BEASTIALITY STORIES

[Back to 1st Part](#)

While this was going on, Professor Alveritz had gone to his room and was watching through a monitor. He couldn't believe how the bonobos had organized and come to facility with the intention of breeding the three women. During the ten or fifteen minutes, the bonobos had corralled them, chosen a partner and it didn't seem to matter if they fucked them missionary or, in Teri's case, from behind. Alveritz zoomed in on Nan, her frightened face giving way to pure pleasure, her body actually responding to the ape as he fucked her right on the floor. He watched her hips gyrate, trying to extract all of the pleasure of moment even though the bonobo was pounding her pretty hard. He checked the different cameras and noticed all three of the women had passed out. He could easily understand why. The bonobos had all pulled out of their mates and cum was dripping out of all of them.

Teri was passed out on the bench on her belly, Becca on a bench on her back, her legs askew, cum dripping out. And Nan was on her back on the floor, laying in a puddle of his and her cum, her pussy still partly open from the ape cock which had rutted around inside of her. He saw them twitching, their bodies still not completely at rest.

Rewinding the video, he first watch Teri and her partner as he stood against her and lifted her body off of the bench with each thrust. Her tight ass was pressed hard by the ape and her legs were split as he positioned himself tightly against her. Lastly, he went back and watched Jingo fucking Becca on her back. Her legs were just off of the bench pointing towards the ceiling and her tits flopped around with the motion of the sex, and he watched the final moments as Jingo came forcefully inside of her, her eyes already closed. The ape stayed on top of her for another minute as his spurting cock finished filling her.

He knew, or thought he knew that bonobos could not get human females pregnant as they have two extra chromosomes. Although there were stories that that may not be true - the two extra chromosomes actually had a match with the human chromosomes. Somewhere during evolution, they had split off. So he was not convinced. What a study this would be though if they could produce an offspring! He would be world famous.

As he looked up again at the live feed, the three coeds had woken up. Slowly Becca stood up, Teri was next to her. They shivered and looked at the bonobos around the room. They were too scared to say anything lest they attract their attention. Nan stood up and made a beeline towards the other two. Jingo said something in ape-talk, as the other two apes and he were around the three women. They turned to look at them and were making docile sounds which did not sound threatening. Becca noticed each of the ape's cocks were hanging down, they did not appear to be sexually excited. Quietly she told her friends, "I think we might be able to leave now", and she started walking slowly towards the door.

Immediately, one of the apes moved closer to her, seeming to block her way to the door. He walked up to her and she froze. Making a loud noise he grabbed her around the waist and actually lifted her with his strong arms. He held her face to face. This seemed to be a signal to the other apes and Jingo went to Nan and the other ape to Teri. Neither girl moved.

The ape that had picked up Becca, held her against his body smushing her tits. She felt his fur, the heat of his body and his racing heart, then something between her legs. In her vulnerable position, she screamed and shut her legs to keep it away. With one hand, the ape held her tightly and with the other pulled her right leg open. She felt the 'thing' again and knew it was the bonobo's cock. It was searching for her opening. Struggling in his grasp was no use, he was too strong. The bonobo felt her nipples rubbing against his chest, crouched and then stood up, driving the tip of his cock into

the warmth between her legs. With Jingo's cum still dripping and lubricating her pussy, it was not hard for him to slide inside of her. He sort of dropped her and she unconsciously lifted her legs, allowing the whole length of his cock inside. Her pussy had just been fucked pretty hard but it willingly swallowed his shaft so that she was balls deep. When the ape felt her wet, hot pussy grasping his cock, he started thrusting up into her. In this standing position Becca didn't have to do anything except keep falling onto his cock. He would thrust and raise her up and then allow her to fall back onto him. The tip of his cock was pushing the back wall of her vagina, opening her cervix to him. He began thrusting like mad, making sounds as they went into a passionate rhythm. Becca was screaming as her engorged clit thrashed, her pussy now learning how to tighten down on a bonobo cock.

Teri was resigned to what would happen but not prepared when the bonobo (she was not sure if it was the same one from before since she didn't see him behind her), picked her up and dropped her hard on the padded bench. The abruptness of it caused her legs to open and the bonobo shoved his face into her crotch. He started madly licking and sucking on her pussy despite the remains of her previous fuck still filling her. His tongue and lips actually drove her a little crazy, and she lay back allowing him to continue.

