## BEASTIALITY STORIES

Our family consisted of Mom and Dad, my younger brother, by two years and me. Last year, summer time, was when our first 'Adults only' carnival came to town.

Being a young female, experiencing my body changing almost daily, the sexual urges seeming to be all over me ... the curiosity of what happens in a carnival like this, had my interest peaked to say the least.

My breasts were just beginning to form, they were super sensitive, the nipples seemed to be sore most of the time - my constant playing and exploring the new body that I was growing into, seemed to keep me in an aroused state ... so finding out what was going on inside the carnival area was a 'must-do'.

A large tent in the back area, seemed to be attracting the most people - sneaking in was not difficult - slipping under the large tent flaps, brought me into the staging area - where a group of dogs were caged, large big dogs, but no real breed I could make out. Also a half dozen women who seemed to be relaxing or maybe drugged in some way - one looked directly at me, I know she saw me, but no reaction took place. Each of them had collar

One dog was brought out, a large bottle of brownish pills were on the table, two were given to the hound ... while at the same time a dirty looking blonde was helped to a table, leash attached, while two pink colored pills were given to her.

The effects took place quickie, the dogs cock began coming out of his sheath - while the lady started moving her hips around - I could see her eyes cloud over, just before both were led out on stage -

Moving quickly to each table, taking a handful of the pink and brown tablets - stuffing them in my pocket - moving then to the front, I was shocked to see the dog fucking the brans out of the dirty blonde, while she was on all fours seeming to love every minute of it.

Needless to say, I had no idea this was even possible - so I like the audience watched in shock - sexually it was effecting some members in the audience - A few women were riding some men, both nude while others were on the ground openly fucking like mad. I'd seen pictures of people having intercourse, but never in real life - I was in the shadows where no one could see me, but my hands were down the front of my shorts, pumping two fingers in and out of my pussy, while I watched the dog doing the lady and the audience doing each other.

That was where I enjoyed my first orgasm - quietly heading back home when my body had finally calmed down - now what to do with the tablets I'd stolen.

The carnival was in town for a few days, I snuck into other tents, some had females dressed in skimpy leather outfits, showing their large boobs and shaved pussy, beating a male who had been tied up to a table - she assaulted his cock, making him cry and beg for more, one tent had two females making out another two males fucking - but since none of these made any sense I returned back to the big tent for the final night. Just as before, a big breasted female and a all black dog were given the tablets - this time they were held back longer, it was easy to see, both were sexually aroused when they were brought out on stage - they were on each other as soon as the leashes were taken off.

Rusty, my brother had gone away for the weekend to a sports camp, it was just the three of us, so I offered to help fix a meal Friday evening for us. Adding two brownish pills to dads drink and two pink ones to moms, we all sat down to eat. We hadn't been eating long, when I noticed both of their eyes started to lose focus. Mom was opening and closing her legs, while she rubbed between them, dad was rubbing his crotch, eventually unzipping his pants to release a huge - maybe 10 or 12 inch

cock - now stroking it - mom moved under the table, giving him a blowjob - the table was pushed to the side, dad moved behind her doggy style, driving the rigid cock deep in her pussy, she was screaming and thrashing from side to side - he had animalistic sounds coming but like mom, only sounds - there was a nice sized banana on the cupboard, shoving it deep inside me, my virginity was lost, but the pleasure that came along with it was worth any minor pain I experienced.

When they had fucked for the longest time, enjoying one climax after the next, both collapsed then slept - I cleaned up, they woke a few hours later, I could hear them take a shower then more fucking - a few hours later the house was quiet while everyone slept.

Both parents were embarrassed the next morning, so I figured they could remember what had happened, but no idea why - nothing was said but one thing I couldn't get over was how big my dad's cock was.

My parents owned a few small restaurants, a chain group, a few weeks later they were attending a conference in San Francisco. Rusty and I were home alone. I had seen him shower a few times and given time he'd be like my dad ... Friday night we ordered in Chinese, while he set the table, I poured our drinks, dropping two tablets in his. Setting across from him, fascinated at how fast the drug took place - his eyes lost focus, a light sweat on his neck then forehead - he was rubbing between his legs like mad, trying to stop what was happening, Standing and moving to his side, "You look frustrated bro, need me t help you?" Just as I said that my hand rubbed the front of his shorts ... this made him let out a low whimpering sound

"Not sure what is happening to me Sis, it feels like I'm losing control"

I had on a short loose fitting skirt, no panties, so when I kissed him, then straddled his lap, the hardness of his shaft could be felt immediately.

Both of us fumbled with his zipper, eventually freeing the shaft - rubbing the head back and forth between my lips - it easily slipped deep inside me with very little effort. Shaking his head, "Nikki, this is so wrong, you're my sister, we can't be doing this"

Rotating my hips around the hardness, "You've been peeking on me showering for years, I know you've wanted me - now I'm all yours"

The banana was fantastic, the cucumber the same, even the handle to my hairbrush was mind blowing - but I wasn't prepared for the way a real cock was going to feel.

