BEASTIALITY STORIES

I am the third generation of Hood girls still living and not being owned by any of the Walking sex craved Wolves.

Mom and I live in a small village – being a young girl is one thing, mom is a single mom So life is not simple for us. Mom does have a nice business making various candles that are always in demand. My grandmother lives deep in the forest and every Thursday the two of us take her the weeks supplies – the one big problem – this is where the sex craved wolves live, where they gather, trade their female play toys – in many ways where they capture new girls to become a fuck toy for them.

These creatures walk upright, are fantastically good looking, have the golden tongue of a used car salesman ... but the one drawback they have is only being able to seduce one female at a time. That is where their pets come into play, if they make contact with more than one female ... the sexual scent they can produce, keep the ones waiting to be turned into one of the pets in a erotic state, his followers play with them, keeping them on the sexual edge, until he can work his magic. It is easy to tell when a female has become a wolf's fuck toy, their eyes are blood red, probably from the heavily drugged seed the big males produce.

These creatures turn their victims by first making them give him a blow job, where he pumps them full of the addictive seed, so much so they look like they are 4 or 5 months pregnant, then he fucks them over and over again and again – continually emptying his seed deep inside their pussies ... this goes on until the female responds by enjoying one of the best orgasms they've ever had ... then they need this again and again ... he of course is more than happy to give them what they want. The one draw back, these creatures tire of the same old pussy, so they trade many times in the forest at gatherings ... which means the enslaved ones may end up who knows where.

That is why we try and be together when we go into the forest ... it is just safer.

One of mom's best friends is Lacie ... a beautiful blonde, big breasts, pale white skin and the hair so blonde it just shines One Thursday she needed to visit a good friend that lived close to grandma Hood. We had decided to travel together, but at the last minute mom needed to take care of something, Lacie didn't want to wait, so she headed out alone about an hour ahead of us.

We had been walking for about an hour when we came around a corner to a clearing To our shock, Lacie was nude, on all fours, her tummy looked bloated, like she'd drank a lot of liquid and a gorgeous tall wolf was fucking her as fast and hard as anything I'd ever seen breeding.

Several things happened at the same time, first the huge animal spotted us, second a flood of a new scent seemed to cover us, third our bodies began to feel funny ... tingly and funny. Mom's hand started rubbing between her legs, my breasts and nipples were throbbing – both of us dropped to the ground Mom knew exactly what was happening ... our eyes were becoming glazed, just when we spotted three nude women headed our way ... eyes were bright red. Their goal to start playing with us, keeping us aroused and begging to cum, until he could begin the conversion process.

Mom recognized the problem of having the sexy women join us, helping me on my feet, the two of us limped away, leaving our friend, knowing there was nothing we could do now, she was already his.

We had gone maybe a mile or so, when we stopped by a stream ... looking at me, apologizing for what had to be done, we shared our first embrace as a mother and daughter – our tongues dueling while her hand moved between my legs, rubbing then pushing up inside me ... I was a virgin, so all this was new, but my first explosion was like nothing I'd ever experienced With her help she also had the juices flowing, telling me it had to be done, there was no other way and we'd never make it to grandma's if the feelings he'd given with that strange scent hadn't been satisfied.

Laying in the soft grass on our backs, licking the juices we'd shared, I told her I really liked her taste, both agreed we'd do this more often now that the 'ice' was broken ... there were so many things she wanted to show me ... eventually getting dressed and on our way We were as happy as we'd ever been, so instead of knocking we just walked right in Both of our eyes went wide open ... my grandma was nude, her large boobs hanging down but looking like they were becoming full with some kind of milk. She was on all fours, her head hanging down - directly behind her was an older wolf, one that was just as good looking as any I'd seen, but one who had some grey in the coloring His foot long shaft or longer was plowing in and out of this old lady - her belly bloated told us he'd already emptied a full load of the addicting liquid into her ... she was already his, now he just needed time to make her eyes go red and the need to service him as a play thing was the last step.

We were both in total shock, but before we could back out, he'd spotted us, immediately releasing the seductive scent we'd already been exposed to earlier ... that made it impossible to get away. The way he was pumping in and out of my grandma, had my eyes glued to how big he was, the way it made her body stretch and the way she seemed to be enjoying what he was doing to her.

Without realizing what was happening, both of us had taken off our clothing, two of his girls had come into the cabin - one young blonde kissing my neck, squeezing and massaging my large breasts, running a hand between my legs, making it impossible to resist the way my arousal was spiking ... then I heard my mom make a plea for me, "Please you have my mom and now easily me, please let my daughter go ... she is a virgin, this is all new to her, please I beg you to let her go".

He kept on moving in and out of the old one, but his head came up, eyes were sparkling ... "A Virgin, a real life Virgin - we seldom get to play and seduce a virgin Oh will this be fun ... no my dear, I have such a special treatment for her ... I wouldn't think of letting her go".