Meanwhile Jingo had grabbed Nan by the hips. He bent down and also started to orally demolish her, even while she was standing there. She knew he was too strong for her and she wouldn't be able to resist. And the pleasure she was feeling encouraged her not to fight him. After he got a good taste of her, Jingo lifted her by the hips, turned her upside down, and started again, devouring her pussy. He couldn't get enough of her taste. Holding her with one arm, he took hold of his erection and pushed it against the woman's lips. Nan knew what she had to do and opened her mouth, sucking first on the tip. It wasn't as bad as she expected and knew that he would not let her upright until he finished. Jingo was a little more impatient and pushed the back of her head towards him while thrusting forward with his cock. Nan felt it slide down her throat and she gagged, but then he pulled out a brief second before thrusting forward again, holding her head in place. She was able to breath quickly between thrusts, and she knew she would have to adapt quickly. Meanwhile the pleasure between her legs was intense and her clit was humming along as she reached her first orgasm, spasming and choking on the ape cock. Her eyes rolled back but she recovered, and Jingo continued his oral attack on her.

The bonobo with Teri lifted his head from between her legs to catch his breath and saw what Jingo was doing with Nan. He jumped around the table and climbed up over Teri's head and went back to his assault on her pussy from this position with Teri on her back, legs spread and feet pointing at 45 degrees towards the ceiling. At the same time he pushed his erection against her mouth. Her pleasure was so intense and the intent of the ape was so clear, Teri tentatively licked his cock which tasted of the cum from his recent sex with Becca, her pussy juices and his precum which had ran down and coated his cock. She was unconsciously thrusting her hips up to the bonobo's mouth as he had split her pussy lips and was licking and sucking Teri's fresh juices flowing copiously from her. She tensed up and exploded in orgasm, screaming and moaning into the room. The ape could no longer wait for her mouth and he pivoted again on top of her, shoving his cock completely and intensely into the young woman. Teri's cunt clamped down on the hot plunging cock, doing its best to milk the organ. The bonobo screeched, unable to hold back and released stream after stream of his hot seed into Teri. She gasped at the release, her vagina walls spasming, her cervix open and receptive as her partner continued to thrust and cum into her, overflowing her and pooling underneath her once more. She wasn't sure when it happened but found that her legs had wrapped around her partner's back, holding him tightly against her. His cock kept twitching, lighting up her clit and causing her to shiver from head to toe each time. After a while she relaxed her legs letting them fall to the side but the bonobo didn't move, his cock kept jerking into his human partner.

Nan was experiencing multiple orgasms from her partner's oral assault. Jingo had never done this before with another ape but he found it enjoyable. He felt his orgasm about to explode and held Nan's head tightly against him. His legs buckled and he screamed out while he shot his pent up load down the throat of his human. Reflex caused Nan to gag and inhale as his slimy load released. His cum shot out of her nose and mouth, but Jingo held on, forcing his rod down towards her stomach. Nan swallowed as fast as she could, the cum was well beyond her tastebuds, so she tightened her lips to prevent any more escaping. She started blacking out so she pulled her head back forcefully to allow a deep breath. Jingo quickly pushed her back onto his organ and she moved back and forth, milking his protein down her stomach. When he could take no more, he released her and let Nan gently down to the floor. His cock slipped out of her clutching mouth but she had succeeded in swallowing the rest of his seed. Once she was on her back on floor, Jingo stooped down and easily pushed his still erect cock into her pussy, continuing to release his cum into her.

Meanwhile Becca was successful in draining the third bonobo's cock. He pushed into her, raising her legs with the force of his exertions, then backing out, allowing them to fall. In the throes of her orgasms, she grabbed the bonobo's ass, pulling him tight into her, moving him to and fro to her pleasure. As she pulled on him, one of her fingers found his asshole and sank into it. The ape screeched at this new pleasure. Becca felt his muscles contracting and releasing in a steady cycle as his cum was slowing down. She pressed against his pulsing internal organ, causing him to screech and to shoot a large load into her. This was new for both of them, and the ape shivered in pleasure. Becca continued to press and release, forcing the remaining cum from him until unable to stand it any longer, the bonobo pulled out of her, backing up and dancing at the newfound pleasure.

The three coeds were now filled with the seed from multiple partners, the amount of fucking so much more than they ever experienced with human partners. All six of them were tired and sitting or lying at various places around the room. The room stunk of human-bonobo sex and was filled with the puddles of their passions.

"I...I can't breathe!" Nan puffed out. "I never knew sex could be sooo enjoyable!"

Teri could hardly speak either. "Who taught these monkeys to do what they do!" she exclaimed. "My pussy is sooo sore!"

Becca laughed, "Tell me about it. I hope they're done! All I know is that I need a long hot bath!"

Teri laughed; Nan tried to but had no more breath.