It was hard and yet soft, twisting when he pushed it in, feeling like heaven when I squeezed him as he pulled out - I was not prepared for all of this, so only a few minutes into it, I hugged his neck, kissing him deeply, pressing my body to him as I exploded.

One thing I didn't know the drug gave both male and female lasting stamina - that is why my patents fucked for so long .... Now he was pounding me like an old porn star . Since I hadn't taken the pills, my body exploded several times while being on his lap, riding that cock.

Both of us were exhausted, for some reason not embarrassed at all - he asked about getting me pregnant, I explained I'd started birth control earlier - so no worries. We finally took a shower together ... that lead to a good long lasting shower fuck - then to the living room naked, where we fell asleep in each others arms.

That evening the two of us moved into my bedroom, where we made slow, passionate love - falling into a deep sleep after our bodies had enjoyed the pleasures both of us shared.

When the parents came home, Rusty would sneak into my room when mom and dad were asleep -

The stolen pills were working perfectly - the parents were enjoying sexual encounters every chance they got, my brother and I were doing the same - A couple months later, dad had to return to his parents home to help them, that night I drugged mom and my brother - as expected they were fucking like rabbits in front of me.

Later on, mom joined me in the backyard, while I was enjoying a soaking in the hot tub, "So I know somehow you're drugging your dad, me and now your brother, so come clean and tell me what is happening?"

Never lying to my mom, I told her about the adult carnival, the pills that were given to the dogs and one of the captive females - how I'd snuck in stealing a handful of each, as well as drugging her, dad and my brother. I then told her I'd drugged Rusty so he'd fuck me.

Nothing was said, she just looked at me - finally smiling, "It looks like if you drug your dad, we'll be a happy loving family. Tonight I'll take your brother to a hotel, you drug your dad - enjoy that shabasko he carries between his legs - when we return sexual fun will be open to the four of us"

That evening while dad and I ordered some food along with drinks - it was fairly easy to drop two tablets in his drink - Since he had been previously drugged, he slipped under its control - giving me the opportunity to climb on his lap, no panties.

Kissing him, rubbing my large tits back and forth on his chest, grinding my crotch against his raging hardness ,,,

I knew he had watched me when I wore something skimpy or walking around wrapped in a towel - on more than one occasion I'd seen the large tent in his shorts or pants - so I knew when he felt me open to him, along with the way I was acting, it was telling him I was all his to be used as he needed.

The shorts he had on were an elastic waistband, no boxers or underwear, so as soon as he was fully erect - it easily slipped out from under one short leg ... sliding up inside me - his size making me gasp. I'd seen his size when he and mom were humping in front of me, but having all of him deep in me, the girth stretching my body - making me twist and turn, writhe from side to side

His big powerful hands grabbed each side of my waist, controlling me, pumping my body up and down on him, as if I were a rag doll. He was literally lifting me up, then slamming me back down like he was masterbating with a large blow-up doll.

The sheer size, girth and length - the way he was slamming me - triggered one orgasm after the next - my tits were slapping my face ... there were moments when I thought what the hell had I done - the opening between my legs was becoming sore, having only had sex with my younger brother - dad was in a whole different class

When he finally buried that monster deep inside me, feeling him emptying the warm seed deep down there - I was shot - would have loved to have orgasmed with him, but there was nothing left in the tank -

Eventually he picked me up, we took a shower together where he supported me, then like mom, wanted the truth - since we'd all had sex with each other - the following weekend we were all nude in the hottub, mom and dad fucked, Rusty had me, dad had me while mom rode my brother.

There was a big neighborhood party taking place the following week, everyone was open minded,

but no one had gone as far as swapping couples. The parents asked if they could take the remainder of my pills to spice up the gathering.

I of course agreed, from what we heard, the party was a blast, everyone got to know each other much better - but I was out of pills, the family was enjoying more sext than any of us had ever imagined - Rusty or dad slept with me every evening

By the time the carnival came back to town, I had a few guys I wanted to drug - and maybe enjoy doing a few couples ... so opening night I snuck in again - as soon as the first two had been drugged, everyone moved out front to watch, I had just moved to the table where the pills were, when a snare grabbed hold of my legs, instantly flipping me upside down, while a big scary guy walked up. "So we have our little thief - we figured you'd be back for more of our magical pills" He was pulling on my tits, rubbing his hand between my legs, then with a knife cut off all my clothes.

Continuing to tease me, was making me excited, while being terrified - I begged him to let me go, I was so sorry - but he didn't seem to listen at all - that was when an older lady joined us, moving to a fridge, taking a bluish medical bottle out, filling the contents of a average size syringe with the liquid, she started swabbing a spot on my bottom. "My name is Janice, I own this carnival and several animal type clubs south of the border. You have a perfect body for one of my stage shows and a group of dogs that love to fuck" She went on to say the pills have a limited time period and the drug wears off, where as the shot I'm about to receive never wears off - the only time you won't want to be fucked is to eat, sleep and bathroom breaks - the customers loved it.

