of me Somehow the root that had been pushed in me, had made the entire canal super sensitive to the point that every time me pushed in, the head excited me to the point it felt like tiny waves of excitement was being triggered - consequently it felt like I was enjoying continual explosions, although small still steady - when he finally buried deep in me and began to empty a huge load - it was much warmer than I could ever have imagined - the heat triggered a massive explosion feeling like it was touching every cell in me ... to my surprise, he pulled out as soon as he had finished filling me ... then a second one jumped in, driving his pole as deep maybe deeper than the first one, - the pumping started immediately - not giving me anytime to recover from the explosion my body had just gone through.

I have to admit I wasn't ready to completely enjoy what was happening to me, my body was too exhausted to enjoy this - however when he emptied his load in me, I did have a small explosion from the heat of his seed - when he pulled out, a third one slipped in - this time the pounding was only moving my body, no real feeling - my body in a daze, even when he emptied his load, it was just a warm feeling that felt wonderful.

A female pushed something inside my pussy, I assume to keep as much of the seed as possible - then food and drink were made available.

Later on that day, Jess and I were barely able to raise our heads, when the whole process started again - this time I was put over a log, so I could remain in position - this gave me a direct line of sight to my friend and the other two pregnant ladies - them along with several troop females were arousing each other while they watched us being fucked - it was like a porn show where everyone in the audience is turned on -

However this time was so different - as soon as he entered me, my body responded, pushing back to him, widening my legs, trying to get him in deeper ... my arousal was like nothing I'd ever felt before - I needed him in me, needed him to fuck me over and over Screaming out I needed him to go faster, harder and deeper ... As soon as one was finished emptying in me, my own orgasm just barely settling down, I was looking for the next one to be in me - this time it took five in a row to somewhat satisfy me -

After three days of almost non stop fucking, early that next morning an older female came in with a leaf, indicating I was to empty my morning pee in the leaf - she tasted it ... shook her head, screamed something - a few larger females brought in a larger root, all soaked with the familiar honey look, ,plunging it deep inside me, my body exploded causing me to go into continual convulsions for a few hours - Jess had been exposed to the same treatment - looking at her, "It looks like the birth control is working - wonder how long it can withstand that damn root thing?"

That day we both rested, allowing the drugs to take effect of hopefully making us fertile to received the males seed - the next morning started by me dropping to all fours as soon as a male walked in, no pre-sex warm up - he slapped my ass, plunged that delicious monster deep in me ... my head

dropped down and a low whimper escaped me – his load exploded my body just like it always was doing – the second and third one were equally welcomed as my pussy matched their explosion – this time two more mounted me – my response was less than it had been with the first three. Late that afternoon five more enjoyed what my body was offering – that's when I also noticed the females who were watching had cum everywhere – all over their legs, their faces covered with the sticky substance – Chesley had it all over her shoulders and down her tits –

The next four days were as usual, lots and lots of fucking – the fifth brought in the old one with a large elephant leaf – this time I pissed in the leaf, she tasted it ... let out a blood curdling scream – it was confirmed I was pregnant with a bonobo baby. Jess' scream matched mine, our birth control shots had only been so powerful, apparently against this strange root – the monkeys won out.

The two native girls and Chelsea all gave birth to one female and two males – they were beautiful – a cross between the two species – Jess and I followed a few months later – mine was a little girl, she looked a lot like my dad had once looked – when she'd nurse, I loved the way it made me feel – they grow up very fast, so in a few months all were enjoying being with the other little ones born – Jess had a boy and like the previous boys had a much larger penis than a normal little guy.

We figured the cave had hidden our tacking device – so when the ones were all playing together and we were no longer nursing – we left the cave to move our vehicle to the cabin, get dressed so we looked normal when they found us –

Susan was the one who came roaring into our campsite – jumping out of her vehicle, "Where the hell have you two been? We've been trying to locate you ... OMG it is good to see you're OK, did you find Chelsey? Is she OK, where is she?"

It took us a few minutes to calm her down, telling her we did find Chesley along with a couple of captive native girls – they were pregnant – then we leveled her worst fear, telling her that we'd been knocked up as well – the children are all living in the village there are five of them so far – but we plan on going back to have a second one – that will give the troop 10 mixed little ones.

Her obvious question was how we all got kidnapped by a bunch of small miniature monkeys – the only way to have her fully understand was to show her the group and let her see for herself.

The three of us drove back to the main area, not too far from the caves – Chelsey was totally nude, along with the two local ladies, also nude – Susan got out of the back, started towards Chelsey, when the same large female who seduced me, greeted her, a big hug, a passionate kiss, her body rubbing our supervisors boobs, while a free hand moved between her legs, apply just the perfect amount of pressure to have her eyes roll up in her head –

Jess and I took a seat not far away, while a couple of females joined us, slipping off our shirts so they had easy access to our boobies – I just loved how skilled this group was. Poor Susan had no idea what was happening to her, we laughed when her shirt was not only opened but removed, the safari shorts were next to drop off – a hand between her legs had her cry out in what could only be described as a cry from pure ecstasy ... I loved it when she started to enjoy the first contact with the strange root.

Our eyes locked ... it was obvious she was trying to figure out what was happening – all I could do was smile – she had no way of knowing the pleasure that was coming her way.

As soon as we could Jess, the local girls Chesley as well as myself were getting ready to be impregnated again – while that was taking place and Susan was already in that condition, wondering why we hadn't suggested she join us sooner ... the troop had strict guidelines after we were

pregnant, no fucking of any kind until the birth takes place, how ever while being fucked, I taught the younger males how enjoyable it was to have me give them a blowjob while the older ones were fucking me - then how much fun fucking me in the ass while I was pregnant could be.

We're all knocked up now, when we give birth there will be 11 mixed young ones in the group - all we need is to have Susan contact her all female staff - then the new species will really be growing ... I do love being a sex toy to the bonobos.