Professor Alveritz had recorded it all. During the orgy of sex, he couldn't control himself and had to jerk off while he watched. He was cleaning up now, ensuring that all of evidence of his load were safely cleaned up. Who would have thought that the apes would have such prolific sex with his students? He knew that amongst themselves, the bonobos would almost continuously have sex, so maybe this wasn't that farfetched?

He didn't know if he should attempt to go back into the room or just stay put. After considering it for a few minutes he decided to stay where he was so as to see the events unfold without interruption.

The apes were recovering and beginning to walk around. The women didn't know if they would leave, if they would fuck them again or something else. They sat quietly and watched. The bonobo's cocks were limp at this point. As she looked Teri thought that they should be limp. They must be drained. But Jingo had other ideas. For him and the other bonobos, they could fuck throughout the day. Unlike other animals, the bonobos were built for this. Although their balls should be drained, in fact they were not.

Jingo once again said something in his own language, something the other bonobos responded to verbally. Jingo grabbed his own cock and started to jerk it, encouraging it to rise again. He spied Teri who he had not yet fucked and moved towards her. Teri saw him but at this point was resigned to the fact that the ape could take her whenever he wanted despite any protestations. She also had enjoyed the fucking more and more, each time a bonobo took her. Still, she backed away from Jingo as he approached. Her pussy was red from overuse, and leaking cum. If he wanted her like that, then let him take me, she thought. Resigned to the outcome, she got on her hands and knees, offering the bonobo a more natural view. Jingo was hard and erect by this time, his slimy cock was ready for his third fuck in the last 2 hours.

Teri parted her legs slightly to give him access and bonobo grabbed her hips, moving her into position for him. He plunged forward, but a little too high and he missed his target, sliding over her pussy and ass. He used his hand to lower his cock and moved forward again. This time he was successful and felt the heat of her pussy. As used as it was, it was filled with cum and his movements resulted in squishy sounding sex. It mattered not to the ape and he started thrusting in and out, and after a few minutes, Teri felt the rise of her first orgasm.

The other bonobo who had been fingered by Becca grabbed her again. He turned her around on her hands and knees and she got ready to feel his cock plunge into her. It was now with excitement and anticipation she waited, and she wiggled her ass at him. He needed no further prodding and went to jam his cock into her. He slid off of her slimed pussy and caught on her asshole. He didn't really care or know as he pushed forward. The electric shock to Becca was real and she squealed, trying to pull away so he could get the right hole. But the tip of his cock felt her and he thought she was trying to escape. With one strong hand he grabbed her hips and pushed. Since she was all covered in cum and his cock was leaking precum again, he slid inside of her. This was much tighter than before and very exciting so he rapidly pushed and pulled until 4 inches were inside of her. Becca had never had anal sex and the initial shock of him inside of her shocked her mind. But he wasn't letting her go and with each thrust continued to get deeper into her. Her body responded without her conscious consent. Becca felt a flush rise from the bonobo cock in her ass up through her body to her face. It was almost numbing as she lost her breath and her pussy spasmed in her first orgasm. And the ape wasn't even completely inside of her yet! In actuality this all happened in 15 seconds, but Becca wouldn't know that or care. Her body felt the bonobo cock sink deeper still, until he couldn't penetrate any further. Becca squealed as she was speared, all of her muscles contracted down on the invader, and her pussy spasmed again. She leaked her cum which was not needed in this case and it dripped as the bonobo got into his rhythm. He had never had such a tight fit as he had with Becca's ass. But his lubrication kept him sliding easily and tightly in and out of her. He couldn't stop himself when he felt his cum shooting from his balls up his shaft which pulsed inside of Becca. She came again, moaning loudly as he came and came into her ass. By this time she was hoping that it would never stop.

Teri was facing Becca and watched the ape standing over her deep in her ass, her clutching pussy with nothing in it, dripping with her cum. She watched, but only for a moment as her eyes closed. Jingo's steel cock felt as if it were flaming, and the ape lifted her body off of the floor. Her own orgasms were intense - she didn't know how her body could still respond after all of the fucking. Her arms collapsed finally and she lay her head on the floor as the bonobo continued rutting her as if she were the first fuck of the day. He pushed her forward with each thrust until she was a few feet from where she started. Dimly, she heard Jingo screech and felt the goodness of the fire and cum inside of her. Now she was filled with the cum of three different apes. She knew she would never view sex the same way again. Nor would her pussy ever be the same again.