I was begging her not to give me the drug, promised her anything she wanted, but she still plunged the needle in my bottom emptying the continents - then lowered me back down to the floor, where I was released. Normally I'd have run, but the drug was already having an effect on me, dizziness, a strange itch between my legs, my nipples were becoming super hard while tingling

The big man easily picked me up, carrying me out back to a large panel van - no windows, when he opened the back, a large cage had three dogs, three very large dogs, relaxing while they watched him open the door, placing me on the padded bottom of the enclosure - tapping my head, he told me to have fun - then closed the door.

The hounds came close to check me out ... the drugs had me flying, so the sniffs, licks and touching didn't seem to bother me ... slowly an unmistakable itch started to build between my legs, causing the liquid to start to coat my lips. The smell had my new companions curious and licking this new liquid.

Their tongues were exciting me, opening my legs wider, which was producing more of my juices - The more I produced the more excited the dogs were becoming.

Not fully understanding what I was doing, reaching under two of the animals - stroking their larger than I expected cocks, making the three of them start to lick my tits, my lips, ears - under that area -

We were driving to what was to be my new home, but inside the van, the drugs I'd been given were becoming more and more powerful over me,

Eventually moving so I was on all fours, the dogs moved to each end of me, ones tongue entered my mouth, making my eyes roll up in my head - another one jumped up on my back -

When his cock pushed inside me, I knew it was a dog, a dog had just entered me, but it was large, doing things and hitting places my dad never had - I wasn't ready for the speed he was doing me - in and out so fast it was shaking my whole body.

The familiar build up taking place inside me was beginning - knowing when I toppled over the edge, this one would be one unlike any previous ones. That was when one jumped up on my head, driving his large shaft into my mouth, down my throat - so deep I was forced to breathe through my nose.

The two of them pumped my body like they were going to die if they couldn't go faster.

The shot must have triggered my body to give off a erotic scent - the dogs were becoming crazy with lust - the one not in me, was jumping on my side, reaching out to grab his penis, this seemed to help him -

The one between my legs started to try to push the huge knot in - this was adding to the spike in my arousal. The bottom part of my body went crazy, twisting here and there, humping his cock .. when it finally slipped in, I went into a frantic mode, almost like I'd been taken over by an evil spirit. The one in my mouth seemed to sense a knot would not be possible - so he just kept pumping in and out.

Eventually I'd taken as much as possible - exploding just as the one inside me filled my pussy with his warm seed. While we were locked, the one down my throat emptied his load directly into my tummy. It took me a minute to realize what had happened - a flash of terror took over for a few minutes - I had become a dogs fuck toy - what the .... Just as the knot pulled out of me, the one I'd been jacking off jumped on me, but this time pushing all the way in my ass.

I've never had anything in my back door- the pain was instant - frantically trying to twist from side to side to get him out - but his weight, the speed he was pumping - made it impossible to move him or make him stop -

Dropping my head when I realized there was no way of stopping him, to my surprise, the pain became less replaced by a feeling of pleasure and joy - each time he'd pull almost out - I'd feel an emptiness then he'd ram back in and pure pleasure took over - it didn't take long for me to start to push back against him - as soon as I joined him in a steady rhythm of in and out, the excitement of what was happening surged through my whole body - his knot tried to be pushed in, but I was nowhere big enough for that to happen.

When he exploded filling me with the warm nectar, a new and exciting wave of pleasure hit me, it wasn't like a typical orgasm that rocks my world, instead it felt like I'd been wrapped in a soft blanket of warm pure pleasure, making me whimper as he pulled out.

All four of us were tired, so a quick nap over took, while we continued to our new home - I was enjoying some erotic dreams when one of them was licking me between my legs, making me roll on my back, legs stretching wide open -

I was more than ready, the area between my legs, soaked - making it easy for him to slip in that monster of a shaft - a few pumps the large ball sized knot was inside as well - now the pumping jettted me to a body shattering explosion - this time he didn't pull out, just kept pumping, moving that ball back and forth - that was when one of them moved over my mouth so I could give him a blowjob - that was when I realized how much I love sucking on their cocks ... smooth, moist - the head leaking continually while my tongue plays and explores it

The one between my legs, suddenly filled me with the warm wonderful liquid I now thoroughly had learned to love.

When he pulled out, I moved to my knees, guiding the third one into my ass ... going back to the blowjob, thinking how much I loved being banged in my ass.

For the rest of the trip, I had one of them in me or I was giving them a blowjob - no more sleep needed - just hours and hours of fucking.

When we arrived at our destination, cum covered the floor, the walls - everywhere - I had dried droplets all over me - first order of business was to wash me, while doing the same for my traveling companions - a nice meal was waiting for me, I'd drunk so much cum I wasn't thirsty but a cold beer hit the spot. By the time the club opened, I needed to be fucked in the worst way, on stage, one dog mounted me while I gave a blowjob to the next - as soon as the knot slipped out, I begged for one to fuck my ass ... the crowd seemed to like it .... I did two more shows that evening and into the next morning. Some rest and food, I did a matinee that next afternoon.

I'd forgotten about my family, everything of my past, all that mattered was where and when the next fucking would take place. A perfect job, being fucked in a club by numerous hounds.
