BEASTIALITY STORIES

~~~ All as told to me by my wife ~~~

August 1995

Barbra, my wife was a consultant to the corrections department in Northern Canada. She did training and such with the guards and some of the inmates. Charlie, the head guard was her 'escort' as such and they became quite close during her 2 week stay with their facility, Charlie would pick her up in the morning and drive her back to the hotel at night.

Charlie always had his big German Shepard with him day and night and when he picked Barbra up, Buster, the German Shepard was always so happy to see her he was all over her and often got a little carried away and tried to get his nose up under her skirt to investigate her cunny. He would just stick his nose up her skirt and try to have his way with her. This went on for the first three days she was there. Charlie, was also interested in Barb sexually and as time went on he let it be known.

Barb was aware that Charlie was sexually interested and, well, quite frankly, Barb was totally turned by Charlie and his his 6'3" , 225# frame. She was also becoming quite affectionate with Buster and began to enjoy his 'affection' for her.

Okay now I should describe my wife, Barb somewhat - she is 5'3" 125# with a dynamite bubble ass and legs that are not long but compact and nice as well she has 38D breasts that are just lovely to hold and play with. She is a farm girl and has that great wholesome look if you know what i mean. At the time of this story she was 24 years old.

One night as Charlie was driving her back to the hotel he asked her if she would enjoy a picnic by the river. Barb said "sure" as she hated spending all night alone in the room at the hotel.

Charlie laid out the blanket and so forth and the mood was kind of like quiet and electric. Charlie put his arm around Barb and she was okay with this as we had talked about her having sex with another man and I was cool with it as long as I got to hear her experiences in bed when she got home (this led to many other experiences as well)

Anyway Charlie started to kiss and feel Barb and she was now so horny she just let it happen. He laid her back on the blanket and began to work his way into her. he undid her blouse and bra and did a number on her lovely breasts which were now out and totally naked. He undid her skirt and opened it and started to slide it off her. Now Buster got interested. When he slid her panties down (she wears those stay up nylons, but not much else). Charlie inserted his fingers into her and as he did Barb started to spread her legs wider to accommodate him and as soon as she did Buster was there with hid nose in her cunny and licking and smelling her. She said that then Charlie pulled back and just gave Buster room to explore her.

She admitted that she then just lost it sexually. She spread herself and allowed Buster complete access into her. Charlie was helping Buster have his way with her. He encouraged Buster to lick and he was working with Buster's cock which was now about 6' out of his sheeth. Charlie asked Barb if she ever had a dog before. She then admitted that actually yes, she did once when she was 15 back on the farm (another story).

With Buster between her legs and Charlie beside her and Barb by now totally naked laying by the river with her legs spread wide and now begging to be fucked - it happened. Charlie turned her over and got her on her knees for Buster. He put another blanket over her back and invited Buster to

mount her and she thought that it wasn't Buster's first time with a woman as he easily mounted knew what he was in for. She was sure he grew to about 8 - 10" and he jabbed at her until he hit the entrance to her. He fucked her something furiously until he started to cum. He then swoll up and started to push his knot into her. She said she got a little scared as it was huge but he just pushed with his hind legs and pretty much drove it into her. Now she was taking his dog cum and a lot of it as well she was totally 'connected' to him for the nest while until his knot went down.

Can you imagine? My sexy wife laying on the bank of a river with a dog's cock way up inside her and now Charlie wanted his turn - but who else wanted a turn now? Charlie wasnt't very discrete with my wife and still had at least 10 days to help himself.