Jingo saw the other bonobo deep in Becca's ass and heard his screeching as he continued to cum inside of her. He thought that was something he needed to try. Even though he was cumming in Teri's cunt, he pulled out just enough. Teri thought he was done with her until she felt his cock

pressing against her ass. She was also an ass virgin and this frightened her. To the bonobo, her beautiful pert ass needed to be fucked. He pushed into her, but that only pushed her further across the floor. He grabbed her hips to hold her in place and pushed hard with his hips, ramming completely into her ass. Teri screamed but that didn't frighten the ape. He really liked the extra tightness of this ass. He was already cumming but he thrust in and out of Teri as if beginning again, loosening her ass for his pleasure. His throbbing cock pulsed with pleasure. Wherever it came from, a new supply of cum was let loose in her ass. Like Becca, Teri quickly came, her pussy continuing to open and close as if Jingo were fucking that. Volumes of cum drizzled out of her pussy as Jingo concentrated on filling this other hole. In a final explosion, Jingo flooded Teri's ass and then stayed still as the last remnants of his emissions flowed into her. Teri felt the hot mess inside of her ass, realizing that that now was also ruined by the bonobos. As she lay her head on her arm on the floor, she had to admit that she loved the feeling of the hot cum in her ass.

At the same time as Jingo had taken Teri, the third bonobo grabbed Nan. She had been fucked senseless, had her stomach, nose and mouth filled with loads of cum, and now she didn't know what to expect from the ape. She just knew that some hole would be filled with hot bonobo cock. Her nipples hardened in anticipation, the fat little buds plumping out. Nan lay on the edge of one of the benches. They were all covered in cum from all of the festivities and she tried to avoid it. She stretched her long legs towards the ceiling just in time for the bonobo to spear her, once again splitting her pussy lips. He rapidly fucked her, pulling her hips towards him while pushing his own hips hard into her. Her pussy responded and the two lovers fucked each other as if there was a time limit and they had to finish. Over the past two days, Nan had been filled with bonobo cum three times - four, if counting her oral adventure. Nan was somewhat more responsive than the other two humans and she continued to fuck her bonobo partner for another 20 minutes, long after the other two women had their asses filled with bonobo cum and were lying down, totally exhausted.

The third bonobo finished with Nan and now the three apes were totally satisfied. Slowly, they made their way out of the facility and back to their group.

The three coeds, tired and dripping ape cum made their way back to their room. There they found their clothes, cleaned and pressed on each bed. "I just want to take a bath and zone out", Becca told the other two. "You and me both", said Nan. "Make that unanimous", added Teri.

They somehow each managed to bathe and then thankfully crawled into their beds, falling into a deep and rewarding sleep.

The next morning, they went to the kitchen for breakfast and found the Professor already there. "I made you all breakfast", he told them. "After all, you all earned it."

"I have to say this wasn't what I expected", Nan said, "but after everything over the last two days, I am ready for anything."

After that, the Professor and his students continued their studies of the bonobos. Curiously, the bonobos never showed interest in the women the remainder of their time at the habitat. At the conclusion of their study, they returned to their college just in time for the new semester. The Professor pledged his silence to them (after all he had his recordings which he could enjoy for a long time - and he looked forward to convincing a new batch of students to join him the following summer).

At the start of the new semester, the three friends, now joined together by their summer experience, were hanging out in Becca's room. She had asked them earlier in the day to join her for some urgent information. "So what's so urgent?", Teri asked, her face radiating with her smile.

I...I'm not sure how to talk about this, but...", Becca began.

"Talk about what?", Nan asked.

"Well, I wasn't feeling well and missed my period last month so I went to the doctor. I was feeling a bit nauseous..."

"And?" Teri asked, a little worried. "I've had similar symptoms!"

"Well...the doctor did some routine tests...and...and...I'm pregnant!" Becca finally blurted out.

"Well you should have been more careful!", Nan said. "Who was it, the Professor?", she looked at Becca expectantly.

"No, I...I haven't had sex with *anyone*", Becca responded. "Only our two crazy days with the bonobos..."

"Whattt!?!??", Teri and Nan asked in unison. "Pregnant? With an ape baby?"

"I don't know, the Professor said it couldn't happen. But I started looking it up and it seems like there have been some cases...", Becca responded. "So...so I don't know!"

Although she hadn't said anything to confirm, Nan also had similar symptoms. It seemed all three of them...

Oh my god!", Teri said, hand on her belly. "How do I know if...if..."

"Well, I bought some pregnancy tests and I tested myself again and it was positive! But I do have two more test kits. Here..." She gave her friends the kits.

Twenty minutes later the three coeds looked at one another with horror and giddy excitement. It was the only explanation. They were all going to be new moms to - something. They would know soon enough.

The End