Just then he emptied a load of his special seed, deep inside my nanny, she screamed, her head dropped down, that was the first time I saw the eyes change color, her's went dark red ... that's when I knew he had her, she was now officially a walking wolf fuck toy.

Whispering something to her, he moved holding that long stiff staff, easily seeing it coated with his and grandma's juices ...rubbing It back and forth over my mom's mouth.. Having no ability to resist, she willingly opened her mouth, the drug infested shaft slipped in easily. She immediately started sucking, making it slip down her throat, past the 'gag-reflex' area That was the first I saw him pumping that special changeable seed filling her. The tummy expanded - it almost looked like a hose was filling her up.

I wanted to watch what happened to my mom, so I'd have some idea what was coming my way, but before much happened, grandma crawled on all fours to me, offering me one of her large nipples that had started to lactate. As soon as the milk touched my lips, a surge of excited haze shot through me, making me start to suck as hard as I could. Suddenly my mouth started to become a little sore or tingly. Sucking, the gums were becoming sore, but for some reason I couldn't stop. By the time I emptied both of her breasts, I couldn't feel my teeth when I rubbed the tongue across them .. she had pulled away, gone back to lay down - mom was on all fours in the middle of the room, eyes fiery red.

I was finally able to see him, but instead of that shaft being pushed down my throat, his face was inches from me, a long twisty tongue licked my lips, then pushed deep inside me. The saliva flooded my mouth making me instantly wanting more ... sucking on it made a strange new feeling flood my mouth ... each tooth felt like they were coming loose. The more I sucked, my tongue could feel first the front ones were so loose, they just pushed out. Pulling back to spit out five or six that were no

longer attached ... back to sucking the tongue - more saliva and more came out until eventually the last of the back wisdom teeth were gone ... my tongue could feel the smooth gums, no blood ... the milk granny had given me combined with what I assumed was my new owner had killed the nerves in each molar then simple let them fall out ... his tongue circled my toothless mouth, then pulled back ... "OMG this can only work on a virgin. The old ladies milk, combined with my saliva and now I have my very own Little Red Golden Lips, giving blowjobs will be like heaven to all my wolf brothers, but first I've got to feel it".

With that he pushed his cock into my mouth, coaching me on how to bite down, applying pressure when I pulled back, along with my tongue teasing and tormenting the head until he was screaming and howling ... he grabbed both of my ears, screamed again ... then flooded me with a load of nectar ... I loved the taste, loved the way he was acting. This had been too much for him, collapsing on the floor to take a short nap, this would have been my chance to escape, but mom was on my boobs and granny had filled those big tits back up and needed emptying ... the two of them kept me company until he woke. A second blow job had me screaming again ... but this time he was breathing heavy ... finally looking at me "I need to rest then make you mine ... after that I'll let you treat me to another blow job ... oh the pack will pay or trade anyone to have you do this to them".

It didn't take long for him to be back in his true form, placing me on my knees at the side of the bed, very carefully pushing the huge head of his shaft inside my opening between my legs, then stopping to let me wiggle and get used to it being in there ...taking hold of my hips, he pushed further breaking the thin membrane that all virgins have ... the pain wasn't bad, I think the amount of his cum I'd swallowed had helped numb my body Then he slowly pushed in all the way, stopping to kiss my neck, squeeze my tits until I was panting and my hips were moving from side to side ... finally turning to kiss him ... "I'm ready to be fucked, to be really fucked and become one of your pets Master, please do me, I need to feel you really use me".

That is all it took, grabbing both of my hips, he pulled almost all the way out, then slammed me so hard, the heavy balls slapped my body. Back out, slamming back in over and over, again and again ... it only took a few minutes for me to experience my first full blown climax - mom had helped me with a small one in the forest, but now, what he was doing made my whole body shake ... a gush of liquid blew down my legs ... but he wasn't over yet, more pounding, lots and lots of screaming from me A second explosion and still he was pounding ... after a long time he pushed deep inside me, started to empty the warmest juice I could have ever imagined ... what felt like gallon after gallon ... my whole tummy became warm, all of my pussy was flooded with the warmth that seemed to cover all of me When he finally had filled me to the max, he pulled out ... it only took a few seconds and I could feel my eyes turn the bright red, the same all of the wolves fuck toys had.

Laying in a curled up position by the bed, I thought about our friend and how she looked when that wolf was fucking her, how my grandma looked when we first saw her, my mom and how pleased she looked with the red eyes and now me ... I had been fucked, really fucked by a strange wolf like creature that I had fallen in love with.

We stayed in Granny's house for a few days ...I'd give him a blow job, he fuck granny, mom and me as well as his toys that were always with him ... more blowjobs and more of enjoying him deep in me ... I knew in a few days we'd be heading to a monthly gathering of the pack, there I'd be giving blowjobs to all the males, since they don't have too many Red Golden Lips available to them, but right now, I was in love - the whole Hood Family was in love and playing like a family should play, we were all being fucked by the same wolf.
