BEASTIALITY STORIES

Kelly was in her first year of veterinary medicine in post graduate school. Although she was 21 years old; her petit stature made her look like she was still a teenager. When she went to the local zoo to get a job during the holiday season they almost didn't believe her, but finally gave her a part time job.

"We just got in our 9 reindeer that we put on display during this time of year" the head of personnel told her. "Your job will be to come in at dinner time to feed them and clean the pen and then come back in the morning to clean the stalls, brush the deer and put on their name tags, we try to make them appear to be Santa's.

Kelly knew that her part time job was going to be manual labor, that's what interning was all about. She actually liked the idea that she was basically in charge of the exhibit herself.

After filling out all the paperwork she walked over to the barn and pens that the zoo had for the Cervidae family of animals. The barn had white tailed deer, elk and now 9 caribou (aka reindeer.) The barn was at the end of the zoo on one side and Kelly felt it might get creepy at night, actually she hadn't met any zookeepers since she left the office. "Oh well" she thought, she was kind of a loaner so it didn't matter too much.

Kelly said hello to the deer, as she expected they were all males with a rack, except for the fawn which she gathered was suppose to be Rudolf. Actually to her surprise this one was a female.

Kelly checked out the rest of the zoo instead of driving home and then back again. She finally met some other workers as the zoo started to close. She had been given a locker and 2 uniforms and met a couple of other girls that worked there. Both of them were fulltime workers, both older and both tougher looking. One of them introduced herself as Mary and told her that she had the rest of the "deer family" as she called them, plus other areas.

The other woman, Barb, gave Kelly a real look over and then asked "so, did you fuck or just suck Charlie to get the job?" Kelly was surprised by the question and answered "neither." Barb shook her head and continued "what were you wearing in the interview?"

Kelly realized that she had her uniform on when Barb came in and she held up her micro skirt and blouse on a hanger. Barb just smiled and said "oh, he will be coming after you sooner or later, he's a pig." She stated.

Mary chimed in with "yeah a pig with a nice big cock."

Barb laughed, "for you maybe, I work with the big cocked animals." And continued with her sick laugh.

It was on Kelly's third day that things got a little weird. It was probably 10:00 when she heard someone coming. She looked out from one of the stalls and man dressed as Santa was walking into the barn. Kelly smiled to herself and came out of the stall.

The man gave her a candy cane and then sat on one of the chairs. She thought it might be Chuck, but she wasn't sure. He said "Come over here little girl and tell me how my reindeer are doing." Kelly thought this cute. So she sat on his knee and started to tell him how she had named the caribou and for the most part could tell them apart.

The man seemed to be listening and when he shifted his body a bunch of candy canes fell on the

floor. Kelly got up and said "I'll get them." As she knelt down to get them Santa opened his coat to expose that his pants had been open and he was wearing some kind of a jock strap. What ever he was wearing was basically irrelevant to her as she was face to face with the biggest cock she had ever seen. It had to be 8" long and really thick.

In the moment or two that Kelly froze Santa had reached out and pulled Kelly's head into his dick. "No" Kelly said, but even to hear it wasn't very convincing. A moment later Kelly was sucking him. She always had fantasies of guys with big dicks and here alone with one around she figured he might as well go for it.

She was getting really turned on with the thought that she was sucking off Santa. He must have sensed it the way she was moaning as he pushed her head away and said "Take off your coveralls and sit back on my lap." She stripped quickly and was just wearing a camisole and panties. As she moved to sit on him he pulled down her panties and before she even was ready, the head of the huge shaft was pushing at labia.

Kelly shifted a bit and then let herself slide slowly down his shaft. It felt so great that both of them moaned as inch after inch of his thick cock forced open he extremely tight pussy. Once she had taken him all in she started to bounce on his shaft.

"That's a good girl, take Santa's big present, oh yes, oh yes. I knew you would feel like a little elf," he stated.

Santa didn't last too long and as he neared his climax he pushed the co-ed off his lap and had her suck him till he shot his load. He coated Kelly's throat and she swolled what seemed like a glass of eggnog.

Just as quickly as Santa had come into the barn, he was gone. Kelly got to her feet hornier than she had ever been. She took off her cami and walked around the barn naked, looking for something to get off with. At that moment the little deer Rudolph ran to her. She had learned that the deer was not a fawn but a small female. As she ran her hand down her back to pet her she smelled and then saw that the deer was in heat.

The next thing she heard was louder hoof's on floor. She looked up and Prancer (one of the bigger caribou) was standing there. Kelly saw the way he was looking at the little deer and reacted without thinking. First she stood between them, and then as Prancer came closer, Kelly bent down to pick up the deer, turned her back to him.

The big animal could smell the sex of both the deer and of Kelly and reared up and knocked Kelly to the floor with his hoofs. Kelly didn't want to crush the little deer so she landed on her knees. Prancer was on top of both of them, as the deer was now trapped below Kelly.

Prancer could smell the deer below him and his long skinny cock started searching for the deer's pussy. Kelly felt it hit her butt and she almost laughed. She knew what it must be, but compared to Santa's thick cock this was going to be like a finger. She also knew from school that the bigger the animal the faster they came to not crush their mate.

Kelly was too horny to think straight and reached behind herself and felt for the cock. He was actually thicker that she had thought. She put his dick up to her pussy and then the caribou started to hump. Kelly felt the dick get bigger and longer as it humped quickly inside her. Just as she was feeling great, she felt the wetness and warmth and then Prancer jumper off.

Kelly stood still holding Rudolph and said out loud "this sucks."

She walked over to the pen where the rest of the reindeer were and they all walked toward her. A couple of them were fighting for position with there huge racks. Kelly didn't care, she wanted to cum.

She got on all fours and turned her butt toward the 7 of them and again held the little deer underneath her. She felt one of the Caribou put his noise up to her pussy and like his fellow reindeer before him he jumped up on her back. He hit mark right away.

By the third fucking Kelly was finally cumming and was in heaven. She looked behind her and all the reindeer were lined up. She smiled and as she got fucked in both the pussy and butt over the next hour, with each of them cumming multiple times inside her; Kelly started to sing:

Cum Dasher, Cum Dancer, Cum Prancer and Vixen. Fuck me Comet and Cupid and Donner and Blitzen.

Make me cum like a bitch, let me feel your big balls

All lined up behind me is a wonderful sight.
Merry Christmas you all, and to all a goodnight.
